

COURSE STRUCTURE & SYLLABUS

For

B.Tech.

CIVIL ENGINEERING

(Applicable for batches admitted from 2019-20)

PRAGATI ENGINEERING COLLEGE **(AUTONOMOUS)**

Permanently Affiliated to JNTUK, Kakinada, Accredited by NAAC with "A" Grade
Recognized by UGC 2(f) and 12(b) under UGC act, 1956
1-378, ADB Road, Surampalem – 533 437
Near Peddapuram, E.G.Dist, Andhra Pradesh

PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

Zero Semester:

Induction Programming (Mandatory)	3 weeks duration
Induction program for students to be offered at the start of the first year.	<ol style="list-style-type: none">1. Physical activity2. Creative arts3. Universal human values4. Literary5. Proficiency modules6. Lectures by eminent peoples7. Visit local areas8. Familiarization of dept./branch and innovation

When new students enter an institution, they come with diverse thoughts, backgrounds and preparations. It is important to help them adjust to the new environment and inculcate in them the ethos of the institution with a sense of large purpose. Precious little is done by most of the institutions, except for an orientation program lasting a couple of days. We propose a 3 week long induction program for U G students entering the institution, right at start. Normal classes start only after induction program is over. Its purpose is to make the students feel comfortable in their new environment, open them up, set a healthy daily routine, create bonding in the batch as well as between faculty and students, develop awareness, sensitivity and understanding of the self, people around them, society at large and nature. The time during the induction program is also used to rectify some critical lacunas, for example, English background, for those students who have deficiency in it. The following are the activities under induction program in which the student would be fully engaged throughout the day for entire duration of induction program.

PROFESSIONAL COMMUNICATIVE ENGLISH

Introduction:

In view of the growing importance of English as a tool for global communication and the consequent emphasis on training the students to acquire communicative competence, the syllabus has been designed to develop linguistic and communicative competence of the students of Engineering.

As far as the detailed Textbooks are concerned, the focus is on the skills of listening, speaking, reading and writing. The non-detailed Textbooks are meant for extensive reading for pleasure and profit. Thus the stress in the syllabus is primarily on the development of communicative skills and fostering ideas.

Objectives:

1. To improve the language proficiency of the learners in English with emphasis on LSRW skills.
2. To enable the learners to study and comprehend the prescribed course effectively relating to their theoretical and practical components.
3. To develop the communication skills of the learners in both formal and informal situations.

LISTENING SKILLS

Objectives:

1. To enable the learners to appreciate the role of listening skill and improve their pronunciation.
2. To enable the learners to comprehend the speech prescribe of people belonging to different backgrounds and regions.
3. To enable the learners to listen for general content, to fill up information and infer the content.

SPEAKING SKILLS

Objectives:

1. To make the learners aware of the importance of speaking for their personal and professional communication.
2. To enable the learners to express themselves fluently and accurately in social and professional set up.
3. To help the learners describe objects, situations and people.
4. To make the learners participate in group activities like role-plays, discussions and debates.
5. To make the learners participate in Just a Minute talks.

READING SKILLS

Objectives:

1. To enable the learners to comprehend a text through silent reading.
2. To enable the learners to guess the meanings of words, messages and inferences of texts in given contexts.

PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

3. To enable the learners to skim and scan a text.
4. To enable the learners to identify the topic sentence.
5. To enable the learners to identify discourse features.
6. To enable the learners to make intensive and extensive reading.

WRITING SKILLS

Objectives:

1. To make the learners understand that writing is an exact formal skill.
2. To enable the learners to write sentences and paragraphs coherently and cohesively.
3. To make the learners identify and use appropriate vocabulary.
4. To enable the learners to narrate and describe.
5. To enable the learners capable of note-making.
6. To make the learners to write formal and informal letters.
7. To enable the learners to describe graphs using expressions of comparison.
8. To enable the learners to write technical reports.

Methodology:

1. The classes are to be learning-centred where the learners participate in the language learning activities with the peer group and the facilitator.
2. Integrated skill development methodology has to be adopted with focus on individual language skills as per the tasks/exercise.
3. The tasks/exercises at the end of each unit should be animated with the help of learning positive activities such as pair work, Group Discussion and so on.
4. The facilitator is expected to use supplementary material wherever necessary and also generate activities/tasks as per the requirement.
5. The facilitator activities the learning in a particular mode.

The following text books are recommended for study in I B.Tech I Semester (Common for all branches) of Pragati Engineering College, Surampalem from the academic year 2019-20 (R-19 Regulations)

DETAILED TEXTBOOK:

- **PROFESSIONAL COMMUNICATIVE ENGLISH** *Published by Maruthi Publishers.*

NON-DETAILED TEXTBOOK:

- **-PANORAMA: A COURSE ON READING**, *Published by Oxford University Press India*
The course content along with the study material is divided into six units.

PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

COURSE CONTENT	
UNIT I	Solving system of linear equations, Eigen Values and Eigen vectors Rank of a matrix by echelon form and normal form – Solving system of homogeneous and non-homogeneous linear equations – Gauss elimination method for solving system of equations – Eigenvalues and Eigen vectors and their properties.
UNIT II	Cayley-Hamilton Theorem and Quadratic forms Cayley-Hamilton theorem (without proof) – Finding inverse and powers of a matrix by Cayley-Hamilton theorem – Reduction to diagonal form-Quadratic forms-nature of the quadratic form - reduction of quadratic form to canonical form by orthogonal transformation.
UNIT III	Differential equations of first order and first degree Linear – Bernoulli – Exact – Reducible to exact. Applications: Newton’s Law of cooling – Law of natural growth and decay – Orthogonal trajectories.
UNIT IV	Linear differential equations of higher order Non-homogeneous equations of higher order with constant coefficients with RHS term of the type e^{ax} , $\sin ax$, $\cos ax$, polynomials in x^n , $e^{ax}V(x)$, $x^mV(x)$ - Method of Variation of parameters.
UNIT V	Partial differentiation Introduction – Homogeneous function – Euler’s theorem – Total derivative – Chain rule – Generalized Mean value theorem for single variable (without proof) – Taylor’s and Maclaurin’s series expansion of functions of two variables – Jacobian – Functional dependence. Applications: Maxima and Minima of functions of two variables without constraints and Lagrange’s method (with constraints).

(Autonomous R19)**

**ENGINEERING CHEMISTRY
(Civil Engineering)**

Course Category	Basic Sciences	Course Code	19BC1BS01
Course Type	Theory	L-T-P-C	3-0-3-4.5
Prerequisites	Intermediate Chemistry	Internal Assessment Semester End Examination Total Marks	40 60 100

COURSE OBJECTIVES

1	To learn about the hardness of water, boiler troubles, Drinking water standards and methods of removal of hardness of water
2	To get knowledge on Electrochemical cells, Batteries and fuel cells and their applications
3	To study about the factors affecting corrosion, controlling methods and about organic coatings
4	To learn about Cement, its setting and hardness, methods of polymerization, Plastics and Elastomers
5	To study about Nano materials, their preparation and applications and to gain awareness on smart materials,

COURSE OUTCOMES

Upon successful completion of the course, the student will be able to:

CO1	Distinguish between temporary and permanent hardness of water.
CO2	Illustrate the principles and applications of Batteries and Fuel cells
CO3	Identify different types of corrosion and their controlling methods.
CO4	Illustrate the principles of setting and hardening of cement and explain about polymers and their engineering applications.
CO5	Analyze the importance of nano and smart materials and Illustrate the principle of BET & TEM.

Contribution of Course Outcomes towards achievement of Program : Outcomes (1 – Low, 2 - Medium, 3 – High)

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
CO1		2	1	2		3	3				3	1	1		1
CO2	2	1			2		1				2	2			
CO3	1		2		2		1				1			1	
CO4	3		1	2		1	1				2		1		
CO5	2		3			2	2				1	1			

COURSE CONTENT

UNIT I	WATER TECHNOLOGY	9 hrs
	Introduction –Hard and Soft water, Estimation of hardness by EDTA Method - Boiler troubles - scale and sludge-priming and foaming and Caustic Embrittlement; Specifications for drinking water, Bureau of Indian Standards (BIS) and World health organization (WHO) standards, Industrial water – Primary and secondary treatments, zeolite and ion-exchange processes- desalination of brackish water, reverse osmosis (RO) and electro dialysis.	

PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

	<p>Learning outcomes: After the completion of the Unit I, the student will be able to</p> <ul style="list-style-type: none"> • explain the principles of reverse osmosis and electro dialysis. (L-2) • compare the quality of drinking water with BIS and WHO standards. (L-2) • illustrate boiler troubles associated with hard water. (L-2) • demonstrate the Industrial water treatment processes. (L-2)
UNIT II	<p style="text-align: right;">9 hrs</p> <p>ENERGY SOURCES AND APPLICATIONS Electrode potential, determination of single electrode potential –Nernst’s equation, Reference electrodes: Hydrogen and calomel electrodes – electrochemical series and its applications Batteries: Primary cell- dry or Leclanche cell, Secondary cell- Nickel-Cadmium cell – lithium batteries (Lithium-MnO₂); Fuel cells- H₂-O₂ fuel cell Solar energy: Photovoltaic cell and its applications. Fuels- Classification and characteristics-Liquid fuels- Refining of petroleum; gaseous fuels-LPG and CNG applications</p> <p>Learning outcomes: After the completion of the Unit II, the student will be able to</p> <ul style="list-style-type: none"> • define electrode potential. (L-1) • derive Nernst’s equation. (L-2) • outline the difference between primary and secondary cells. (L-2) • identify the applications of photo voltaic cell. (L-2) • discuss the applications of LPG and CNG (L-2)
UNIT III	<p style="text-align: right;">6+6 hrs</p> <p>CORROSION ENGINEERING III-A: Corrosion: Definition – theories of corrosion-Dry corrosion: Metal oxide formation - pilling bed worth ratio; Electro chemical corrosion: Mechanism, Factors affecting corrosion (nature of the metal and nature of the environment). III-B: Corrosion controlling methods: Sacrificial and Impressed current cathodic protection. Metallic coatings – Galvanizing and Tinning- Electro plating and Electro less plating; Anodic inhibitors and Cathodic inhibitors. Organic coatings – Paints and Varnishes (constituents and their functions).</p> <p>Learning outcomes: After the completion of the Unit III, the student will be able to</p> <ul style="list-style-type: none"> • explain theories of corrosion. (L-2) • identify the various factors affecting corrosion. (L-3) • classify different inhibitors of corrosion (L-2) • choose different organic coatings. (L-3) • apply the principles of corrosion control. (L-3)
UNIT IV	<p style="text-align: right;">10 hrs</p> <p>ENGINEERING MATERIALS AND POLYMERS Cement: Portland cement, constituents, Manufacture of Portland Cement, Chemistry of setting and hardening of Cement (hydration, hydrolysis, equations). Refractories-Classification, properties(refractoriness, refractoriness under load, porosity) Polymers: Introduction-Methods of Polymerization (Emulsion and Suspension), Conducting polymers – Mechanism of conduction in poly acetylene – applications, Bio – degradable polymers. Plastics: Thermoplastics and thermo setting resins; Moulding of plastics – Compression and Injection moulding - Preparation, properties and applications of Polystyrene and Bakelite. Elastomers: Natural Rubber, Vulcanization of rubber; Synthetic Rubbers -Preparation, properties and applications of Buna-S and Thiokol.</p> <p>Learning outcomes: After the completion of the Unit IV, the student will be able to</p> <ul style="list-style-type: none"> • illustrate the chemical reactions involved in the manufacturing of cement and properties of refractories. (L-2) • identify preparation and properties of different polymers. (L-3) • distinguish between thermoplastic and thermo setting resins. (L-4) • identify applications of conducting polymers (L-3)

PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

UNIT V	<p>NANO AND SMART MATERIALS 8 hrs</p> <p>Nano Materials: Introduction to Nano materials, Preparation of Carbon Nano Tubes(CNTs) by Laser Ablation and Chemical Vapor Deposition Methods, Fullerenes -Preparation, Properties and Applications; Chemical synthesis of nano materials : Sol-gel method, Characterization of nano materials by BET & TEM (basic principles), Applications of nano materials in waste water treatment, lubricants, Medicine and sensors.</p> <p>Smart Materials: Introduction – Types of smart materials-Self healing materials, Shape memory alloys and uses of smart materials.</p> <p>Learning outcomes: After the completion of the Unit V, the student will be able to</p> <ul style="list-style-type: none"> • classify nano materials. (L-2) • explain the synthesis and characterization methods of nano materials. (L-2) • explain principles of BET & TEM. (L-4) • identify different types of smart materials. (L-2)

Programming for Problem solving using C
(Common to CE, ME, EEE, ECE, CSE, IT)

Course Category	Engineering Science	Course Code	19CS1T01
Course Type	Theory	L-T-P-C	3-0-0-3
Prerequisites		Internal Assessment	40
		Semester End Examination	60
		Total Marks	100

COURSE OBJECTIVES	
1	To impart adequate knowledge on the need of programming languages and problem solving techniques.
2	To develop programming skills using the fundamentals of C Language.
3	To enable effective usage of arrays, structures, functions, pointers and dynamic memory allocation.
4	To make use of file handling functions in programming.

COURSE OUTCOMES		BTL
Upon successful completion of the course, the student will be able to:		
CO1	Apply the fundamentals of C Programming for Problem solving.	L3
CO2	Identify the appropriate Decision statement and Loops for a given Problem.	L2
CO3	Make use of Arrays and Strings to solve the problems in C.	L3
CO4	Apply the concepts of Functions and Pointers in Problem solving.	L3
CO5	Develop solutions for problems using Structures, Unions and Files.	L3

PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

COURSE CONTENT

UNIT I	<p>Introduction to Programming—Introduction to Computer Software, Classification of Computer Software, Representation of Data – Bits and Bytes, Programming Languages – High and Low Level Languages, Generation of Programming Languages, Program Design Tools: Algorithms, Flowcharts, Pseudocode, Types of Errors, Testing & Debugging Approaches.</p> <p>Introduction to C – Structure of a C Program, Writing the First C Program, Header Files used in C Program, Compiling and Executing C Programs.</p>
UNIT II	<p>Tokens in C: Basic Data Types in C – Keywords, Identifiers, Variables, Constants, Input / Output statements in C, Operators in C, Precedence and Associativity Rules, Type Casting Types.</p> <p>Decision Control: Decision Control Statements: Conditional Branching Statements - if, if – else, nested if, if – else – if, and Switch – Case.</p> <p>Basic Loop Structures: Iterative Statements - for, while and do - while, Nested Loops, The ‘Break’, ‘Continue’, and ‘goto’ statements.</p>
UNIT III	<p>Arrays: Declaration and Initialization of Arrays, Accessing & Storing the elements of an Array, Operations on Arrays: Traversing, Inserting, Deleting, Searching, Two Dimensional Arrays: Declaring, Initializing, Accessing, Operations on Two Dimensional Arrays (Matrices), Applications of Arrays.</p> <p>Strings: String Fundamentals, String Input and Output, String Library Functions</p>
UNIT IV	<p>Functions: Function Declaration / Function Prototypes, Function Definition, Function Call (Call by Value), Passing Parameters to Functions, Return Statement, Storage Classes, Recursive Functions, Arrays as Function Arguments.</p> <p>Pointers: Declaring Pointer Variables, Pointer Arithmetic, Passing Arguments to Function using Pointers (Call by Reference), Pointers and Arrays, Pointer to Pointer, Dynamic Memory Allocation – Malloc, Calloc, Realloc, Free.</p>
UNIT V	<p>Structures: Introduction to Structures, Nested Structures, Array of Structures.</p> <p>Unions: Introduction, Array of Union Variables, Union inside Structure, Enumerated Data Types, Bit Fields.</p> <p>Files: Declaring, Opening, and Closing File, Reading from and Writing to Text Files.</p>

PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

COURSE CONTENT	
UNIT I	Introduction to Engineering Mechanics: Basic Concepts of mechanics, System of Forces. Resultant System of Forces: Resultant of Coplanar Concurrent Force System - Moment of a Force, Couple, Varignon's Theorem, Resultant of Coplanar Non-Concurrent Force System. Equilibrium System of Forces: Equations of Equilibrium of Coplanar Systems, Free Body Diagrams, Lami's Theorem, Equilibrium of Connected Bodies.
UNIT II	Friction: Introduction, types of friction, Coulomb's laws of dry friction, coefficient of friction, cone of friction. Trusses: Introduction, Assumptions and Equilibrium analysis of plane trusses by using method of joints.
UNIT III	Centroid: Introduction, Centroids of simple and composite sections. Centre of Gravity: Simple bodies and Composite bodies, Pappus Theorem. Moment of Inertia: Definition – Transfer Theorem, Perpendicular Theorem, Polar Moment of Inertia, Moment of Inertia of Simple and Composite Figures, mass moment of inertia of simple bodies.
UNIT IV	Kinematics: D'Alembert's Principle, Rectilinear Motion and curvilinear motion, Motion with Uniform Velocity, Motion with Uniform Acceleration. Kinetics: Analysis as a Particle and Analysis as a Rigid Body in Translation, Equations of Plane Motion – Fixed Axis Rotation.
UNIT V	Work – Energy Method: Equations for Translation, Motion of Connected Bodies Fixed Axis Rotation and Plane Motion. Impulse momentum method.

TEXT BOOKS	
1	Engineering Mechanics - S.Timoshenko, D.H.Young., 5 th Edition - , Mc Graw Hill.
2	Engineering Mechanics - S. S. Bhavikatti, K G Rajasekharappa, Revised Edition, New Age International.
REFERENCE BOOKS	
1	Engineering Mechanics, N.H.Dubey, McGraw Hill, 2013.

Subject Code: 19HE1L01

Professional Communicative English Lab – I
(For CE, EEE, ME, CSE & IT)

L	T	P	C
0	0	3	1.5

PRESCRIBED LAB MANUAL FOR SEMESTER I:

‘**STRENGTHEN YOUR STEPS**: A Multimodal Course in Communication Skills’ Published by Maruthi Publications.

Objectives:

To enable the students to learn the communication skills; listening, speaking, reading and writing.

Outcome:

The course enables the learner to acquire communication skills which will help the students to become successful in the competitive world.

The course content along with the study material is divided into six units.

