### **Report on Guest Lecture**

#### **TOPIC: DESIGN AND ANALYSIS OF MULTYSTORED BUILDINGS**

A Guest Lecture was organized for III B.Tech Civil Engineering Students on “DESIGN AND ANALYSIS OF MULTYSTORED BUILDINGS” by Mr.V.S.Madhusudhan Rao, LCE, Manager, Projects (civil)

The lecture was organized in CAAD Lab Mechanical Department for 90 members of III B.Tech Civil Engineering. The lecture was started at 10.30 am by honoring the guest with a bouquet.

Mr.V.S.Madhusudhan Rao, guest speaker of the day spoke for a session of three hours. He addressed the students about the ways an engineer should be to excel in their career. He encouraged the students to prosper in their career as they wish but everything should be in a systematic way such that others also get benefitted from that.

He gave many good quotations to the students and motivated the students. He also gave students tips on how to speak, how to modulate and how to convey the meaning of the sentence. he also shared industrial experience and it is useful the future for the students.

The students were very much motivated by his words and liked the session very much. They said that they would transform themselves accordingly since knowledge is a transformation in the way which we excel.