UNIT 1:

Hello, I’m
Consonant Sounds

UNIT 2:

I would love to But,
Vowel Sounds

UNIT 3:

With your Permission, I would like to
Syllable and Accent

UNIT 4:

Why don’t we.....
Pronunciation and Rhythm

UNIT 5:

Could you please
Tones

UNIT-6:

Dialogues

PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

Programming for Problem solving using C Laboratory

(Common to CE, ME, EEE, ECE, CSE, IT)

Course Category	Engineering Science	Course Code	19CS1L01
Course Type	Laboratory	L-T-P-C	0-0-3-1.5
Prerequisites		Internal Assessment	40
		Semester End Examination	60
		Total Marks	100

COURSE OBJECTIVES

1	To learn various steps in program development using Raptor.
2	To write C programs using basic concepts in C like operators, control statements etc.,
3	To design modular, reusable and readable C programs using concepts like Arrays, Functions and Pointers.
4	To write programs using Structures and Unions.
5.	To write programs to perform file operations.

COURSE OUTCOMES

BTL

Upon successful completion of the course, the student will be able to:

CO1	Translate given algorithms to a working programs.	L2
CO2	Design programs using Pointers to access Arrays, Strings and Functions.	L3
CO3	Develop programs using Structures, Unions and File operations.	L3

Contribution of Course Outcomes towards achievement of Program

Outcomes (1 – Low, 2 - Medium, 3 – High)

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
CO1	3	3	3	3	2	0	0	0	0	0	0	0	2	2	1
CO2	3	3	3	3	2	0	0	0	0	0	0	0	2	2	1
CO3	3	3	3	3	2	0	0	0	0	0	0	0	2	2	1

COURSE CONTENT

1.	Construct flowcharts using Raptor Tool to a) calculate the maximum, minimum and average of three numbers b) calculate area of a triangle given three sides using Heron's formula.
-----------	---

**PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)**

2.	Construct flowcharts using Raptor Tool to a) calculate simple interest for various parameters specified by the user. b) swapping of two numbers with and without using the third variable.																								
3.	Write a C Program to Perform Addition, Subtraction, Multiplication and Division of two numbers.																								
4.	Write a C Program to find the Grade of a student by taking input of percentage using all Relational Operators ($>$, $>=$, $<$, $<=$, $==$, $!=$) <table border="1" data-bbox="584 591 1177 1095"><thead><tr><th>Theory (%)</th><th>Letter Grade</th><th>Level</th></tr></thead><tbody><tr><td>≥ 90</td><td>O</td><td>Outstanding</td></tr><tr><td>≥ 80 to < 90</td><td>S</td><td>Excellent</td></tr><tr><td>≥ 70 to < 80</td><td>A</td><td>Very Good</td></tr><tr><td>≥ 60 to < 70</td><td>B</td><td>Good</td></tr><tr><td>≥ 50 to < 60</td><td>C</td><td>Fair</td></tr><tr><td>≥ 40 to < 50</td><td>D</td><td>Satisfactory</td></tr><tr><td>< 40</td><td>F</td><td>Fail</td></tr></tbody></table>	Theory (%)	Letter Grade	Level	≥ 90	O	Outstanding	≥ 80 to < 90	S	Excellent	≥ 70 to < 80	A	Very Good	≥ 60 to < 70	B	Good	≥ 50 to < 60	C	Fair	≥ 40 to < 50	D	Satisfactory	< 40	F	Fail
Theory (%)	Letter Grade	Level																							
≥ 90	O	Outstanding																							
≥ 80 to < 90	S	Excellent																							
≥ 70 to < 80	A	Very Good																							
≥ 60 to < 70	B	Good																							
≥ 50 to < 60	C	Fair																							
≥ 40 to < 50	D	Satisfactory																							
< 40	F	Fail																							
5.	Write a C Program to swap two given input numbers a) With using a temporary variable. b) Without using a temporary variable.																								
6.	Write a C Program to implement arithmetic operations using two operands and one operator using a) if – else – if condition. b) Switch – Case statement.																								
7.	Write a C Program to print the following patterns a) Floyd’s Triangle. b) Pascal Triangle.																								
8.	Write a C Program a) To find the sum of its individual digits for a given positive number. b) To check whether the given number is Prime or not.																								
9.	Write a C Program a) To check whether the given number is a Palindrome or not. b) To check whether the given number is an Armstrong or not																								
10.	Write a C Program using Functions to find both the largest and smallest number in an given array numbers.																								
11.	Write C programs to perform swapping of two numbers by passing a value and reference.																								
12.	Write a C Program for two Matrices by checking the compatibility a) Addition. b) Multiplication.																								

PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

13.	Write a C program on Strings to implement the following operations without string handling functions a) Concatenation of two given input strings. b) Length of a string. c) Reverse of a given string.
14.	Write C programs that use both recursive and non-recursive functions for the following i) To find the factorial of a given integer. ii) To find the GCD (greatest common divisor) of two given integers. iii) To find Fibonacci sequence
15.	Write a C program using Pointers to work on a) Matrix Addition. b) Transpose of a Matrix.
16.	Write a C program to read and print the details of an Employee (Name, Date of the Birth, Designation, Salary) using Structures.
17.	Write a C program a) to read and print the student details (Name, Register number, Address, Intermediate %) using Union. b) to display the name of the colour using Enum data type
18.	Write a C Program to a) Copy one file to another. b) Count the number of characters, words and lines in a file.

PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

COURSECONTENT

(Any 10 of the following listed 14 experiments)

LIST OF EXPERIMENTS:

Introduction to chemistry laboratory – Molarity, Normality, Primary, Secondary standard solutions, Volumetric titrations, Quantitative analysis

1. Estimation of HCl using standard Na_2CO_3 solutions
2. Determination of alkalinity of a sample containing Na_2CO_3 and NaOH
3. Estimation of KMnO_4 using standard Oxalic acid solution.
4. Estimation of Ferrous iron using standard $\text{K}_2\text{Cr}_2\text{O}_7$ solution
5. Determination of Temporary and permanent Hardness water using standard EDTA solution.
6. Determination of pH of the given sample solution using pH meter
7. Determination of Iron (III) using Colorimetric method
8. Conductometric Titrations between strong acid and strong base
9. Conductometric Titrations between strong acid and weak base
10. Estimation of Vitamin – C
11. Preparation of Phenol - Formaldehyde Resin
12. Determination of viscosity of a liquid
13. Determination of surface tension of a liquid
14. Preparation of Nano particles.(Cu/Zn)

TEXTBOOKS

1. Mendham J, Denney RC, Barnes JD, Thosmas M and Sivasankar B Vogel's Quantitative Chemical Analysis 6/e, Pearson publishers (2000).
2. N.K Bhasin and Sudha Rani Laboratory Manual on Engineering Chemistry 3/e, Dhanpat Rai Publishing Company (2007).

(Autonomous R19)

Environmental Studies (Common to All Branches)

Course Category	Basic Sciences	Course Code	19BE1T01
Course Type	Theory	L-T-P-C	3 – 0 – 0 – 0
Prerequisites	Exposure Basic Knowledge in Environment and protection.	Internal Assessment Semester End Examination Total Marks	0 0 0

COURSE OBJECTIVE:

1	To make the students to get awareness on environment, to understand the importance of protecting natural resources, ecosystems for future generations and pollution causes due to the day to day activities of human life to save earth from the inventions by the engineers.
----------	---

COURSE OUTCOMES

LEVEL

Upon successful completion of the course, the student will be able to:

CO1	Recognize the interconnectedness of human dependence on the earth's ecosystems	K -II
CO2	Comprehend environmental problems from multiple perspectives with emphasis on human modern lifestyles and developmental activities	K -I
CO3	Demonstrate knowledge relating to the biological systems involved in the major global environmental problems of the 21st century	K -II
CO4	Gain a higher level of personal involvement and interest in understanding and solving environmental problems.	K -II
CO5	Learn the management of environmental hazards and to mitigate disasters and have a clear understanding of environmental concerns and follow sustainable development practices	K -III
CO6	Influence their society in proper utilization of goods and services.	K -I

Contribution of Course Outcomes towards achievement of Program

Outcomes (1 – Low, 2 - Medium, 3 – High)

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	1	0	1	0	0	1	2	0	0	0	1	0	0	0
CO2	0	1	0	0	0	0	1	0	0	0	0	0	0	0
CO3	0	0	0	0	2	0	1	0	0	0	0	0	0	0
CO4	0	0	0	0	1	1	3	0	0	0	0	0	0	0
CO5	0	0	0	0	0	0	3	1	0	0	0	0	0	0

Course contents:

UNIT – I

Multidisciplinary nature of Environmental Studies: Definition, Scope and Importance-Need for public awareness.

Natural Resources:

Forest resources : deforestation – Mining, dams and other effects on forest and tribal people.

Water resources :Use and over utilization of surface and groundwater.

Food resources:World food problems, effects of modern agriculture, fertilizer-pesticide problems.

Energy resources: renewable and nonrenewable energy sources.

Role of an individual in conservation of natural resources.Equitable use of resources for sustainable lifestyles.

LEARNING OUTCOMES:

Students will be able to

1. Articulate the basic structure, functions, and processes of key social systems affecting the environment
2. Explain why renewable and non-renewable energy resources are important..
3. Explain how water resources should be used.

UNIT-II:Ecosystems, Biodiversity and its conservation: Definition of Ecosystem and its structure,

Functions

Biodiversity Definition-Value of biodiversity, India as a mega-diversity nation, Threats to biodiversity,

Conservation of biodiversity

PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

LEARNING OUTCOMES:

Students will be able to

1. Get a clear picture of structure and functions of ecosystems.
2. Demonstrate knowledge and understanding of theories in the field of Biodiversity and Systematic in the broad sense.

UNIT-III: Environmental Pollution: Definition, Cause, Effects of Air pollution, Water pollution, Noise pollution, Radioactive pollution, Role of an individual in prevention of pollution.

Solid Waste Management: Sources, effects and control measures of urban and industrial waste.

LEARNING OUTCOMES Students will be able to

1. Understand Cause, effects and control measures of air pollution.
2. Explain the enforcement of Environmental legislation
3. Understand solid waste management.

UNIT-IV: Social Issues and the Environment: Air (Prevention and Control of Pollution) Act 1981. –Water (Prevention and control of Pollution) Act 1974, EPA act 1986 ,Issues involved in enforcement of environmental legislation, Rain water harvesting, Global Environmental challenges climate change and mitigations and Adaptations (Engineering technologies)

LEARNING OUTCOMES:

Students will be able to

1. Explain the enforcement of Environmental legislations
2. Acquire knowledge on various environmental challenges induced due to unplanned anthropogenic activities.

UNIT-V: Human population and the Environment:

Population growth, Women and child welfare, Role of Information technology in environment and human health Awareness to Environmental Assessment & clearance ,Audit .Environmental Governance in india

E-Waste management Rules (Biomedical Waste, Solid Waste) **Field work:** A mini project related to Environmental issues / To visit a local polluted site (Submission of project by every student)

LEARNING OUTCOMES Students will have

1. Explain various types of information technologies
2. Explain the theories of population explosion

TEXT BOOKS

I B.Tech. – II Semester

PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

COURSE CONTENT	
UNIT I	Interpolation Introduction– Errors in polynomial interpolation – Finite differences – Forward differences– Backward differences – Central differences – Symbolic relations and separation of symbols – Differences of a polynomial-Newton’s formulae for interpolation – Gauss formulae for interpolation- Interpolation with unequal intervals – Lagrange’s interpolation formula.
UNIT II	Solution of Algebraic and Transcendental Equations Introduction- Bisection method – Method of false position – Secant method- Iteration method – Newton-Raphson method (One variable).
UNIT III	Numerical Integration and solution of Ordinary Differential equations Trapezoidal rule- Simpson’s 1/3rd and 3/8th rule-Solution of ordinary differential equations by Taylor’s series-Picard’s method of successive approximations-Euler’s method - Runge-Kutta method (second and fourth order).
UNIT IV	Multiple integrals Multiple integrals: Double and triple integrals – Change of variables – Change of order of integration. Applications: Finding Areas and Volumes.
UNIT V	Partial Differential Equations Formation of partial differential equations by elimination of arbitrary constants and arbitrary functions – solutions of first order linear (Lagrange) equation and nonlinear (standard types) equations.

TEXT BOOKS

PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

COURSE CONTENT	
UNIT I	Laplace transforms: Laplace transforms of standard functions – Properties - Periodic functions - Unit step function – Dirac’s delta function.
UNIT II	Inverse Laplace transforms: Inverse Laplace transforms – Properties – Convolution theorem (without proof). Applications: Solving ordinary differential equations (initial value problems) using Laplace transforms.
UNIT III	Fourier Analysis: Introduction- Periodic functions – Dirichlet’s conditions - Fourier series of a function, even and odd functions –Change of interval – Half-range sine and cosine series. Fourier integral theorem (without proof) – Fourier sine and cosine integrals – sine and cosine transforms – Inverse transforms.
UNIT IV	Vector Differentiation: Gradient - Directional derivative - Divergence – Curl – Laplacian and second order operators – Vector identities.
UNIT V	Vector Integration: Line integral – Work done – Potential function – Area, Surface and volume integrals - Vector integral theorems: Greens, Stokes and Gauss Divergence theorems (without proof) and related problems.

CONSTRUCTION MATERIALS

Course Category	Professional Core	Course Code	19CE2T01
Course Type	Theory	L-T-P-C	3-0-0-3
Prerequisites		Internal Assessment	40
		Semester End Examination	60
		Total Marks	100

COURSE OBJECTIVES

1	To create a strong understanding on the importance of various building materials like bricks, tiles and lime used in Civil Engineering construction.
2	To create a strong knowledge on the manufacturing of various building materials like cement and other materials used in Civil Engineering construction.
3	To Identify the uses of wood, stones and their applications in Civil Engineering.
4	Identifying the various structural components of buildings, bridges, embankments, etc.
5	To create a strong understanding on the importance of surface finishing of a structure.

COURSE OUTCOMES

Upon successful completion of the course, the student will be able to:

CO1	Know about various building materials like lime, brick, and tiles. (K1)
CO2	Understand about various types of cement and other construction materials. (K2)
CO3	Identify the various types of wood, stones and their uses. (K3)
CO4	Identify the structural components, sub-components and their applications. (K3)
CO5	Know the concepts of surface finishing of a structure. (K1)

Contribution of Course Outcomes towards achievement of Program

Outcomes (1 – Low, 2 - Medium, 3 – High)

CO	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3

CO4	3	2	1	1	--	--	--	--	--	--	--	--	3	2	3
CO5	3	2	1	1	--	--	--	--	--	--	--	1	3	2	3

COURSE CONTENT

UNIT I	<p>BRICKS, TILES & LIME</p> <p>Composition of good brick, methods of manufacturing of bricks. Characteristics of good tile, manufacturing methods, Types of tiles. Uses of materials like Aluminum, Gypsum, Glass and Bituminous materials – their quality.</p> <p>LIME: Various ingredients, Constituents, classification and various methods of manufacture of lime.</p>
---------------	--

PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

UNIT II	<p>CEMENT & OTHER CONSTRUCTION MATERIALS CEMENT: Portland cement- Chemical Composition, Various types of cement and their properties. Other Construction Materials - Galvanized Iron, Fiber Reinforced Plastics, Steel, Aluminum and soil</p>
UNIT III	<p>STONE & TIMBER PRODUCTS WOOD: Structure, Properties, Seasoning of timber, Classification of various types of woods used in buildings, Defects in timber. STONE: Properties of building stones, classification of stones, stone quarrying, precautions in blasting, dressing of stone,</p>
UNIT IV	<p>BUILDING COMPONENTS Definitions of terms in masonry, Types of masonry-stone masonry, Brick masonry-English and Flemish bonds. Different types of floors - Cement Concrete Flooring, Marble Flooring, Tiled Flooring, Timber Flooring, and Rubber Flooring. STAIRS: Technical terms, Requirements of Good Stair, Classification of Stairs. LINTELS & ARCHES: Classification of Lintels and Arches. DOORS AND WINDOWS: Location of Doors and Windows-Types of Doors–Types of Windows.</p>
UNIT V	<p>FINISHINGS AND PIPES Damp Proofing and water proofing materials and uses, Plastering Pointing, white washing and distempering PAINTS: Constituents of paint, Types of paints, Painting of new/old wood, Varnish. Form Works and Scaffolding PIPES: Pipes used in building construction. ADHESIVES: Used in timber, tile fixing, Joining concrete, cladding, sealing compounds & joint fillers.</p>

COURSE CONTENT	
UNIT I	CRYSTALLOGRAPHY & X-RAY DIFFRACTION (10 hrs) Introduction-Basis and lattice – Unit cell - Coordination number -Packing fraction -Bravais lattice-Crystal Systems – packing fractions of SC,BCC and FCC-Crystal directions and planes-Miller indices – Separation between successive (h k l) planes – Bragg’s law - Bragg’s X-ray spectrometer.
UNIT II	MAGNETIC PROPERTIES (8hrs) Introduction-Magnetic-dipole-moment-Magnetization-Magnetic susceptibility and permeability- Origin of permanent magnetic moment -Classification of Magnetic materials(Analytical) - Wiess theory – Domain theory -Hysteresis-eddy currents- soft and hard magnetic materials - applications
UNIT III	ACOUSTICS (11 hrs) Introduction – Reverberation - Reverberation time - Sabine’s formula (Jaggers’ Method using Eyrings approximation)–absorption coefficient and its determination- factors affecting acoustics of buildings and their remedies. ULTRASONICS Introduction-Production of ultrasonic’s by Magneto-striction and piezoelectric methods – Detection of ultrasonic’s- Non-Destructive Testing- pulse echo system through transmission and reflection modes - Applications.
UNIT IV	LASERS (11 hrs) Introduction-Characteristics–Spontaneous and Stimulated emission of radiation – population inversion - Pumping Mechanisms - Ruby laser – Helium Neon laser –Semiconductor laser– Applications SENSORS (Qualitative description only): Introduction-Strain and Pressure sensors-Piezoelectric-Magnetostrictive sensors- Temperature sensor-smoke and fire detectors-Applications.
UNIT V	PHYSICS OF NANOMATERIALS (8hrs) Introduction to Basics of Nano materials, Properties - Preparation methods (Sol Gel Technique, Ball Milling) and characterization Methods Scanning tunneling Microscopy, Atomic Force Microscopy – CNTs Preparation (Arc Discharge method) and properties - Applications of NanoMaterials (CNTs).

ENGINEERING DRAWING
(Only for CE)

PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

Course Category	Engineering Science	Course Code	19ME2T01
Course Type	Theory	L-T-P-C	1-0-3-2.5
Prerequisites		Internal Assessment	40
		Semester End Examination	60
		Total Marks	100

COURSE OBJECTIVES

1	To introduce the students to use drawing instruments and to draw polygons, Engineering Curves and Scales.
2	To introduce the students to use orthographic projections, projections of points and lines.
3	To make the students draw the projections of the planes.
4	To make the students draw the projections of the various types of solids.
5	To represent the object in 3D view through isometric views.

COURSE OUTCOMES

Upon successful completion of the course, the student will be able to:		Cognitive Level*
CO1	Construct polygons, scales and engineering curves.	k3
CO2	Identify the position of points and lines with use of orthographic projections.	k3
CO3	Analyze the location and position of plane figures through orthographic projections.	k4
CO4	Analyze the location and position of solid bodies through orthographic projections.	k4
CO5	Develop 2D and 3D objects by converting their views.	k6

*k1- Remembering, k2- Understanding, k3- Applying, k4- Analyzing, k5- Evaluating, k6- Creating

Contribution of Course Outcomes towards achievement of Program Outcomes
(1 – Low, 2 - Medium, 3 – High)

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3

COURSE CONTENT

UNIT I	Introduction to Engineering Drawing. Polygons: Constructing regular polygons by general method.
---------------	---

PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

	<p>Curves: Parabola, Ellipse and Hyperbola by general methods tangent & normal for the curves. Cycloid and Involutés.</p> <p>Scales: Vernier and Diagonal scales.</p>
UNIT II	<p>Orthographic Projections: Introduction, importance of reference lines, projections of points in various quadrants. Projections of straight lines inclined to both the planes, determination of true lengths and angle of inclination.</p>
UNIT III	<p>Projections of planes: Regular planes perpendicular/parallel to one plane. Regular planes inclined to one plane and parallel to other, inclined to both the planes.</p>
UNIT IV	<p>Projections of Solids: Simple positions of Prisms, Pyramids, Cones and Cylinders. Solids inclined to both the planes.</p>
UNIT V	<p>Isometric Projections: Introduction, Conversion of isometric views to orthographic views, Conversion of orthographic views to isometric views.</p> <p>Introduction to AutoCAD (Demo only)</p>

TEXT BOOKS	
1	Engineering Drawing by N.D. Bhatt, Chariot Publications, 56 th Edition.
2	Engineering Drawing + AutoCad – K Venugopal, V. Prabhu Raja, New Age International (P) Limited (2008).

PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

ENGINEERING WORKSHOP & IT WORKSHOP*
(Only for CE)

Course Category	Engineering Science	Course Code	19ME2L01
Course Type	Laboratory	L-T-P-C	0-0-3-1.5

PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

Prerequisites	Internal Assessment	40
	Semester End Examination	60
	Total Marks	100

COURSE OBJECTIVES	
1	To familiarize with the basic material removal/shaping processes.
2	To study the various tools and equipment used in different hands on sessions.
3	To develop a skill in dignity of labor, precision, safety at work place.

COURSE OUTCOMES	
Upon successful completion of the course, the student will be able to:	
CO1	Practice on manufacturing of components using workshop trades including fitting and carpentry.
CO2	Design different types of models by using workshop trades including black smithy and tin smithy.
CO3	Apply basic electrical engineering knowledge for house wiring practice.

Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3 – High)															
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
CO1	3	-	3	-	3	-	-	-	-	-	-	-	3	3	3
CO2	3	-	3	-	3	-	-	-	-	-	-	-	3	3	3
CO3	3	-	3	-	3	-	-	-	-	-	-	-	3	3	3

LIST OF EXPERIMENTS
A. Carpentry: 1. T-Lap Joint 2. Cross Lap Joint

PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

3. Dovetail Joint
4. Mortise and Tenon Joint

B. Fitting:

1. V Fit
2. Square Fit
3. Half Round Fit
4. Dovetail Fit

C. Black Smithy:

1. Round rod to Square
2. S-Hook
3. U- Hook
4. Round Rod to Flat Ring

D. House Wiring:

1. Parallel Connection of three bulbs
2. Series Connection of three bulbs
3. Stair Case wiring
4. Florescent Lamp Fitting

E. Tin Smithy:

1. Square Box without lid
2. Open Scoop
3. Taper Tray
4. Funnel

Note: At least eight exercises to be done covering at least 4 trades.

IT WORKSHOP

COURSE CONTENT

1	Identification of peripherals of a computer. To prepare a report containing the block diagram of the CPU along with the configuration of each peripheral and its functions. Description of various I/O devices, power rating of computers.
2	A practice on disassembling the components of a PC and assembling them to back to working condition.
3	Hardware trouble shooting (Demonstration): Identification of a problem and fixing a defective PC (improper assembly of peripherals)
4	Software troubleshooting (Demonstration): Identification of a problem and fixing the PC for any software issues.
5	MS Word –Formatting, Page Borders, Equations and Symbols . MS Excel -Organize data, Usage of formula, Graphs and Charts. MS PowerPoint -Guidelines for preparing an effective presentation.
6	Operating system installation:- Install Operating Systems like Windows, Linux along with necessary Device Drivers.

PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

*As a part of this course, 'Engineering Workshop' syllabus to be ratified by BoS-**Mechanical Engineering Department** and 'IT workshop' syllabus to be ratified by BoS-**CSE Department**, where as subject code to be given by Mechanical Engineering Department

Subject Code: 19HE2L02

L	T	P	C
0	0	3	1.5

PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

PROFESSIONAL COMMUNICATIVE ENGLISH LAB- II
(For CE, EEE, CSE & IT)

PRESCRIBED LAB MANUAL FOR SEMESTER II:

‘**STRENGTHEN YOUR STEPS:** A Multimodal Course in Communication Skills’, Published by Maruthi Publications.

OBJECTIVES: To enable the students to learn demonstratively the communication skills of listening, speaking, reading and writing.

OUTCOME: A study of the communicative items in the laboratory will help the students become successful in the competitive world.

The course content along with the study material is divided into six units.

UNIT-1:

Small Talk & JAM Session

UNIT-2:

Interviews

UNIT-3:

Effective Telephonic Interviews

UNIT-4:

Group Discussions

UNIT-5:

Presentations & Public Speaking

UNIT-6:

Debates

<ENGINEERING PHYSICS LABORATORY>

< Common to CE & ME)>

Course Category	BASIC SCIENCES	Course Code	19BP2T01
------------------------	-----------------------	--------------------	-----------------

**PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)**

Course Type	Lab	L-T-P-C	0 - 0 - 3-1.5
Prerequisites	Intermediate Physics	Internal Assessment	40
		Semester End Examination	60
		Total Marks	100

COURSE OBJECTIVES	
1	The student will have exposure to various experimental skills which is essential for an Engineering student.
2	To gain practical knowledge by applying the experimental methods to correlate with the Theoretical Physics.
3	Apply the Analytical techniques and graphical analysis to the experimental data

COURSE OUTCOMES		Cognitive Level
Upon successful completion of the course, the student will be able to:		
CO1	Understand the basics of Mechanics, Elasticity, Diffraction using instruments like Fly wheel, Stewart Gee's, Grating	Understanding(K2)
CO2	Understand the basics of Waves and Oscillations in Physics using instruments like Volume Resonator, Sonometer.	Application(K3)
CO3	Determine the Magnetic and Dielectric constants of materials	Application(K3)

Contribution of Course Outcomes towards achievement of Program															
Outcomes (1 – Low, 2 - Medium, 3 – High)															
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
CO1	2														
CO2	2														
CO3	2	2	2												

COURSE CONTENT: (Any 10 of the following listed 12 experiments)	
1.	Determination of Rigidity modulus of a material- Torsional Pendulum.
2.	Determination of Young's modulus by method of single cantilever oscillations.

PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

3.	Determination of Acceleration due to Gravity and Radius of Gyration - Compound Pendulum.
4.	Verification of laws of vibrations in stretched strings – Sonometer.
5.	Determination of ultrasonic velocity in liquid (Acoustic grating)
6.	Magnetic field along the axis of a current carrying coil – Stewart and Gee’s apparatus
7.	Study the variation of B versus H by magnetizing the magnetic material (B-H curve).
8.	Determination of dielectric constant by charging and discharging method
9.	Determination of wavelength of Laser by diffraction grating
10.	Determination of particle size using Laser.
11.	Determination of Moment of Inertia of a Fly Wheel.
12.	Determination of Velocity of sound –Volume Resonator.

Constitution of India

(Common to all branches)

Code:19HM2T05

Course Category	Humanities including Management	Credits	0
------------------------	---------------------------------	----------------	---

PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

Course Type	Theory	Lecture-Tutorial-Practice	2 -0 -0
Prerequisites		Total Marks (Internal Assessment)	100

Course Outcomes		Blooms Taxonomy Level
On successful completion of the course, the student will be able to		
CO 1	Understand the evolution of Constitution of India	Understanding
CO 2	Make use of their Fundamental rights.	Application
CO 3	Understand the functioning of the Union Government	Understanding
CO 4	Understand the functioning of the State and local self Government.	Understanding
CO 5	Understand the value of Indian Constitution in functioning of the country.	Understanding

Contribution of Course Outcomes towards achievement of Program												
Outcomes: 1 – Low, 2 - Medium, 3 – High												
	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO 10	PO 11	PO 12
CO1	0	0	0	0	0	3	0	3	0	1	0	2
CO2	0	0	0	0	0	1	0	2	1	1	0	1

CO4	0	0	0	0	0	1	0	1	1	1	0	0
CO5	0	0	0	0	0	1	1	1	1	1	0	2

Course Content :

Unit – I

Introduction to Indian constitution: Meaning of the term constitution - History and development – Preamble of the Constitution – Constituent Assembly – The salient features of Indian Constitution.

Unit –II

Fundamental Rights and Directive principles of state policy: Individual and Collective Rights – Limitations of the fundamental Rights – Judicial Interpretation of Fundamental Rights.

Unit –III

PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

Union Government: Union Legislature – Lok sabha and Rajya sabha (powers and functions) – President of India (powers and functions) – Prime minister of India (powers and functions) – Union Judiciary (supreme court powers and functions).

Unit – IV State and Local self Government:

State Government: State Legislature (Legislative Assembly / Vidhan Sabha, Legislative Council / Vidhan Parishad) – Powers and functions of state legislature – The Chief Minister of the state (powers and functions)

Local Self Government: Election commission of India (Powers and Functions)- The Union Public Service Commission (Powers and Functions)

Unit – V Working of the Indian Constitution

The values of the Indian Constitution and Ushering of Social Revolution in India – Nature and Role of Higher Judiciary in India – Amendments (Recent)

(Autonomous R19)

II B.Tech. – I Semester

BASIC ELECTRICAL AND ELECTRONICS ENGINEERING
(For B.Tech CE)

**PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)**

Course Category	Engineering Sciences	Course Code	19EE3T02
Course Type	Theory	L-T-P-C	3-0-0-3
Prerequisites	NA	Internal Assessment Semester End Examination Total Marks	40 60 100

COURSE OBJECTIVES	
1	To learn the basic principles of electrical circuit analysis.
2	To understand constructional details and operating principle of DC machines & Transformers.
3	To understand constructional details and operating principle details of alternator and 3-Phase induction motor.
4	To study operation of PN junction diode, half wave, full wave rectifiers, PNP and NPN transistors and various semiconductor devices.
5	To study the operation of OP-AMPS.

COURSE OUTCOMES		
Upon successful completion of the course, the student will be able to:		Cognitive Level
CO1	Analyze various electrical circuits	Analyzing
CO2	Understand constructional details and operating principle of DC machines, single phase transformer, tests and analyze their performance.	Analyzing
CO3	Explain operation of Three phase AC machines.	Understanding
CO4	Analyze operation of half wave, full wave bridge rectifiers and Explain single stage CE amplifier and concept of various semiconductor devices.	Analyzing
CO5	Analyze operation of OP-AMPS.	Analyzing

Contribution of Course Outcomes towards achievement of Program

CO1	3	2	2	1	0	0	0	0	0	0	0	1	1	0	1
CO2	3	2	2	2	0	0	0	0	0	0	0	1	1	0	1
CO3	3	2	2	2	0	0	0	0	0	0	0	1	1	0	1
CO4	3	2	0	0	0	0	0	0	0	0	0	0	1	0	0
CO5	3	2	0	0	0	0	0	0	0	0	0	0	1	0	0

COURSE CONTENT	
UNIT I	Electrical Circuits Basic definitions – types of network elements – Ohm’s Law – Kirchoff’s Laws – inductive networks – capacitive networks – series – parallel circuits – star-delta and delta-star transformations.
UNIT II	DC Machines & Transformers Constructional details and operating principle – EMF equation – DC motor – torque equation – applications - speed control methods of DC motor – Swinburne’s Test. Constructional details and operating principle of single phase transformers – EMF equation – equivalent circuit – Losses – OC & SC tests – efficiency.

PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

UNIT III	AC Machines Constructional details and operating principle of alternators – types –Regulation of alternator by synchronous impedance method. Principle of operation of 3-Phase squirrel cage induction motor – electromagnetic torque equation - power flow - brake test - efficiency calculation – applications.
UNIT IV	Semiconductor Devices PN junction diodes – characteristics – half wave and full wave rectifiers - PNP and NPN junction transistor, transistor as an amplifier – transistor amplifier – frequency response of CE amplifier – concepts of feedback amplifier – SCR – MOSFET - IGBT.
UNIT V	Operational Amplifiers Introduction to operation amplifiers (Ideal OP-AMP) – Characteristics – applications (inverting, non-inverting, integrator and differentiator).

Probability & Statistics
(Common to CE, CSE & IT)

II B. Tech I Semester

Course Category	Basic Sciences	Course Code	
Course Type	Theory	L-T-P-C	3-0-0-3

PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

Prerequisites	NIL	Internal Assessment	40
		Semester End Examination	60
		Total Marks	100

COURSE OBJECTIVES

1	The course is designed to equip the students with the necessary mathematical skills and techniques that are essential for an engineering course.
2	The skills derived from the course will help the student form a necessary base to develop analytic and design concepts.

COURSE OUTCOMES

Upon successful completion of the course, the student will be able to:		Cognitive Level
CO1	apply Binomial and Poisson distributions for real data to compute probabilities, theoretical frequencies	K3
CO2	interpret the properties of normal distribution and its applications	K2
CO3	find the confidence intervals for a statistic from the given population	K3
CO4	apply the concept of hypothesis testing to real world problems	K2
CO5	find a curve which approximate the given data, coefficient of correlation and lines of regression.	K3

K1: Remember, K2: Understand, K3: Apply, K4: Analyze, K5: Evaluate, K6: Create.

Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3 – High)

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
CO1	3	3	-	2	-	-	-	-	-	-	-	-
CO2	3	3	1	2	-	-	-	-	-	-	-	-
CO3	3	3	1	2	-	-	-	-	-	-	-	-
CO4	3	3	3	2	-	-	-	-	-	-	-	-
CO5	3	3	2	2	-	-	-	-	-	-	-	-

COURSE CONTENT

UNIT I	Discrete Distributions: Introduction – Discrete Random variables – Distribution function – Discrete distribution: Binomial and Poisson distributions.
UNIT II	Continuous distributions: Introduction -Continuous Random variables – Normal distributions, standard normal distribution, normal approximation to Binominal, Gamma and Weibull distributions.
UNIT III	Sampling Theory: Introduction – Population and samples – Sampling distribution of means for large and small samples (with known and unknown variance) – Proportion, sums and differences of means – Sampling distribution of variance – Point and interval estimation.

PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

UNIT IV	Test of Hypothesis: Introduction – Type I and Type II errors – Maximum error – One tail and two tail tests – Tests concerning single mean, two means and several means. Tests concerning single, two and several proportions – Problems using Z-test, t-test, F-test and Chi –square test.
UNIT V	Curve fitting and Correlation: Introduction- Method of least squares – Fitting a straight line – Second degree curve – exponential curve – power curve. Simple correlation and regression – rank correlation – multiple linear regression.

BUILDING PLANNING AND DRAWING

Course Category	Professional Core	Course Code	19CE3T02
Course Type	Theory	L-T-P-C	1 - 0 - 4 - 3

**PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)**

Prerequisites	Exposure to Construction Materials	Internal Assessment	40
		Semester End Examination	60
		Total Marks	100

COURSE OBJECTIVES	
1	Creating an idea to the student to different building bye-laws and regulations.
2	Imparting the planning aspects of residential buildings and public buildings.
3	Drawing the various signs and bonds and different components buildings..
4	Imparting the skills and methods of planning of various buildings.
5	

COURSE OUTCOMES	
Upon successful completion of the course, the student will be able to:	
CO1	Explain various building bye-Laws laid by town planning authorities and local regulatory bodies. (K2)
CO2	Apply techniques for effective project planning and management. (K3)
CO3	Plan the different types of residential buildings and various public buildings based on the minimum requirements. (K3)
CO4	Develop the building drawing as per standards in various phases of a project and detailing in construction. (K3)
CO5	Creating and awareness of basic elements of drawing. (K2)

Contribution of Course Outcomes towards achievement of Program															
Outcomes (1 – Low, 2 - Medium, 3 – High)															
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3

CO5	--	1	--	1	2	1	2	1	2	2	2	1	--	--	--

COURSE CONTENT	
UNIT I	BUILDING BYELAWS AND REGULATIONS Introduction- terminology- objectives of building byelaws - principles under laying building bye laws- classification of buildings- - Floor Area Ratio (FAR). Floor Space Index (FSI).Open space requirements – built up area limitations- height of buildings- wall thickness – lightening and ventilation requirements- Principles of Vaasthu in building planning.
UNIT II	PLANNING OF RESIDENTIAL BUILDING & PUBLIC BUILDINGS Planning of Residential building and grouping of rooms, planning of educational institutions, hospitals, dispensaries, office buildings, banks, industrial buildings, hotels & motels, buildings for recreation. Requirements and - Requirements and Minimum Standards for various Public Buildings.

**PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)**

UNIT III	<p>SIGN CONVENTIONS Brick, stone, plaster, sand filling, concrete, glass, steel, cast iron, copper alloys, aluminium alloys etc., lead, zinc, tin etc., earth, rock, timber and marbles.</p> <p>BONDS: English bond and Flemish bond- odd and even courses for one, one-half, two and two & half brick walls in thickness at the junction of a corner.</p>
UNIT IV	<p>DOORS, WINDOWS, VENTILATORS AND ROOFS Panelled door, panelled and glassed door, glassed windows, panelled windows, swing ventilators, fixed ventilators, coupled roof, collar roofs. King Post truss, Queen Post truss Sloped and flat roof buildings: drawing plans, Elevations and Cross Sections of given sloped roof buildings.</p>
UNIT V	<p>ELEVATION OF RESIDENTIAL BUILDING & PUBLIC BUILDINGS Draw the Plan, Elevation and sections of a Residential & Public buildings from the given line diagram-staircases.</p>

FLUID MECHANICS

Course Category	Professional Core	Course Code	19CE3T03
Course Type	Theory	L-T-P-C	3-0-0-3

**PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)**

Prerequisites	Engineering	Internal Assessment	40	
	Mechanics		Semester End Examination	60
			Total Marks	100

COURSE OBJECTIVES	
1	To introduce and explain fundamentals of Fluid Mechanics, which is used in the applications of Hydraulics.
2	To develop understanding about hydrostatic law, principle of buoyancy and stability of a floating body and application of mass in fluid flow
3	To imbibe basic laws and equations used for analysis of dynamic fluids
4	To determine the losses in a flow system, flow through pipes, flow past immersed bodies
5	To study the applications of the Bernoulli's equation and different types of mouth piece

COURSE OUTCOMES	
Upon successful completion of the course, the student will be able to:	
CO1	Know the definitions of fundamental concepts of fluid mechanics. (K1)
CO2	Identify the nature of flow in pipe and hydrostatic forces acting on submerged static fluid. (K3)
CO3	Calculate the pressure and velocities by using the Bernoulli's equation and momentum equation. (K3)
CO4	Estimate the head losses in a closed conduit flow interconnected with Reynolds number. (K3)
CO5	Justify the rate of flow through channels by using flow measurement devices. (K5)

Contribution of Course Outcomes towards achievement of Program															
Outcomes (1 – Low, 2 - Medium, 3 – High)															
CO	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
CO1	2	1	--	--	--	--	--	--	--	--	--	--	--	--	--
CO2	2	2	1	--	--	--	--	--	--	--	--	--	1	--	2
CO3	2	2	--	--	--	1	--	--	--	--	--	--	1	--	2
CO4	2	1	1	--	--	1	--	--	--	--	--	--	1	--	2
CO5	2	1	--	--	--	1	--	--	--	--	--	--	1	--	1

COURSE CONTENT	
UNIT I	INTRODUCTION : Dimensions and units, Physical properties of fluids, specific gravity, viscosity, surface tension, vapour pressure and their influences on fluid motion, pressure at a point, Pascal's law, Hydrostatic law- Relationship between pressures. Measurement of pressure -Pressure gauges, Manometers: Differential and Micro Manometers.
UNIT II	HYDROSTATICS : Hydrostatic forces on submerged plane-Horizontal, Vertical, inclined and curved surfaces – Centre of pressure. Derivations and problems. FLUID KINEMATICS : Description of fluid flow, Stream line, path line and streak lines and stream tube. Classification of flows: Steady, unsteady, uniform, non-uniform, laminar, turbulent, rotational and irrotational flows – Equation of continuity for one, two , three dimensional flows – stream and velocity potential functions, Flow net; Vortex flow – free vortex and forced, vertex flow

PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

UNIT III	<p>FLUID DYNAMICS: Surface and body forces: Euler's and Bernoulli's equations for flow along a stream line for 3-D flow, Navier – Stokes equations (Explanatory). Momentum equation and its application – forces on pipe bend.</p>
UNIT IV	<p>LAMINAR FLOW: Reynolds's experiment – Characteristics of Laminar & Turbulent flows. Flow between parallel plates, Flow through long tubes, flow through inclined tubes. CLOSED CONDUIT FLOW: Laws of Fluid friction – Darcy's equation, Minor losses – pipes in series – pipes in parallel – Total energy line and hydraulic gradient line. Pipe network problems, Moody's Chart.</p>
UNIT V	<p>MEASUREMENT OF FLOW: Pitot tube, Venturimeter and Orifice meter– classification of orifices, small orifice and large orifice, flow over rectangular, triangular and trapezoidal and stepped notches - Broad crested weirs. Classification of mouthpieces; Flow through external and internal cylindrical mouthpiece.</p>

STRENGTH OF MATERIALS - I

Course Category	Professional Core	Course Code	19CE3T04
Course Type	Theory	L-T-P-C	3-0-0-3

**PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)**

Prerequisites	Exposure to Engineering Mechanics	Internal Assessment	40
		Semester End Examination	60
		Total Marks	100

COURSE OBJECTIVES

1	To impart preliminary concepts of Strength of Material and Principles of Elasticity and Plasticity Stress strain behavior of materials and their governing laws.
2	To impart concepts of Bending Moment and Shear force for beams with different boundary and loading conditions and to draw shear force and bending moment diagrams.
3	To give the concept of flexure stresses in beams of various cross sections
4	To give the concept of shear stress in beams of various cross sections
5	To give the concept of deflection of beams under various loading conditions

COURSE OUTCOMES

Upon successful completion of the course, the student will be able to:

CO1	Relate to simple stresses, strains, elastic moduli and temperature stress (K2)
CO2	Calculate and draw shear force and bending moment diagrams of beams for given boundary conditions and loading conditions. (K3)
CO3	Find the flexural stresses and draw stress distribution for various sections. (K1)
CO4	Determine and draw the shear stress distribution for various beam sections. (K3)
CO5	Measure the deflections in beams under various loading and support conditions. (K3)

Contribution of Course Outcomes towards achievement of Program

Outcomes (1 – Low, 2 - Medium, 3 – High)

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
CO1	3	3	1	--	--	1	--	--	--	1	--	2	--	2	--
CO2	3	3	2	2	--	1	--	--	--	2	--	2	--	2	--
CO3	3	3	1	--	--	1	--	--	--	1	--	2	--	2	--

CO5	3	3	2	2	--	1	--	--	--	2	--	2	--	2	--

COURSE CONTENT

UNIT I	SIMPLE STRESSES AND STRAINS: Elasticity and plasticity – Types of stresses and strains – Hooke’s law – stress – strain diagram for mild steel – Working stress – Factor of safety – strain energy- gradual & sudden loads, Lateral strain, Poisson’s ratio and volumetric strain – Elastic moduli and the relationship between them – Bars of varying section – composite bars – Temperature stresses.
UNIT II	SHEAR FORCE AND BENDING MOMENT: Definition of beam – Types of beams – Concept of shear force and bending moment – S.F and B.M diagrams for cantilever, simply supported and overhanging beams subjected to point loads, uniformly distributed load., uniformly varying loads and combination of these loads– Point of contra flexure – Relation between S.F., B.M and rate of loading at a section of a beam.
UNIT III	FLEXURAL STRESSES: Theory of simple bending – Assumptions –Derivation of bending equation: $M/I = f/y = E/R$

**PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)**

	Neutral axis – Determination bending stresses. Section modulus of rectangular and circular sections (Solid and Hollow), I, T, Angle and Channel sections – Design of simple beam sections.
UNIT IV	SHEAR STRESSES: Derivation of formula – Shear stress distribution across various beam sections like rectangular, circular, triangular, I, T angle sections, built up beams, shear centre for Channel Sections and I-Sections
UNIT V	DEFLECTION OF BEAMS: Bending into a circular arc – slope, deflection and radius of curvature – Differential equation for the elastic line of a beam – Double integration and Macaulay’s methods – Determination of slope and deflection for cantilever and simply supported beams subjected to point loads, - U.D.L. Uniformly varying load.-Mohr’s theorems – Moment area method – application to simple cases including overhanging beams.

GEODESY

Course Category	Professional Core	Course Code	19CE3T05
Course Type	Theory	L-T-P-C	3-0-0-3
Prerequisites	-----	Internal Assessment	40
		Semester End Examination	60
		Total Marks	100

PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

COURSE OBJECTIVES

1	To introduce the students to basic principles of surveying.
2	To demonstrate the basic surveying skills.
3	To perform various methods of linear and angles measurements.
4	To enable the students to use surveying equipments.
5	To integrate the knowledge and produce topographical map.

COURSE OUTCOMES

Upon successful completion of the course, the student will be able to:

CO1	Illustrate the fundamentals in chain and plane table surveying. (K2)
CO2	Identify the angles on filed by compass survey. (K3)
CO3	Apply knowledge of leveling in surveying. (K3)
CO4	Measure the horizontal and vertical angles by using theodolite and Total Station instruments. (K3)
CO5	Estimate the volume and area of irregular boundaries of filed. (K3)

Contribution of Course Outcomes towards achievement of Program

Outcomes (1 – Low, 2 - Medium, 3 – High)

CO5	3	3	3	3	--	--	--	--	--	--	--	2	3	2	3

COURSE CONTENT

UNIT I	<p>INTRODUCTION: Definition-Uses of surveying, Objectives, Principles and Classifications of Surveying – Errors in survey measurements.</p> <p>DISTANCE MEASUREMENT CONVENTIONS AND METHODS: Use of chain and tape, Errors and corrections to linear measurements, overview of plane table surveying.</p>
UNIT II	<p>COMPASS SURVEY: Definition- Principles of Compass survey - Meridians, Azimuths and Bearings, declination. Computation of angle - Purpose and types of Traversing - traverse adjustments – Local attraction.</p> <p>CURVES: Types of curves, design and setting out.</p>
UNIT III	<p>LEVELING: Concept and Terminology, Leveling Instruments and their Temporary and permanent adjustments- method of leveling.</p> <p>CONTOURING: Characteristics and Uses of contours- methods of conducting contour surveys and their plotting.</p>
UNIT IV	<p>THEODOLITE: Theodolite, description, principles - uses – temporary and permanent adjustments, measurement of horizontal and vertical angles. Principles of Electronic Theodolite – Omitted Measurements. Introduction to geodetic surveying - Total Station and</p>

**PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)**

	Global Positioning System. TACHEOMETRIC SURVEYING: Stadia and tangential methods of Tachometry.
UNIT V	COMPUTATION OF AREAS AND VOLUMES: Computation of areas along irregular boundaries and regular boundaries. Embankments and cutting for a level section and two level sections with and without transverse slopes, determination of the capacity of reservoir, volume of barrow pits.

STRENGTH OF MATERIALS LABORATORY

Course Category	Professional Core	Course Code	19CE3L01
Course Type	Practical	L-T-P-C	0-0-3-1.5
Prerequisites	Exposure to Engineering Mechanics	Internal Assessment Semester End Examination Total Marks	40 60 100

COURSE OBJECTIVES	
1	To determine the deflections, young's modulus in beams
2	To determine the torsion in circular shafts

**PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)**

3	To determine the impact value for given specimen
4	To determine the spring constant in open and closed coiled helical springs
5	To determine compression in the given specimen

COURSE OUTCOMES

Upon successful completion of the course, the student will be able to:

CO1	Develop the relationship between the stress and strain. (K3)
CO2	Find the deflections and flexural behavior of different beams. (K1)
CO3	Relate to the concept of the torsion. (K2)
CO4	Compute the impact value of the specimen. (K3)
CO5	Find the compression strength of the given specimen. (K1)

Contribution of Course Outcomes towards achievement of Program

Outcomes (1 – Low, 2 - Medium, 3 – High)

COURSE CONTENT

S.NO	NAME OF THE EXPERIMENT
1	Tension test on Mild Steel bar.
2	Bending test on (Steel / Wood) Cantilever beam.
3	Bending test on simple support beam
4	Torsion test
5	Hardness test
6	Spring test
7	Compression test on wood or concrete
8	Impact test
9	Shear test
10	Verification of Maxwell's Reciprocal theorem on beams.
11	Use of Electrical resistance strain gauges
12	Continuous beam – deflection test.

LIST OF MAJOR EQUIPMENT

S.NO	NAME OF THE EQUIPMENT
------	-----------------------

**PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)**

1	UTM for conducting tension test on rods
2	Steel beam for flexure test
3	Wooden beam for flexure test
4	Torsion testing machine
5	Brinnell's / Rock well's hardness testing machine
6	Setup for spring tests
7	Compression testing machine
8	Izod & Charpy Impact machine
9	Shear testing machine
10	Beam setup for Maxwell's theorem verification.
11	Continuous beam setup
12	Continuous beam – deflection test.

GEODESY LABORATORY-I

Course Category	Professional Core	Course Code	19CE3L02
Course Type	Practical	L-T-P-C	0-0-3-1.5
Prerequisites		Internal Assessment	40
		Semester End Examination	60
		Total Marks	100

COURSE OBJECTIVES

1	To accomplish the chain surveying for linear measurements.
2	To Decide the Horizontal angles by compass surveying.
3	To Draw the maps of the areas by plane table surveying.

**PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)**

4	To discriminate the levels of undulated ground by auto level.
5	To implement the leveling to know the road profile.

COURSE OUTCOMES	
Upon successful completion of the course, the student will be able to:	
CO1	Compute the road widening and area by chain surveying. (K3)
CO2	Survey the given area by compass surveying. (K3)
CO3	Prepare maps for given land by plane table surveying. (K3)
CO4	Differentiate various levels for specified areas. (K2)
CO5	Design the road profile by auto level. (K3)

Contribution of Course Outcomes towards achievement of Program

Course Content:

UNIT - I

Professional Ethics and Human values:

Ethics -History of Ethics-Types of Ethics, Professional Ethics and its forms - Morals, Values – Integrity – Civic Virtue –Respect for others – Living Peacefully – Caring – Sharing – Honesty –Courage – Value time – Co-operation – Loyalty- Collegiality-Commitment – Empathy – Self-confidence – Spirituality- Character.

UNIT - II

Engineering & Organization Ethics:

Engineering Ethics-Meaning & Purpose of Engineering Ethics- Consensus and Controversy –Work Place Ethics and Business Ethics –Ethics in HRM, Finance & Marketing – Ethical Theories-Meaning & Uses of Ethical Theories-Theories of moral Development-Kohlberg’s Theory – Gilligan’s Argument –Heinz’s Dilemma.

UNIT - III

Engineers Responsibilities and Rights:

Key Characteristics of Engineering Professionals – Professional Roles to be played by an Engineer - Ethical egoism-Collective bargaining-Confidentiality- Acceptance of Bribes/Gifts when is a Gift and a Bribe-

PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

examples of Gifts v/s Bribes-Whistle Blowing and its types-when should it be attempted-preventing whistle blowing.

UNIT - IV

Engineers' Responsibility for Safety and Risk:

Concept of Safety-Types of Safety, Risk-Types of Risks, Voluntary v/s Involuntary Risk- Short term v/s Long term Consequences- Expected Probability- Reversible Effects- Threshold Levels for Risk- Delayed v/s Immediate Risk- Safety and the Engineer – Designing for Safety – Risk-Benefit Analysis-Accidents.

UNIT - V

Ethical issues in Social Media:

Social Media- Various Social Media Platforms: Google, Facebook, YouTube, Instagram -Social Media set-up and Uses-Ethical use of Social media-Effects of Social Media on Public- Social Media (vs) News- Social Media Fame and Reputation-Trolling, Harassing, and Hating on Social Media-Legal Aspects of Social Media.

II B.Tech. –II Semester

STRENGTH OF MATERIALS – II

Course Category	Professional Core	Course Code	19CE4T06
Course Type	Theory	L-T-P-C	3-0-0-3
Prerequisites	Exposure to Engineering Mechanics & Strength of Materials– I	Internal Assessment Semester End Examination Total Marks	40 60 100

COURSE OBJECTIVES

1	To give concepts of Principal stresses and strains developed in cross section of the beams on the cross section and stresses on any inclined plane.
----------	---

**PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)**

2	To give concepts of torsion and governing torsion equation, and there by calculate the power transmitted by shafts and springs.
3	To classify cylinders based on their thickness and to derive equations for measurement of stresses across the cross section when subjected to external pressure
4	To classify columns and calculation of load carrying capacity and to assess stresses due to axial and lateral loads for different edge conditions
5	To calculate combined effect of direct and bending stresses on different engineering structures

COURSE OUTCOMES

Upon successful completion of the course, the student will be able to:

CO1	Relate to principal stresses, strains under various loading conditions. (K2)
CO2	Understand the concept of torsion in circular shafts. (K2)
CO3	Determine hoops stress and radial stress cylinders and spherical shells. (K3)
CO4	Analyze columns and struts under different loading conditions with different end conditions. (K4)
CO5	Analyze direct and bending stresses in dams, retaining walls and chimneys. (K4)

Contribution of Course Outcomes towards achievement of Program

Outcomes (1 – Low, 2 - Medium, 3 – High)

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3

CO3	3	3	2	1	--	1	--	--	--	1	--	2	--	2	--
CO4	3	3	2	--	--	1	--	--	--	1	--	2	--	2	--
CO5	3	3	2	1	--	1	--	--	--	1	--	2	--	2	2

COURSE CONTENT

UNIT I	<p>PRINCIPAL STRESSES AND STRAINS AND THEORY OF FAILURES: Introduction – Stresses on an inclined section of a bar under axial loading – compound stresses – Normal and tangential stresses on an inclined plane for biaxial stresses – Two perpendicular normal stresses Accompanied by a state of simple shear – Mohr’s circle of stresses – Principal stresses and strains – Analytical and graphical solutions.</p>
UNIT II	<p>TORSION OF CIRCULAR SHAFTS AND SPRINGS: Theory of pure torsion – Derivation of Torsion equations: $T/J = q/r = N\phi/L$ – Assumptions made in the theory of pure torsion – Torsional moment of resistance – Polar section modulus – Power transmitted by shafts – Combined bending and torsion and end thrust – Design of shafts according to theories of failure. SPRINGS: Introduction – Types of springs – deflection of close and open coiled helical springs under axial pull and axial couple – springs in series and parallel – Carriage or leaf springs</p>

PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

UNIT III	<p>CYLINDERS AND SPHERICAL SHELLS THIN CYLINDERS AND SPHERICAL SHELLS: Thin seamless cylindrical shells – Derivation of formula for longitudinal and circumferential stresses – hoop, longitudinal and volumetric strains – changes in diameter, and volume of thin cylinders – Thin spherical shells. THICK CYLINDERS AND SPHERICAL SHELLS: Introduction Lamé’s theory for thick cylinders –Derivation of Lamé’s formulae – distribution of hoop and radial stresses across thickness – design of thick cylinders – compound cylinders – Necessary difference of radii for shrinkage – Thick spherical shells. Introduction to Unsymmetrical Bending</p>
UNIT IV	<p>COLUMNS AND STRUTS: Introduction – Types of columns – Short, medium and long columns – Axially loaded compression members – Crushing load – Euler’s theorem for long columns- assumptions- derivation of Euler’s critical load formulae for various end conditions – Equivalent length of a column – slenderness ratio – Euler’s critical stress – Limitations of Euler’s theory – Rankine – Gordon formula – Long columns subjected to eccentric loading – Secant formula – Empirical formulae – Straight line formula – Prof. Perry’s formula. Laterally loaded struts – subjected to uniformly distributed and concentrated loads – Maximum B.M. and stress due to transverse and lateral loading. Columns with Initial Curvatures</p>
UNIT V	<p>DIRECT AND BENDING STRESSES: Stresses under the combined action of direct loading and B.M. Core of a section – determination of stresses in the case of chimneys, retaining walls and dams – conditions for stability – stresses due to direct loading and B.M. about both axis.</p>

CONCRETE TECHNOLOGY

Course Category	Professional Core	Course Code	19CE4T07
Course Type	Theory	L-T-P-C	3-0-0-3
Prerequisites	Exposure to Construction Materials	Internal Assessment	40
		Semester End Examination	60
		Total Marks	100

COURSE OBJECTIVES	
1	To understand the properties of ingredients of concrete
2	To know about the procedures in concreting and study the behavior of concrete at its fresh state

**PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)**

3	To study the behavior of concrete at its hardened stage
4	To study about the concrete design mix
5	To understand special concrete and their use

COURSE OUTCOMES	
Upon successful completion of the course, the student will be able to:	
CO1	Know the basic concept of concrete and its ingredients. (K1)
CO2	Perceive the importance of quality of concrete.(K2)
CO3	Know the properties of hardened concrete. (K1)
CO4	Design the concrete mix by BIS method. (K4)
CO5	Understand the Basic concept of special concrete and their production. (K2)

Contribution of Course Outcomes towards achievement of Program															
Outcomes (1 – Low, 2 - Medium, 3 – High)															
	PO1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO1 0	PO1 1	PO1 2	PSO 1	PSO 2	PSO 3
CO1	3	1	--	2	--	1	1	--	--	--	--	2	3	3	3
CO2	3	1	--	3	--	1	1	--	--	--	--	2	2	2	3
CO3	3	1	1	3	--	1	1	--	--	--	--	2	2	3	2

CO5	3	--	1	3	--	1	1	--	--	--	--	2	3	2	2

COURSE CONTENT	
UNIT I	<p>INGREDIENTS OF CONCRETE</p> <p>CEMENTS & ADMIXTURES: Types of Cement – Grades of Cement - Chemical composition - Tests of Cement– Hydration - Structure of hydrated cement – Mineral and Chemical Admixtures – accelerators, retarders, air-entrainers, plasticizers, super plasticizers, fly ash and silica fume.</p> <p>AGGREGATES: Classification of aggregate – Particle shape & texture – Mechanical properties of aggregates – Tests of Aggregates - Alkali aggregate reaction – Thermal properties – Grading curves – Grading of fine & coarse Aggregates – Gap graded and</p>

**PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)**

	well graded aggregate as per relevant IS code – Quality of mixing water.
UNIT II	FRESH CONCRETE: Manufacture of Concrete – Properties of fresh concrete - Workability –Factors affecting workability – Measurement of workability by different tests, Effect of time and temperature on workability Segregation & bleeding
UNIT III	HARDENED CONCRETE: Water / Cement ratio – Abram’s Law – Gel space ratio – Nature of strength of concrete –Maturity concept – Factors affecting strength - Relation between compressive & tensile strength – Testing of Hardened Concrete – Types of Non-destructive testing. ELASTICITY, CREEP & SHRINKAGE – Modulus of elasticity –Dynamic modulus of elasticity – Poisson’s ratio – Creep of concrete – Factors influencing creep – Shrinkage – types of shrinkage.
UNIT IV	MIX DESIGN: Factors in the choice of mix proportions – Durability of concrete – Quality Control of concrete – Statistical methods – Concepts Proportioning of concrete mixes by various methods – BIS method of mix design.
UNIT V	SPECIAL CONCRETES: Ready mixed concrete, Shotcrete -Light weight aggregate concrete – Cellular concrete – No-fines concrete, High density concrete, Fibre reinforced concrete – Factors affecting properties of F.R.C - Polymer concrete – Properties of polymer concrete, High performance concrete – Self Compaction Concrete - SIFCON - self healing concrete.

TEXT BOOKS

1.	Properties of Concrete by A. M. Neville – PEARSON – 4th edition.
2.	Concrete Technology by M. L. Gambhir. – Tata Mc. Graw Hill Publishers, New Delhi.
3.	Concrete Technology by A.M.Neville.-Pearson Publishers

REFERENCE BOOKS

1.	Concrete Technology by A.R. Santha Kumar, Oxford University Press, New Delhi
2.	Concrete Technology by M. S. Shetty. – S. Chand & Co.; 2004.

ENGINEERING GEOLOGY

Course Category	Professional Core	Course Code	19CE4T08
Course Type	Theory	L-T-P-C	3-0-0-3
Prerequisites	-----	Internal Assessment	40
		Semester End Examination	60
		Total Marks	100

COURSE OBJECTIVES

1	To introduce the Engineering Geology as a subject in Civil Engineering.
2	To identify and know the varieties of minerals and rocks and their importance.

**PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)**

3	To know the variance of Geological structures below the earth.
4	To identify the seismic hazards posed at any given site.
5	To know the different Civil Engineering structures and their construction.

COURSE OUTCOMES

Upon successful completion of the course, the student will be able to:

CO1	Introduce the subject and give a brief explanation to Civil Engineering importance of weathering. (K2)
CO2	Observe and Identify the properties of rocks and minerals and to impart a brief importance in the point of identification. (K2)
CO3	Know a brief knowledge About Recognize of various structures of rock and to identify the differences between the geology and geophysics. (K1)
CO4	Classify and measure the earthquake prone areas to practice the hazard Zone. (K4)
CO5	Locate a suitable site for the construction of Civil engineering structures. (K3)

Contribution of Course Outcomes towards achievement of Program

Outcomes (1 – Low, 2 - Medium, 3 – High)

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3

CO5	1	1	1	2	3	3	2	--	--	2	3	--	--	--	--

COURSE CONTENT

UNIT I	<p>Introduction: Branches of Geology, Importance of Geology in Civil Engineering with case studies.</p> <p>Weathering: Weathering of rocks, Geological agents, weathering process of Rock, Factors affecting weathering types of weathering agents River process and their development. Landforms: produced by rivers. Erosion and Denudation</p>
UNIT II	<p>Mineralogy And Petrology: Definitions of mineral and rock, Different methods of study on minerals and rocks, The study of physical properties of minerals and rocks for Macroscopic study for the Common rock forming minerals and other ore forming minerals. Classification structures, textures and forms of Igneous rocks Sedimentary</p>

**PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)**

	rocks, Metamorphic rocks and their study.
UNIT III	Structural Geology: a) Strike , Dip and Outcrop study of common geological structures associating with the rocks such as Folds, Faults, Joints and Unconformities- parts types, Mechanism and their importance in Civil Engineering structural Geology Strength Comparisons of Igneous Sedimentary and metamorphic rock structures.
UNIT IV	Ground Water: Water table Cone of depression Geological controls of Ground Water Movement, Ground Water Exploration Techniques. Types of Aquifers- porosity and permeability and water bearing properties of rocks. Earthquakes And Landslides: Terminology, Classification, causes and effects, Shield areas and Seismic belts Richter scale intensity Precautions of building constructions in seismic areas. Seismic Zones in India Classification of Landslides Causes and Effects measures to be taken prevent their occurrence at Landslides.
UNIT V	Dams: Types and purpose of Dams, Geological considerations in the selection of a Dam, Remedial measures to be taken to select the dam site. Reservoirs: Factors responsible in the selection of Reservoir site, Life of Reservoirs. Tunnels: Purpose of Tunneling, Effects, Lining of Tunnels. Influence of Geology for successful Tunneling.

HYDRAULICS & HYDRAULIC MACHINERY

Course Category	Professional Core	Course Code	19CE4T09
Course Type	Theory	L-T-P-C	3-0-0-3
Prerequisites	Exposure to Fluid mechanics	Internal Assessment Semester End Examination Total Marks	40 60 100

COURSE OBJECTIVES

1	To get exposure about the applications of Hydraulic Engineering in the field by means of studying the various channels.
----------	---

**PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)**

2	To learn applications of dimensional analysis
3	To study the effect of impact of jet of water on vanes.
4	To study the suitability of usage of turbines
5	To learn about usage of various pumps

COURSE OUTCOMES

Upon successful completion of the course, the student will be able to:

CO1	To study theories those explain the behavior and performance of fluid when the fluid is flowing in an Uniform open channel and non-uniform channels. (K1)
CO2	Student will attain the knowledge on hydraulic similitude of fluids. (K2)
CO3	Student will get acquainted with the concept of impact of jets. (K2)
CO4	To understand the components, function and use of different types of turbines. (K2)
CO5	To understand the components, function and use of different types of pumps. (K2)

Contribution of Course Outcomes towards achievement of Program

Outcomes (1 – Low, 2 - Medium, 3 – High)

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
CO1	2	1	1	--	--	--	--	--	--	--	--	2	--	--	2
CO2	3	2	2	1	--	--	--	--	--	--	--	2	--	--	2
CO3	2	3	2	1	1	--	--	--	--	--	--	2	--	--	1
CO4	2	2	2	1	-	1	1	1	--	--	--	2	--	--	1
CO5	2	2	2	3	1	1	1	--	--	--	--	2	--	--	1

COURSE CONTENT

UNIT I	OPEN CHANNEL FLOW: Types of flows - Type of channels – Velocity distribution – Energy and momentum correction factors – Chezy's, Manning's; Kutter's Equations; and Bazin formulae for uniform flow – Most Economical sections. Critical flow: Specific energy-critical depth – computation of critical depth –critical sub-critical and super critical flow .
UNIT II	HYDRAULIC SIMILITUDE: Dimensional analysis-Rayleigh's method and Buckingham's pi theorem-study of Hydraulic models – Geometric, kinematic and dynamic similarities-dimensionless numbers – model and prototype relations
UNIT III	BASICS OF TURBO MACHINERY: Hydrodynamic force of jets on stationary and moving flat inclined and curved vanes, jet striking centrally and at tip, velocity triangles at inlet and outlet, expressions for work done and efficiency-Angular momentum principle. HYDRO ELECTRIC POWER PLANT : Layout of a typical Hydropower installation – Heads and efficiencies - classification of turbines
UNIT IV	HYDRAULIC TURBINES : Pelton wheel - Francis turbine – Kaplan turbine - working, working proportions, velocity diagram, work done and efficiency Draft tube-theory & function efficiency, Governing of turbines-surge tanks-unit and specific turbines-unit speed-unit quantity-unit power-specific speed performance characteristics-geometric similarity-cavitation

**PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)**

UNIT V

CENTRIFUGAL PUMPS: Pump installation details-classification-work done- Manometric head-minimum starting speed-losses and efficiencies, specific speed, multistage pumps-pumps in parallel- performance of pumps Similarity Considerations. Characteristic curves - NPSH- Cavitations.

RECIPROCATING PUMPS: Introduction, classification of reciprocating pumps, main components of reciprocating pumps, working of a reciprocating pumps, discharge through pumps, indicator diagram, work done by reciprocating pumps, slip of reciprocating pumps

HIGHWAY ENGINEERING

Course Category	Professional Core	Course Code	19CE4T10
Course Type	Theory	L-T-P-C	3-0-0-3
Prerequisites	Exposure to Construction Materials	Internal Assessment	40
		Semester End Examination	60
		Total Marks	100

COURSE OBJECTIVES

- | | |
|---|--|
| 1 | To introduce the students with the principles and practice of transportation engineering which focuses on Highway Engineering. |
| 2 | To provide basic knowledge on materials used in pavement construction. |

**PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)**

3	Ability to mathematically develop and interpret design standards for horizontal and vertical geometry and superelevation
4	To enable the students to have a strong analytical and practical knowledge of Planning, Designing of Pavements.
5	To provide basic knowledge in traffic engineering, and transportation planning.

COURSE OUTCOMES	
Upon successful completion of the course, the student will be able to:	
CO1	Plan highway network for a given area. (K3)
CO2	Characterize the pavement materials like aggregates, Bituminous materials & construction. (K2)
CO3	Design the Highway geometrics based on highway alignment. (K3)
CO4	Judge suitability of pavement materials and design flexible and rigid pavements. (K2)
CO5	Design Intersections and prepare traffic management plans. (K4)

Contribution of Course Outcomes towards achievement of Program															
Outcomes (1 – Low, 2 - Medium, 3 – High)															
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
CO1	1	--	--	--	--	--	--	--	--	--	--	--	--	--	--
CO2	1	--	1		--	--	--	--	--	--	--	--	--	--	--
CO3	1	3	2	1	--	--	--	--	--	--	--	--	--	--	--
CO4	1	2	2	1	--	--	--	--	--	--	--	--	--	--	--
CO5	1	--	--	--	--	--	--	--	--	--	--	--	--	--	--

COURSE CONTENT	
UNIT I	Highway Planning and Alignment: Highway development in India; Classification of Roads; Road Network Patterns; Necessity for Highway Planning; Different Road Development Plans – First, second, third road development plans, road development vision 2021, Rural Road Development Plan – Vision 2025; Planning Surveys; Highway Alignment- Factors affecting Alignment- Engineering Surveys – Drawings and Reports.
UNIT II	Highway Materials: Sub-grade soil: classification –Group Index – Subgrade soil strength – California Bearing Ratio – Modulus of Subgrade Reaction. Stone aggregates: Desirable properties – Tests for Road Aggregates – Bituminous Materials: Types – Desirable properties -Tests on Bitumen
UNIT III	Highway Geometric Design: Importance of Geometric Design- Design controls and Criteria- Highway Cross Section Elements- Sight Distance Elements- Stopping sight Distance,

**PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)**

	Overtaking Sight Distance and Intermediate Sight Distance- Design of Horizontal Alignment- Design of Super elevation and Extra widening- Design of Transition Curves-Design of Vertical alignment-Gradients- Vertical curves.
UNIT IV	<p>Design of Pavements: Types of pavements; Functions and requirements of different components of pavements; Design Factors</p> <p>Flexible Pavements: Design factors – Flexible Pavement Design Methods – CBR method – IRC method – Burmister method – Mechanistic method – IRC Method for Low volume Flexible pavements.</p> <p>Rigid Pavements: Design Considerations – wheel load stresses – Temperature stresses – Frictional stresses – Combination of stresses – Design of slabs – Design of Joints – IRC method – Rigid pavements for low volume roads – Continuously Reinforced Cement Concrete Pavements – Roller Compacted Concrete Pavements.</p>
UNIT V	<p>Traffic Engineering: Basic Parameters of Traffic-Volume, Speed and Density- Traffic Volume Studies; Speed studies –spot speed and speed & delay studies; Parking Studies; Road Accidents-Causes and Preventive measures - Condition Diagram and Collision Diagrams; PCU Factors, Capacity of Highways – Factors Affecting; LOS Concepts; Road Traffic Signs; Road markings; Types of Intersections; At-Grade Intersections – Design of Plain, Flared, Rotary and Channelized Intersections; Design of Traffic Signals –Webster Method –IRC method.</p>

STRUCTURAL ANALYSIS-I

Course Category	Professional Core	Course Code	19CE4T11
Course Type	Theory	L-T-P-C	3-0-0-3
Prerequisites	Exposure to Engineering Mechanics & Strength of Materials-I	Internal Assessment	40
		Semester End Examination	60
		Total Marks	100

COURSE OBJECTIVES

1	To give preliminary concepts of assessments of bending moment and shear force in propped cantilevers.
2	To impart concepts of shear force and bending moment for Fixed Beams.

**PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)**

3	To give preliminary concepts of assessments of bending moment and shear force in Continuous beams
4	The procedure for development of slope deflection equations for continuous beams with and without support settlement.
5	To impart basic knowledge on strain energy in the application of beams and frames.

COURSE OUTCOMES

Upon successful completion of the course, the student will be able to:

CO1	Analyze the bending moment and shear force for propped cantilever beam at different loading and boundary conditions. (K4)
CO2	Determine the bending moment, shear force and deflection for Fixed beams with different loading and boundary conditions. (K4)
CO3	Analyze the continuous beams by using Clapeyron's theorem at different support conditions. (K4)
CO4	Analyze the continuous beams by using Slope Deflection Method. (K4)
CO5	Determine the deflections by applying the energy theorems. (K4)

Contribution of Course Outcomes towards achievement of Program

Outcomes (1 – Low, 2 - Medium, 3 – High)

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
CO1	3	2	2	2	-	1	-	-	2	-	-	2	1	3	1
CO2	3	2	2	2	-	1	-	-	2	-	-	2	1	3	1
CO3	3	2	2	2	-	1	-	-	2	-	-	2	1	3	1
CO4	3	3	2	2	-	2	-	-	3	-	-	2	2	3	1
CO5	3	3	3	2	-	2	-	-	3	-	-	2	2	3	1

COURSE CONTENT

UNIT I	PROPPED CANTILEVERS: Analysis of propped cantilevers-shear force and bending moment diagrams-Deflection of propped cantilevers.
UNIT II	FIXED BEAMS: Introduction to statically indeterminate beams with udl, central point load, eccentric point load, Number of point loads, uniformly varying load, couple and combination of loads shear force and bending moment diagrams-Deflection of fixed beams effect of sinking of support, effect of rotation of a support.
UNIT III	CONTINUOUS BEAMS: Introduction-Clapeyron's theorem of three moments- Analysis of continuous beams with constant moment of inertia with one or both ends fixed. Continuous beams with overhang, continuous beams with different moment of inertia for different spans-Effects of sinking of supports-shear force and Bending moment diagrams.

PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

UNIT IV	SLOPE-DEFLECTION METHOD: Introduction, derivation of slope-deflection equation, application to continuous beams with and without settlement of supports.
UNIT V	ENERGY THEOREMS: Introduction to Strain energy, Strain energy in linear elastic system, expression of strain energy due to axial load, bending moment and shear forces - Castiglianos first theorem - Deflections of simple beams and pin jointed trusses.

FLUID MECHANICS & HYDRAULIC MACHINERY LAB

Course Category	Professional Core	Course Code	19CE4L03
Course Type	Laboratory	L-T-P-C	0-0-3-1.5
Prerequisites	-----	Internal Assessment	40
		Semester End Examination	60
		Total Marks	100

COURSE OBJECTIVES	
1	To know the knowledge of various flow meters and the concept of fluid mechanics. Students will compare the performance of various machines at different operating points.
2	To understand the flow through different channels in Practical conditions
3	Useful to learn the Bernoulli's Equation Practical Applications.
4	Can understand the different hydraulic turbines in power plants.

PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

5	This lab helps to gain knowledge on working of centrifugal pumps, positive displacement pumps.
---	--

COURSE OUTCOMES	
Upon successful completion of the course, the student will be able to:	
CO1	Perform experiments to determine the coefficient of discharge of flow measuring devices. (K2)
CO2	Analyze the flow through rectangular and v-notch and pipe flow losses. (K4)
CO3	Verify the Bernoulli's theorem and knowledge on impact of jets. (K2)
CO4	Conduct experiments on hydraulic turbines and pumps to draw characteristics. (K2)
CO5	Examine the centrifugal and reciprocating pumps. (K2)

Contribution of Course Outcomes towards achievement of Program															
Outcomes (1 – Low, 2 - Medium, 3 – High)															
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3

CO5	3	2	2	--	--	1	--	--	--	--	--	--	1	3	1

S No	List of Experiments
1	Calibration of Venturimeter & Orifice meter
2	Determination of Coefficient of discharge for a small orifice by a constant head method.
3	Determination of Coefficient of discharge for an external mouth piece by variable head method.
4	Calibration of contracted Rectangular Notch and /or Triangular Notch
5	Determination of Coefficient of loss of head in a sudden contraction and friction factor.
6	Verification of Bernoulli's equation.
7	Impact of jet on vanes
8	Study of Hydraulic jump.
9	Performance test on Pelton wheel turbine
10	Performance test on Francis turbine.
11	Efficiency test on centrifugal pump.

PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

12	Efficiency test on reciprocating pump.
----	--

S No	List of Equipments.
1	Venturimeter setup.
2	Orifice meter setup.
3	Small orifice setup.
4	External mouthpiece setup.
5	Rectangular and Triangular notch setups
6	Friction factor test setup.
7	Bernoulli's theorem setup
8	Impact of jets.
9	Hydraulic jump test setup
10	Pelton wheel and Francis turbines.
11	Centrifugal and Reciprocating pumps

Engineering Geology Laboratory

Course Category	Professional Core	Course Code	19CE4L04
Course Type	Laboratory	L-T-P-C	0-0-3-1.5
Prerequisites	----	Internal Assessment	40
		Semester End Examination	60
		Total Marks	100

COURSE OBJECTIVES

1	Sedimentary processes (Weathering, erosion, deposition), Metamorphism and volcanic eruptions.
2	Identification of the minerals types of clay minerals their properties and effects on engineering project
3	Types of rock (Igneous, Sedimentary, and Metamorphic), Civil engineering importance of

**PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)**

	rock forming minerals
4	Geological structures (Joint, veins, crack, faults, and fold), reasons of formation for each type and their side effects on the engineering projects
5	Origin, Internal and surface structures of the earth

COURSE OUTCOMES

Upon successful completion of the course, the student will be able to:

CO1	Identify the minerals and their properties.[K3]
CO2	Recognize the rocks and their properties.[K3]
CO3	Determine the behavior of the bedding planes in terms of solving strike and dip.[K5]
CO4	Draw sections for geological maps showing tilted beds and faults.[K6]
CO5	Identify the morphological and geological characteristics on maps.[K3]

Contribution of Course Outcomes towards achievement of Program

Outcomes (1 – Low, 2 - Medium, 3 – High)

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3

COURSE CONTENT

S.No	List of Experiments
1.	Physical properties of minerals: Mega-scopic identification of
2.	Rock forming minerals – Quartz group, Feldspar group, Garnet group, Mica group & Talc, Chlorite, Olivine, Kyanite, Asbestos, Tourmelene, Calcite, Gypsum, etc...
3.	Ore forming minerals – Magnetite, Hematite, Pyrite, Pyralusite, Graphite, Chromite.
4.	Megascopic description and identification of rocks.
5.	Igneous rocks – Types of Granite, Pegmatite, Gabbro, Dolerite, Syenite, Granite Poryphery, Basalt, etc
6.	Sedimentary rocks – Sand stone, Ferruginous sand stone, Lime stone, Shale, Laterite, Conglamorate, etc.
7.	Metamorphic rocks – Biotite – Granite Gneiss, Slate, Muscovite & Biotiteschist, Marble, Khondalite, etc
8.	Interpretation and drawing of sections for geological maps showing tilted beds, faults,

PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

	unconformities etc
9.	Simple Structural Geology problems.
10.	Bore hole data
11.	Strength of the rock using laboratory tests.
12.	Field work – To identify Minerals, Rocks, Geomorphology & Structural Geology.

Essence of Indian Traditional Knowledge

(Common to all branches) Code:19HM4T06

Course Category	Humanities including Management	Credits	0
Course Type	Theory	Lecture-Tutorial-Practice	2 -0 -0
Prerequisites		Total Marks (Internal Assessment)	100

Course Outcomes

Course Outcomes		Blooms Taxonomy Level
On successful completion of the course, the student will be able to		
CO 1	Understand the significance of Indian Traditional Knowledge.	Understanding
CO 2	Classify the Indian Traditional Knowledge	Analysis

PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

CO 3	Compare Modern Science with Indian Traditional Knowledge system.	Evaluating
CO 4	Analyze the role of Government in protecting the Traditional Knowledge	Analysis
CO 5	Understand the impact of Philosophical tradition on Indian Knowledge System.	Understanding

Contribution of Course Outcomes towards achievement of Program												
Outcomes: 1 – Low, 2 - Medium, 3 – High												
	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO 10	PO 11	PO 12

CO4	0	0	2	0	0	2	0	2	0	0	0	0
CO5	0	0	1	0	0	3	0	1	0	3	0	1

Course Content :

Unit I

Introduction to Traditional Knowledge: Define Traditional Knowledge- Nature and Characteristics- Scope and Importance- kinds of Traditional Knowledge- The historical impact of social change on Traditional Knowledge Systems- Value of Traditional knowledge in global economy.

Unit II

Basic structure of Indian Knowledge System: Astadash Vidya- 4 Ved - 4 Upaved (Ayurved,Dhanurved,GandharvaVed&SthapthyaAdi),6vedanga(Shisha,Kalppa,Nirukha,Vyakaran,Jyot hisha&Chand),4upanga(Dharmashastra,Meemamsa,purana&Tharka Shastra).

Unit III

Modern Science and Indian Knowledge System-Indigenous Knowledge, Characteristics- Yoga and Holistic Health care-cases studies.

Unit IV

Protection of Traditional Knowledge: The need for protecting traditional knowledge -Significance of Traditional knowledge Protection-Role of government to harness Traditional Knowledge.

Unit V

**PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)**

Impact of Traditions: Philosophical Tradition (Sarvadarshan)
Nyaya, Vyshepec, Sankhya, Yog, Meemamsa, Vedantha, Chavanka,
Jain & Boudh - Indian Artistic Tradition - Chitra kala, Moorthikala,
Vasthu kala , Sthapthya, Sangeetha, Nruthya Yevam Sahithya

ESTIMATION, SPECIFICATIONS AND CONTRACTS

Course Category	Professional core	Course Code	19CE5T12
Course Type	Theory	L-T-P-C	3-0-0-3
Prerequisites	Building Planning & drawing	Internal Assessment Semester End Examination Total Marks	30 70 100

COURSE OBJECTIVES

1	Understand the quantity calculations of different components of the buildings.
2	Understand the rate analysis of different quantities of the buildings components.
3	Learn various specifications and components of the buildings.
4	To study estimation of buildings including R.C.C. members.
5	To study rate analysis.

COURSE OUTCOMES

Upon successful completion of the course, the student will be able to:

CO1	Explain the basic concept of quantity estimation for building, roads, canals and hydraulic structures by manual and software packages.
CO2	Calculate rate analysis and man-hours required for the common civil works by manual and software packages.
CO3	Develop the specification for the materials used in construction and preparing reports
CO4	Develop construction contracts and contract document preparation.
CO5	Identify the valuation for building, land and plant and machineries, calculation of rent, mortgage and lease.

Contribution of Course Outcomes towards achievement of program

Outcomes (1 - Low, 2- Medium, 3-High)

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
CO1	3	3	3	3	3	3	2	3	2	3	3	3	3	3	3
CO2	3	2	3	3	3	3	2	3	2	3	3	3	3	3	3

CO4	3	1	1	3	1	3	2	3	2	2	2	3	3	3	3
CO5	3	2	2	3	3	3	2	3	2	2	2	3	3	3	3

PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

COURSE CONTENT	
UNIT-I	QUANTITY ESTIMATION: Philosophy – Purpose – Methods of estimation – Types of estimates – Approximate estimates Detailed estimate – Estimation of quantities for buildings, roads, canals and hydraulic structures using computer software's.
UNIT-II	RATE ANALYSIS AND COSTING: Standard Data – Observed Data – Schedule of rates – Market rates – Assessment of Man Hours and Machineries for common civil works – Rate Analysis – Cost Estimates using Computer software's.
UNIT-III	SPECIFICATIONS, REPORTS AND TENDERS: Specifications – Detailed and general specifications – Constructions – Sources – Types of specifications – Principles for report preparation – Report on estimate of residential building Culvert – Roads - TTT Act 2000 – Tender notices – Types – Tender procedures – Drafting model tenders , E-tendering- Digital signature certificates- Encrypting -Decrypting – Reverse auctions.
UNIT-IV	CONTRACTS: Contract – Types of contracts – Formation of contract – Contract conditions – Contract for labour, Material, Design, Construction – Drafting of contract documents based on IBRD / MORTH Standard bidding documents – Construction contracts – Contract problems – Arbitration and legal requirements.
UNIT-V	VALUATION: Definitions – Various types of valuations – Valuation methods – Valuation of land – Buildings Valuation of plant and machineries - Calculation of Standard rent – Mortgage – Lease.

TEXT BOOKS	
1.	B.N Dutta 'Estimating and Costing in Civil Engineering', UBS Publishers & Distributors (P) Ltd, 2010.
2.	B.S. Patil, 'Civil Engineering Contracts and Estimates', University Press, 2006.

DESIGN & DETAILING OF REINFORCED CONCRETE STRUCTURES

Course Category	Professional Core	Course Code	19CE5T13
Course Type	Theory	L-T-P-C	3-0-0-3
Prerequisites	Concrete Technology & Strength of materials.	Internal Assessment	30
		Semester End Examination	70
		Total Marks	100

COURSE OBJECTIVES	
1	The student can gain the knowledge about the behavior of reinforced concrete elements and load transferring system.
2	Familiarize students with different types of design philosophies and with concepts of design of flexural members.
3	Understand the concepts of Shear, Torsion and Bond.
4	Familiarize students with different types of Compression members and their Designs. Understand different types of footings and their Design.
5	Familiarize students with different types of Slabs and their Designs. To gain knowledge about different types of loads on structures and different codes of practice.

COURSE OUTCOMES	
Upon successful completion of the course, the student will be able to:	
CO1	Identify the methods which are suitable for particular structures.
CO2	Carryout analysis and design of flexural members and detailing.
CO3	Decipher concepts of Shear, Torsion and Bond.
CO4	Design the Short and Long columns with desirable loading conditions. Determine the dimensions of the footing with desirable loading conditions.
CO5	Design the Slabs with desirable loading conditions.

Contribution of Course Outcomes towards achievement of program															
Outcomes (1 - Low, 2- Medium, 3-High)															
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
CO1	2	2	3	--	1	1	--	--	--	--	2	--	3	1	1
CO2	2	2	3	--	1	1	--	--	--	--	2	--	3	1	1
CO3	2	2	3	--	1	1	--	--	--	--	2	--	3	1	1
CO4	2	2	3	--	1	1	--	--	--	--	2	--	3	1	1
CO5	2	2	3	--	1	1	--	--	--	--	2	--	3	1	1

PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

COURSE CONTENT	
UNIT-I	<p>INTRODUCTION: Working stress method design codes and handbooks, Loading standards – Dead, live, wind and earthquake loads, Elastic theory, Design constants, Modular ratio, Neutral axis depth and Moment of resistance, Balanced, Under-reinforced and Over-reinforced sections, Working stress method of design for singly and doubly reinforced beams.</p> <p>LIMIT STATE DESIGN: Concepts of limit state design – Basic statistical principles – Characteristic loads –Characteristic strength – Partial load and safety factors – Representative stress-strain curves for cold worked deformed bars and mild steel bars. Assumptions in limit state design – Stress-block parameters – limiting moment of Resistance.</p>
UNIT-II	<p>DESIGN FOR FLEXURE: Limit state analysis and design for singly reinforced sections-effective depth- Moment of Resistance- Doubly reinforced beams - Flanged (T and L) beam sections- Minimum depth for a given capacity- Limiting Percentage of Steel- Minimum Tension Reinforcement-Maximum Flexural Steel- Design of Flanged Sections (T&L)- Effective width of flange –Behaviour- Analysis and Design.</p>
UNIT-III	<p>DESIGN FOR SHEAR, TORSION AND BOND: Limit state analysis and design of section for shear and torsion – concept of bond, anchorage and development length, I.S. code provisions. Design examples in simply supported and continuous beams, detailing.</p> <p>LIMIT STATE DESIGN FOR SERVICEABILITY: Deflection, cracking and code provision, Design of formwork for beams and slabs.</p>
UNIT-IV	<p>DESIGN OF COMPRESSION MEMBERS: Effective length of a column, Design of short and long columns – under axial loads, Uni-axial bending and biaxial bending – Braced and Un-braced columns – I S Code provisions.</p> <p>FOOTINGS: Different types of footings – Design of isolated and combined footings - rectangular and circular footings subjected to axial loads, Uni-axial and bi-axial bending moments.</p>
UNIT-V	<p>SLABS: Classification of slabs, Design of one - way slabs, two - way slabs and continuous slabs using IS Coefficients (conventional), Design of waist-slab staircase.</p>

NOTE: All the designs should teach in Limit State Method. Following plates should be prepared by the students.

1. Reinforcement particulars of T-beams and L-beams.
2. Reinforcement detailing of Continuous beams.
3. Reinforcement particulars of Columns and Footings.
4. Detailing of One way, Two way and Continuous slabs.

INTERNAL EXAMINATION PATTERN:

The total internal marks (40) are distributed in two components as follows:

1. Descriptive (subjective type) examination: 30marks.

PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

2. Assignment: 10marks

FINAL EXAMINATION PATTERN:

The end examination paper should consist of Part A and Part B. part A consist of two questions in Design and Detailing, out of which one question is to be answered. Part B should consist of five questions and out of which three questions to be answered. Weightage for Part – A is 40% and Part- B is 60%.

TEXT BOOKS	
1.	Limit State Design by B.C. Punmia, Ashok Kumar Jain and Arun Kumar Jain, Laxmi, publications Pvt. Ltd., New Delhi.
2.	Reinforced concrete design by S. Unnikrishna Pillai & Devdas Menon, TataMc.Graw Hill, NewDelhi.
REFERENCE BOOKS	
1.	Fundamentals of Reinforced concrete design by M.L. Gambhir, Printice Hall of India Private Ltd., NewDelhi.
2.	Reinforced concrete structural elements – behaviour, Analysis and design by P.Purushotham, Tata Mc.Graw-Hill, 1994.
3.	Design of concrete structures – Arthus H.Nilson, David Darwin, and Chorles W. Dolar, Tata Mc.Graw-Hill,3rd Edition,2005.
4.	Reinforced concrete structures, Vol.1, by B.C.Punmia, Ashok Kumar Jain andArun Kumar Jain, Laxmi, publications Pvt.Ltd., NewDelhi.
5.	Reinforced concrete structures – I.C. Syal&A.K.Goel, S.ChandPublishers.
6.	Limit state designed of reinforced concrete – P.C.Varghese, Printice Hall ofIndia, New Delhi.
7.	Fundamentals of reinforced concrete by N.C. Sinha and S.K Roy, S. Chandpublishers.
8.	Reinforced concrete design by N. Krishna Raju and R.N. Pranesh, Newage International Publishres, New Delhi.

GEOTECHNICAL ENGINEERING - I

Course Category	Professional core	Course Code	19CE5T14
Course Type	Theory	L-T-P-C	3-0-0-3
Prerequisites	Engineering Mechanics.	Internal Assessment	30
		Semester End Examination	70
		Total Marks	100

COURSE OBJECTIVES

1	To enable the knowledge in formation of soil, notations and their relationships.
2	To understand the classification of soil and their properties.
3	To enable the concepts of effective stresses and compaction of soils.
4	To enunciate the concept of permeability and seepage through soils for better understanding the discharge through different types of soils.
5	To understand the distribution of stresses in soils and their methods.

COURSE OUTCOMES

Upon successful completion of the course, the student will be able to:

CO1	Define the formation of soil, notations and their relationships.
CO2	Compute and Analyze different classifications and properties of soil.
CO3	Determine the effective stresses in the soil and compaction parameters of soils.
CO4	Determine the permeability and seepage analysis of the soil.
CO5	Determine the stress distribution in soils under different loading conditions.

Contribution of Course Outcomes towards achievement of program

Outcomes (1 - Low, 2- Medium, 3-High)

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
CO1	2	3	2	2	3	2	1	1	1	1	2	3	3	3	2

CO4	2	3	3	2	2	1	1	1	1	1	2	3	2	2	3
CO5	3	3	2	2	2	1	1	1	1	1	1	3	2	3	2

COURSE CONTENT

UNIT-I	BASIC DEFINITIONS AND RELATIONSHIPS: Definition of soil - soil mechanics - soil engineering and geotechnical engineering, scope of soil engineering, origin of soils, formation of soils-clay mineralogy, transportation of soils,
---------------	--

PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

	phase diagram- volumetric relationship, volume mass relation, volume - weight relationship, water content determination, specific gravity of soil solids determination - Field density determination.
UNIT-II	INDEX PROPERTIES AND CLASSIFICATION OF SOIL: Sieve analysis - sedimentation analysis, particle size distribution curve, relative density, plasticity characteristic of soil - consistency limits - consistency indices, particle size classification - Unified, AASHTO, IS classification.
UNIT-III	EFFECTIVE STRESS: Effective stress principles - Spring analogy model - Effect of water table fluctuations on effective stresses under different conditions - Seepage pressure, quick sand condition, failures of hydraulics structures by piping and their preventive measures. COMPACTION: Introduction to compaction, Factors affecting compaction, Effect of compaction on properties of soil, Methods of compaction – laboratory and field tests, Relative compaction, Suitability of various methods of compaction.
UNIT-IV	PERMEABILITY AND SEEPAGE ANALYSIS: Capillary phenomena – Permeability interaction – Hydraulic conductivity – Darcy’s law – Determination of Hydraulic Conductivity – Laboratory Determination (Constant head and falling head methods) and field measurement, pumping out aquifers – Factors influencing permeability of soils – Seepage - Two dimensional flow – Laplace’s equation – flow nets – Seepage analysis for sheet pile and weir.
UNIT-V	STRESS DISTRIBUTION: Stress distribution in homogeneous and isotropic medium – Boussinesq theory, westergaards theory – (Point load, Line load and udl) isobar, Use of Newmarks influence chart.

STRUCTURAL ANALYSIS - II

Course Category	Professional Core	Course Code	19CE5T15
Course Type	Theory	L-T-P-C	3-0-0-3
Prerequisites	Structural Analysis-I	Internal Assessment	30
		Semester End Examination	70
		Total Marks	100

COURSE OBJECTIVES	
1	Familiarize Students with Different types of Structures.
2	Equip student with concepts of Arches.
3	Understand Concepts of lateral Load analysis.
4	Familiarize Cables and Suspension Bridges.
5	Understand Analysis methods Moment Distribution, Kani's Method and Matrix methods.

COURSE OUTCOMES	
Upon successful completion of the course, the student will be able to:	
CO1	Differentiate Determinate and Indeterminate Structures of Arches.
CO2	Carryout lateral Load analysis of structures.
CO3	Analyze Cable and Suspension Bridge structures.
CO4	Analyze structures by using Moment Distribution Method & Kani's method.
CO5	Analyze structures by using Matrix Methods.

COURSE CONTENT	
UNIT-I	ARCHES: Arches - Types of arches – Analysis of three hinged, two hinged and fixed arches -

**PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)**

	Parabolic and circular arches – Settlement and temperature effects -Eddy’s theorem.
UNIT-II	CABLE STRUCTURES AND SUSPENSION BRIDGES: Equilibrium of cable – length of cable - anchorage of suspension cables, analysis of cables subjected to concentrated and uniformly distributed loads, temperature stresses, analysis of simple suspension bridge, three hinged and two hinged stiffening girder suspension bridges.
UNIT-III	MOMENT DISTRIBUTION METHOD: Stiffness - distribution and carry over factors – Analysis of continuous Beams - Plane rigid frames with and without sway – Support settlement - Symmetric frames with symmetric and skew - Symmetric loading.
UNIT-IV	FLEXIBILITY METHOD: Primary structures - Compatibility conditions – Formation flexibility matrices - Analysis of Indeterminate pin - jointed plane frames, continuous beams and rigid jointed plane frames by direct flexibility approach.
UNIT-V	STIFFNESS METHOD: Restrained structure – Formation of stiffness matrices - equilibrium condition - Analysis of Continuous Beams, Pin-jointed plane frames and rigid frames by direct stiffness method.

TEXT BOOKS	
1.	‘Structural Analysis’ by T.S. Thandavamoorthy, Oxford university press, India.

RAILWAYS, AIRPORTS AND SEAPORTS

Course Category	Professional Core	Course Code	19CE5T16
Course Type	Theory	L-T-P-C	3-0-0-3
Prerequisites	Highway Engineering	Internal Assessment	30
		Semester End Examination	70

**PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)**

		Total Marks	100
--	--	--------------------	-----

COURSE OBJECTIVES	
1	To know various components and their functions in a railway track.
2	To acquire design principles of geometrics in a railway track.
3	To know various techniques for the effective movement of trains.
4	To acquire design principles of airport geometrics and pavements.
5	To know the planning, construction and maintenance of Docks and Harbours.
6	To know about the fundamental of airways.
7	To know about the different fundamental components of harbours and docks.

COURSE OUTCOMES	
Upon successful completion of the course, the student will be able to:	
CO1	Explain the various concepts in railway design and components of railway track.
CO2	Analyze the construction process, maintenance and operation of railway track.
CO3	List out the various components of airports, planning concepts and air traffic controls.
CO4	Evaluate the design of airport, cost estimation and geometric design of airports.
CO5	List out the various terms in harbour engineering and its classification.

Contribution of Course Outcomes towards achievement of program															
Outcomes (1 - Low, 2- Medium, 3-High)

COURSE CONTENT

PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

UNIT-I	<p>COMPONENTS OF RAILWAY ENGINEERING: Permanent way components – Railway Track Gauge - Cross Section of Permanent Way - Functions of various Components like Rails, Sleepers and Ballast – Rail Fastenings – Creep of Rails- Theories related to creep – Adzing of Sleepers- Sleeper density – Rail joints.</p> <p>GEOMETRIC DESIGN OF RAILWAY TRACK: Alignment – Engineering Surveys - Gradients- Grade Compensation- Cant and Negative Super elevation- Cant Deficiency – Degree of Curve – safe speed on curves – Transition curve – Compound curves – Reverse curves – Extra clearance on curves – widening of gauge on curves – vertical curves – cheek rails on curves.</p>
UNIT-II	<p>TURNOUTS & CONTROLLERS: Track layouts – Switches – Design of Tongue Rails – Crossings – Turnouts – Layout of Turnout – Double Turnout – Diamond crossing – Scissors crossing, Signal Objectives – Classification – Fixed signals – Stop signals – Signaling systems – Mechanical signaling system – Electrical signaling system – System for Controlling Train Movement – Interlocking – Modern signaling Installations.</p>
UNIT-III	<p>AIR TRANSPORTATION SYSTEM: Development of air transportation system with particular reference to India; Aero plane components; Air–craft characteristics. Airport Planning & Design: Airport Master plan – Airport site selection – Air craft characteristics – Zoning laws – Airport classification – Runway orientation – Wind rose diagram – Runway length – Taxiway design – Terminal area and Airport layout – Visual aids and Air traffic control.</p>
UNIT-IV	<p>RUNWAY DESIGN: Various Design factors – Design methods for Flexible pavements – Design methods for Rigid pavements – LCN system of Pavement Design – Airfield Pavement Failures – Maintenance and Rehabilitation of Airfield pavements– Airport Drainage – Design of surface and subsurface drainage.</p>
UNIT-V	<p>WATER TRANSPORTATION:</p> <p>Types of water transportation; advantages and disadvantages of water transportation. Planning, Layout, Construction & Maintenance Of Docks & Harbours: Classification of ports - Requirement of a good port – classification of Harbours – Docks - Dry & wet docks – Transition sheds and workhouses – Layouts; Quays – construction of Quay walls – Wharves</p> <p>Jetties – Fender systems .Tides - Tidal data and Analysis – Break waters – Dredging – Maintenance of Ports and Harbours – Navigational aids.</p>

GEOTECHNICAL ENGINEERING LABORATORY

Course Category	Professional core	Course Code	19CE5L04
Course Type	Laboratory	L-T-P-C	0-0-3-1.5
Prerequisites	-----	Internal Assessment	30
		Semester End Examination	70
		Total Marks	100

COURSE OBJECTIVES

1	To impart knowledge of determination of index properties required for classification of soils.
2	To teach how to determine compaction characteristics and consolidation behavior from relevant lab tests; to determine permeability of soils.
3	To teach how to determine shear parameters of soil through different laboratory tests.

PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

COURSE OUTCOMES	
Upon successful completion of the course, the student will be able to:	
CO1	Determine the dry density of field and OMC.
CO2	Examining the rate of Permeability of soil.
CO3	Identify the type of soil existing in field.
CO4	Evaluate the shear strength parameters from field and laboratory.

Contribution of Course Outcomes towards achievement of program															
Outcomes (1 - Low, 2- Medium, 3-High)															
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
CO1	2	--	3	--	--	--	--	--	--	--	2	--	3	--	2
CO2	2	--	3	--	--	--	--	--	--	--	2	--	3	--	2
CO3	2	3	3	--	--	--	--	--	--	--	2	--	3	--	2
CO4	2	--	3	--	--	--	--	--	--	--	2	--	3	--	2
CO5	2	--	3	--	--	--	--	--	--	--	2	--	3	--	2

S NO	LIST OF EXPERIMENTS
1	Determination of Specific gravity of soil solids, G_s . (IS-2720-Part 3-1980)
2	Determination of soil Atterberg's Limits. (IS-2720-Part 5-1985)
3	Determination of Field density by Core cutter and Sand replacement methods. (IS-2720-Part 28-1974)
4	Determination of soil Grain size analysis by sieving. (IS-2720-Part 4-1985)
5	Determination of soil Grain size analysis by hydrometer analysis. (IS-2720-Part 4-1985)
6	Determination of Permeability of soil - Constant head test & Variable head test. (IS-2720-Part 17-1986).
7	Determination of dry density and OMC by using Compaction test. (IS-2720-Part 8-1983)
8	Determination of coefficient of consolidation. (IS-8009-Part 1-1976)
9	Determination of Shear strength parameters by using box shear test. (IS-2720-Part 13-1986)
10	Determination of Shear strength parameters by using tri-axial (UU test). (IS-2720-Part 11-1993)
11	Determination of Shear strength parameters by using Vane Shear test. (IS-4434-Part 3-1978)
12	Determination of CBR Value. (IS-2720-Part 16-1979)

*Note: At least 10 Experiments has to be completed

S NO.	LIST OF EQUIPMENTS
1.	Casagrande's liquid limit apparatus.
2.	Apparatus for plastic and shrinkage limits
3.	Field density apparatus for Core cutter method.

**PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)**

4.	Sand replacement testing setup.
5.	Set of sieves: 4.75 mm, 2 mm, 1 mm, 0.6 mm, 0.425 mm, 0.3 mm, 0.15 mm, and 0.075 mm.
6.	Hydrometer apparatus.
7.	Permeability apparatus for Constant head test and Variable head test
8.	Apparatus for Compaction test.
9.	Apparatus for Consolidation test.
10.	Apparatus for Tri-axial test.
11.	Apparatus for Vane shear test.
12.	Apparatus for CBR test.
13.	Apparatus for Box shear test
14.	Air-dry oven

TEXT BOOKS	
1.	Gopal Ranjan and Rao, A.S.R., “Basic and Applied Soil Mechanics”, New Age Ltd. International Publisher New Delhi (India) 2006.
2.	“Soil Mechanics - Laboratory manual” by Braja M. Das 6 th Edition
REFERENCE BOOKS	
1.	Murthy, V.N.S., “Soil Mechanics and Foundation Engineering”, CBS Publishers Distribution Ltd., New Delhi. 2015
2.	IS Code 2720 – relevant parts

CONCRETE TECHNOLOGY LABORATORY

Course Category	Professional Core	Course Code	19CE5L06
Course Type	Laboratory	L-T-P-C	0-0-3-1.5
Prerequisites	Concrete Technology	Internal Assessment	30
		Semester End Examination	70
		Total Marks	100

COURSE OBJECTIVES	
1	To impart the various testing methods, testing procedures and properties of cement.
2	To impart the various testing methods to determine the basic properties of concrete ingredients.
3	To learn various fresh and hardened properties of concrete.

**PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)**

COURSE OUTCOMES	
Upon successful completion of the course, the student will be able to:	
CO1	Find the properties of bricks and cement.
CO2	Determine the properties of aggregates.
CO3	Identify the properties of concrete

Contribution of Course Outcomes towards achievement of program															
Outcomes (1 - Low, 2- Medium, 3-High)															
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
CO1	3	--	3	--	--	2	--	--	--	--	2	--	2	3	3
CO2	3	--	3	--	--	2	--	--	--	--	2	--	2	3	3
CO3	3	--	3	--	--	2	--	--	--	--	2	--	2	3	3

S NO.	LIST OF EXPERIMENTS
1	Determination of normal Consistency and fineness of cement. (IS-4031 Part-I & IV 1988)
2	Determination of initial setting time and final setting time of cement. (IS-4031 Part-V 1988)
3	Determination of specific gravity and soundness of cement. (IS-4031 Part-II & III 1988)
4	Determination of compressive strength of cement. (IS-4031 Part-VI 1988)
5	Determination of grading and fineness modulus of fine aggregate and coarse aggregate by sieve analysis. (IS-383 - 1970)
6	Determination of specific gravity of coarse aggregate. (IS-2386 Part-III 1963)
7	Determination of bulking of sand. (IS-2386 Part-III 1963)
8	Determination of workability of concrete by compaction factor method. (IS-1199 – 1959, SP 23 - 1982)
9	Determination of workability of concrete by slump test. (IS-7320 – 1974, IS 1199 – 1959, SP 23 - 1982)
10	Determination of workability of concrete by Vee-bee test. (IS 456 – 2000, IS 1199 - 1959, IS 10510 – 1983)
11	Determination of compressive strength of concrete and its young's modulus. (IS 516 – 1959, IS 1199 - 1959, SP 23 – 1982 IS 10086 - 1982)

NOTE: At least 10 experiments must be conducted (at least one for each property).

S NO.	LIST OF EQUIPMENTS
1	Standard set of sieves for coarse aggregate and fine aggregate.
2	Vicat's apparatus.
3	Specific gravity bottle.
4	Lechatlier's apparatus.
5	Slump Test Apparatus.

**PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)**

6	Compaction Factor Test Apparatus.
7	Vee - Bee test apparatus.
8	Universal testing Machine (UTM) / Compression Testing Machine (CTM).

TEXT BOOKS

GEODESY LABORATORY-II LABORATORY

Course Category	Professional Core	Course Code	19CE5L07
Course Type	Laboratory	L-T-P-C	0-0-3-1.5
Prerequisites	Geodesy & Geodesy Laboratory-I	Internal Assessment	30
		Semester End Examination	70
		Total Marks	100

COURSE OBJECTIVES

1	To perform various methods of linear and angles measurements by Using Theodolite.
2	To perform various methods for finding distances by using Theodolite
3	To introduce the students to basic principles of Total station.
4	To enable the students to use Total station.

**PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)**

5	To integrate the knowledge of measuring remote heights.
----------	---

COURSE OUTCOMES	
Upon successful completion of the course, the student will be able to:	
CO1	Understand fundamentals about Theodolite instrument
CO2	Identify the distance between two inaccessible points
CO3	Calculating vertical distance problems by tachometric principles
CO4	Explain modern instruments in surveying.
CO5	Find errors in the field by using total station

Contribution of Course Outcomes towards achievement of program															
Outcomes (1 - Low, 2- Medium, 3-High)															
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3

S NO	LIST OF EXPERIMENTS
1	Theodolite Survey: Determining the Horizontal and Vertical Angles by the method of repetition method.
2	Theodolite Survey: Finding the distance between two inaccessible points.
3	Theodolite Survey: Finding the height of far object.
4	Tachometric survey: Heights and distance problems using tachometric principles.
5	One Exercise on Curve setting.
6	One Exercise on contours.
7	Total Station: Introduction to total station and practicing setting up, leveling up and elimination of parallax error.
8	Total Station: Determination of area using total station.
9	Total Station :Traversing
10	Total Station :Contouring
11	Total Station: Determination of Remote height.
12	Total Station: distance between two inaccessible points.

S. NO.	LIST OF EQUIPMENTS
1	Theodolite
2	Total station

WATER SUPPLY & WASTE WATER ENGINEERING

Course Category	Professional core	Course Code	19CE6T19
Course Type	Theory	L-T-P-C	3-0-0-3
Prerequisites	Basic Chemistry & Fluid Mechanics	Internal Assessment	30
		Semester End Examination	70
		Total Marks	100

COURSE OBJECTIVES	
1	Develop the ability to apply basic understanding of physical, chemical, and biological phenomena for successful design, operation and maintenance of sewage treatment plants.
2	Provide knowledge of characterization of wastewater generated in a community.
3	Impart understanding of treatment of sewage and the need for its treatment.
4	Summarize the appurtenance in sewerage systems and their necessity.
5	Effluent disposal method and realize the importance of regulations in the disposal of effluents in rivers.

COURSE OUTCOMES	
Upon successful completion of the course, the student will be able to:	
CO1	Classify sources of water and their characteristics
CO2	Identify various water treatment methods and know about their functions
CO3	Interpreting the design of sewers and plumbing systems
CO4	Examine the effects and primary treatment of sewage
CO5	Examine the effects of advance treatment technology and reuse of sewage

Contribution of Course Outcomes towards achievement of program															
Outcomes (1 - Low, 2- Medium, 3-High)

PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

COURSE CONTENT	
UNIT-I	SOURCES OF WATER Public water supply system – Planning, Objectives, Design period, Population forecasting; Water demand – Sources of water and their characteristics, Surface and Groundwater – Impounding Reservoir – Development and selection of source – Source Water quality – Characterisation – Significance – Drinking Water quality standards.
UNIT-II	WATER TREATMENT Objectives – Unit operations and processes – Principles, functions, and design of water treatment plant units, aerators of flash mixers, Coagulation and flocculation – Clarifloccuator - Plate and tube settlers - Pulsator clarifier - sand filters - Disinfection - Residue Management –Construction, Operation and Maintenance aspects.
UNIT-III	PLANNING AND DESIGN OF SEWERAGE SYSTEM Characteristics and composition of sewage - population equivalent -Sanitary sewage flow estimation – Sewer materials – Hydraulics of flow in sanitary sewers – Sewer design - Storm runoff estimation – sewer appurtenances – sewage pumping-drainage in buildings-plumbing systems for drainage- Discharge standards for Effluents.
UNIT-IV	PRIMARY TREATMENT OF SEWAGE Objectives – Unit Operations and Processes – Selection of treatment processes -- Onsite sanitation - Septic tank- Primary treatment – Principles, functions and design of sewage treatment units - screens - grit chamber-primary sedimentation tanks –Operation and Maintenance aspects.
UNIT-V	SECONDARY TREATMENT OF SEWAGE Objectives – Selection of Treatment Methods – Principles, Functions, - Activated Sludge Process and Extended aeration systems –Rotating biological contactors -Trickling filters Waste Stabilization Ponds – Operation and Maintenance

GEOTECHNICAL ENGINEERING - II

Course Category	Professional core	Course Code	19CE6T20
Course Type	Theory	L-T-P-C	3-0-0-3
Prerequisites	Geotechnical engineering-I	Internal Assessment	30
		Semester End Examination	70
		Total Marks	100

COURSE OBJECTIVES

1	Able to learn the consolidation settlements.
2	To understand the concepts of shear strength, stresses induced and to determine various parameters.
3	To determine the magnitude and line of action of lateral earth pressure.
4	To impart knowledge to plan and execute a detail site investigation program.
5	To learn about stability of the slopes in different conditions.

COURSE OUTCOMES

Upon successful completion of the course, the student will be able to:

CO1	Determine the degree of consolidation of soil.
CO2	Determine the shear strength parameters of soil.
CO3	Design different types of retaining walls.
CO4	Interpret the soil conditions from soil exploration.
CO5	Selecting an appropriate slope stability analysis method for a given slope.

Contribution of Course Outcomes towards achievement of program

Outcomes (1 - Low, 2- Medium, 3-High)

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
CO1	2	3	3	3	1	1	1	2	1	1	1	3	3	2	3
CO2	2	3	3	3	1	1	1	2	1	2	1	3	2	3	2
CO3	2	3	3	3	1	1	1	2	1	1	2	3	2	3	2
CO4	3	3	3	3	1	1	1	1	1	1	2	3	2	3	3
CO5	3	3	3	3	1	1	1	2	1	1	2	3	2	3	3

COURSE CONTENT

UNIT-I	<p>CONSOLIDATION: Compressibility of soils – e-p and e-log p curves – Stress history – Concept of consolidation - Spring Analogy - Terzaghi's theory of one-dimensional Consolidation – Time rate of consolidation and degree of consolidation – Determination of coefficient of consolidation (C_v) – Over consolidated and normally consolidated clays.</p>
---------------	---

PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

UNIT-II	SHEAR STRENGTH: Shear strength of cohesive and cohesionless soils – Mohr-Coulomb failure theory – Measurement of shear strength - Direct shear, Triaxial compression, UCS and Vane shear tests – Pore pressure parameters – Cyclic mobility – Liquefaction.
UNIT-III	EARTH RETAINING STRUCTURES: Rankine’s & Coulomb’s theory of earth pressure – Culmann’s graphical method - earth pressures in layered soils, Earth pressure at rest, Jaky’s formula
UNIT-IV	SITE INVESTIGATION AND SELECTION OF FOUNDATION: Scope and objectives – Methods of exploration – Auguring and boring – Wash boring and rotary drilling – Depth and spacing of bore holes – Soil samples – Representative and undisturbed samples – Sampling methods – Split spoon sampler, Thin wall sampler, Stationary piston sampler – Penetration tests (SPT, CPT) – Data interpretation - Selection of foundation based on soil condition- Bore log report.
UNIT-V	STABILITY OF SLOPES: Infinite and finite earth slopes in sand and clay – types of failures – factor of safety of infinite slopes – stability analysis by Swedish arc method, standard method of slices – Taylor’s Stability Number, Stability of slopes of dams and embankments.

TEXT BOOKS

1.	‘Principles of Foundation Engineering’ by Das, B.M., - (2011) –6th edition (Indian edition) Cengage learning.
2.	‘Basic and Applied Soil Mechanics’ by Gopal Ranjan & ASR Rao, New Age International Pvt. Ltd,(2004)

REFERENCE BOOKS

1.	‘Foundation Analysis and Design’ by Bowles, J.E., (1988) – 4th Edition, McGraw-Hill Publishing Company, Newyork.

DESIGN & DETAILING OF STEEL STRUCTURES

Course Category	Professional Core	Course Code	19CE6T21
Course Type	Theory	L-T-P-C	3-0-0-3
Prerequisites	Strength of Materials, Structural Analysis–I & Structural analysis–II.	Internal Assessment	30
		Semester End Examination	70
		Total Marks	100

COURSE OBJECTIVES

1	To introduce the students to limit state design of structural steel members subjected to compressive, tensile and bending loads, including connections.
2	To provide the students the tools necessary for designing structural systems such as roof trusses and gantry girders as per provisions of current code (IS 800 - 2007) of practice.

COURSE OUTCOMES

Upon successful completion of the course, the student will be able to:

CO1	Recognize the design philosophy of steel structures and identify the different failure modes of bolted and welded connections, and determine their design strengths.
CO2	Apply the principles, procedures and current code requirements to the analysis and design of steel tension members, columns, column bases and beams
CO3	Select the most suitable section shape and size for tension and compression members and beams according to specific design criteria.
CO4	Identify and compute the design loads on Industrial structures.
CO5	Find out ultimate load of steel beams and portal frames using plastic analysis.

Contribution of Course Outcomes towards achievement of program

Outcomes (1 - Low, 2- Medium, 3-High)

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3

PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

COURSE CONTENT	
UNIT-I	INTRODUCTION TO STRUCTURAL STEEL AND DESIGN OF CONNECTIONS: General -Types of Steel -Properties of structural steel - I.S. rolled sections - Concept of Limit State Design - Design of Simple and eccentric Bolted and welded connections - Types of failure and efficiency of joint.
UNIT-II	BEAMS: Design requirements as per IS Code - Design of laterally supported and unsupported beams - Design of built-up beams - Check for Deflection, Shear, Buckling, Bearing, laterally unsupported beams.
UNIT-III	TENSION AND COMPRESSION MEMBERS: Behavior and Design of simple and built-up members subjected to tension - Shear lag effect - Design of lug angles - tension splice - Behaviour of short and long columns - Euler's column theory-Design of simple and built-up compression members with lacing and battens - Design of column bases - slab base and gusseted base
UNIT-IV	DESIGN OF ROOF TRUSSES: Design of roof trusses – loads on trusses – Purlin design using angle and channel sections – truss design, Design of joints and end bearings.
UNIT-V	DESIGN OF PLATE GIRDER: Design consideration – IS Code recommendations Design of plate girder – Welded – Curtailment of flange plates, stiffeners – splicing and connections, Introduction to gantry girders.

TEXT BOOKS	
1.	“Design of steel structures” as per Limit State Method of Design by S.S.Bavakati, International Publishing House Pvt.Ltd.
2.	“Limit state Design of steel structures” by S. K. Duggal, Tata Mcgraw Hill, and New Delhi.
REFERENCE BOOKS	
1.	IS -800 – 2007, IS – 875
2.	Steel Tables. (These codes and steel tables are permitted to use in the examinations).
3.	“Steel Structures Design and Practice” by N. Subramanian, Oxford University Press.

WATER RESOURCE ENGINEERING-I

Course Category	Professional Core	Course Code	19CE6T22
Course Type	19CE6T22	L-T-P-C	3-0-0-3
Prerequisites	Hydraulics and Hydraulic Machinery	Internal Assessment	30
		Semester End Examination	70
		Total Marks	100

COURSE OBJECTIVES

1	To introduce hydrologic cycle and its relevance to Civil engineering.
2	Make the students understand physical processes in hydrology and, components of the hydrologic cycle.
3	Appreciate concepts and theory of physical processes and interactions.
4	Learn measurement and estimation of the components hydrologic cycle.
5	Provide an overview and understanding of Unit Hydrograph theory and its analysis.
6	Understand flood frequency analysis, design flood, flood routing.
7	Appreciate the concepts of groundwater movement and well hydraulics.
8	Learn overview of flood routing and its effects.
9	Has to be understood and identify the flood occurring areas nearby.

COURSE OUTCOMES

Upon successful completion of the course, the student will be able to:

CO1	Explain the theories and principles governing the hydrologic processes and list out the forms of precipitation in real conditions.
CO2	Apply key concepts to several practical areas of engineering hydrology and related design aspects.
CO3	Design major hydrologic components for a need based structures.
CO4	Estimate flood magnitude and carry out flood routing.
CO5	Demonstrate the recuperation test process in open wells.

Contribution of Course Outcomes towards achievement of program

Outcomes (1 - Low, 2- Medium, 3-High)

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3

CO4	3	2	2	2	2	2	--	--	--	--	1	--	1	--	2
CO5	3	2	2	2	1	2	--	--	--	--	1	--	1	--	2

PRAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

COURSE CONTENT	
UNIT-I	<p>INTRODUCTION: Engineering hydrology and its applications, Hydrologic cycle, hydrological data-sources of data. Precipitation: Types and forms, measurement, rain gauge network, presentation of rainfall data, average rainfall, continuity and consistency of rainfall data, Frequency of point rainfall, Rain fall data in India. Intensity-Duration-Frequency (IDF) curves, Depth-Area-Duration (DAD) curves, Probable Maximum Precipitation (PMP), design storm, problems on average rainfall on towns.</p>
UNIT-II	<p>ABSTRACTIONS FROM PRECIPITATION: Introduction, Initial abstractions. EVAPORATION: Factors affecting, measurement, reduction, Analytical methods of Evaporation estimation. EVAPOTRANSPIRATION: Factors affecting, measurement, control, Potential Evapotranspiration over India. INFILTRATION: Factors affecting, Infiltration capacity curve, measurement, Infiltration Indices. Problems on ϕ-Index and W-Index.</p>
UNIT-III	<p>RUNOFF: Catchment characteristics, Factors affecting runoff, components, computation- empirical formulae, tables and curves, stream gauging, rating curve, flow mass curve and flow duration curve. HYDROGRAPH ANALYSIS: Components of hydrograph, separation of base flow, effective rainfall hyetograph and direct runoff hydrograph, unit hydrograph, assumptions, derivation of unit hydrograph, unit hydrographs of different durations, principle of superposition and S- hydrograph methods, limitations and applications of unit hydrograph, synthetic unit hydrograph. Problems on unit hydrograph.</p>
UNIT-IV	<p>FLOODS: Causes and effects, frequency analysis - Gumbel's and Log-Pearson type III distribution methods, Standard Project Flood (SPF) and Probable Maximum Flood (MPF), flood control methods and management, Design flood, Design storm. FLOOD ROUTING: Hydrologic storage routing, channel and reservoir routing- Muskingum and Puls methods of routing, flood control in India. ADVANCED TOPICS IN HYDROLOGY: Rainfall-Runoff Modelling, Instantaneous Unit Hydrograph (IUH) - Conceptual models - Clark and Nash models, general hydrological models- Chow - Kulandaiswamy model.</p>
UNIT-V	<p>GROUNDWATER: Occurrence, types of aquifers, aquifer parameters, porosity, specific yield, specific capacity, permeability, transmissivity and storage coefficient, types of wells, well loss, Darcy's law, Dupuit's equation- steady radial flow to wells in confined and unconfined aquifers, yield of a open well-recuperation test.</p>

ENVIRONMENTAL ENGINEERING LABORATORY

Course Category	Professional Core	Course Code	19CE6L08
Course Type	Laboratory	L-T-P-C	0-0-3-1.5
Prerequisites	Water and Waste Water Engineering	Internal Assessment Semester End Examination Total Marks	30 70 100

COURSE OBJECTIVES

1	Estimation some important characteristics of water and wastewater in the laboratory.
2	It also gives the significance of the characteristics of the water and waste water.

COURSE OUTCOMES

Upon successful completion of the course, the student will be able to:

CO1	Perform the different laboratory techniques for examining the water quality parameters.
CO2	Perform the different laboratory techniques for examining the wastewater quality parameters.
CO3	Analyze the laboratory data and comment with respect to permissible limits and field conditions.

Contribution of Course Outcomes towards achievement of program

Outcomes (1 - Low, 2- Medium, 3-High)

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
CO1	3	2	2	3	2	1	1	--	1	1	1	--	2	2	2
CO2	2	3	3	2	1	1	1	--	1	1	1	--	1	2	2
CO3	2	3	3	2	1	1	1	--	1	1	1	--	1	2	2

S NO	LIST OF EXPERIMENTS
1	Determination of pH and Electrical Conductivity (Salinity) of Water and Soil.
2	Determination and estimation of Total Hardness–Calcium & Magnesium.
3	Determination of Alkalinity/Acidity.
4	Determination of Chlorides in water and soil.
5	Determination and Estimation of total solids, organic solids and inorganic solids and settle able solids by Imhoff Cone.
6	Determination of Dissolved Oxygen with D.O. Meter & Winklers Method.
7	Physical parameters – Temperature, Colour, Odour, Turbidity, Taste.
8	Determination of B.O.D and C. O. D.
9	Determination of Optimum coagulant dose.
10	Determination of Chlorine demand.

TRANSPORTATION ENGINEERING LABORATORY

Course Category	Professional Core	Course Code	19CE6L09
Course Type	Practical	L-T-P-C	0-0-3-1.5
Prerequisites	Highway Engineering	Internal Assessment	30
		Semester End Examination	70
		Total Marks	100

COURSE OBJECTIVES

1	To study the properties and judge the suitability to use as road materials.
2	To study the properties and stability requirements of the Bitumen mixes.
3	To carry out surveys for traffic volume, speed and parking.

COURSE OUTCOMES

Upon successful completion of the course, the student will be able to:

CO1	Explain the bitumen nature and their quality behavior.
CO2	Utilize aggregate and bitumen properties in pavement design.
CO3	Determine the suitability of materials for the road construction.
CO4	Determine the traffic volume, speed and parking characteristics.
CO5	Predict the optimum bitumen content for the mix Design and mix proportions of the bitumen mixes.

Contribution of Course Outcomes towards achievement of program

COMPUTER AIDED ENGINEERING DRAWING LABORATORY

Course Category	Professional Core	Course Code	19CE6L10
Course Type	Laboratory	L-T-P-C	0-0-3-1.5
Prerequisites	Building planning & Drawing	Internal Assessment	30
		Semester End Examination	70
		Total Marks	100

COURSE OBJECTIVES

1	To introduce computer aided drafting packages and commands for modelling and sketching.
2	To draw the geometric entities and create 2D and 3D wire frame models.

COURSE OUTCOMES

Upon successful completion of the course, the student will be able to:

CO1	Use the software packers for drafting and modeling
CO2	Create 2D and 3D models of Engineering Components
CO3	Draw objects using AUTOCAD

Contribution of Course Outcomes towards achievement of program

Outcomes (1 - Low, 2- Medium, 3-High)

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3

FOUNDATION ENGINEERING

Course Category	Professional core	Course Code	19CE7T33
Course Type	Theory	L-T-P-C	3-0-0-3
Prerequisites	Geotechnical engineering I & II	Internal Assessment	30
		Semester End Examination	70
		Total Marks	100

COURSE OBJECTIVES	
1	To acquire the knowledge of shallow foundation and their bearing capacities.
2	Learning about types and purposes of different foundation systems and structures.
3	To provide students with exposure to the standard methods of designing foundation.
4	To discuss and evaluate the feasibility of foundation solutions to different types of soil conditions considering the time effect of soil behavior.
5	To build the necessary theoretical background for design and construction of foundation system.

COURSE OUTCOMES	
Upon successful completion of the course, the student will be able to:	
CO1	Determine safe bearing capacity for design of buildings.
CO2	Identify a suitable foundation system for a structure.
CO3	Analyze and design pile foundations.
CO4	Demonstrate an ability to analysis and design of well foundation
CO5	Evaluate the importance of raft foundation and principles of design for buildings and tower structures.

Contribution of Course Outcomes towards achievement of program															
Outcomes (1 - Low, 2- Medium, 3-High)															
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3

RAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

COURSE CONTENT	
UNIT-I	FOUNDATION DESIGN BASICS: Criteria for choice of foundation, bearing capacity, total and differential settlements, tolerance for various types of structures, Interpretation of soil profile from design parameters like modulus of compressibility, Modulus of subgrade reaction, Poisson's ratio, etc
UNIT-II	SHALLOW FOUNDATIONS – BEARING CAPACITY AND SETTLEMENT CRITERION: Types of foundations and factors to be considered in their location - Bearing capacity – criteria for determination of bearing capacity - Factors influencing bearing capacity – Analytical methods to determine bearing capacity – Terzaghi's theory, Meyerhof theory – IS Method. Safe bearing pressure based on N- value – allowable bearing pressure; safe bearing capacity and settlement from plate load test – Types of foundation settlements and their determination - allowable settlements of structures, Design of retaining wall.
UNIT-III	RAFT FOUNDATIONS: Raft foundations for building and tower structures, including effects of soil-structure interaction and nonlinearity, different types of rafts
UNIT-IV	DEEP FOUNDATIONS : Pile foundation-types, methods of installation, codal practices for permissible load under vertical and lateral loads, stresses during pile driving, load carrying capacity of pile groups, negative skin friction, under-reamed piles, Pile load test, equipment used for construction of foundation systems.
UNIT-V	WELL FOUNDATIONS: Types – Different shapes of wells – Components of well– functions – forces acting on well foundations - Design Criteria –Determination of staining thickness and plug - construction and Sinking of wells – Tilt and shift.

WATER RESOURCE ENGINEERING-II

Course Category	Professional Core	Course Code	19CE7T26
Course Type	Theory	L-T-P-C	3-0-0-3
Prerequisites	Water Resource Engineering-I	Internal Assessment	30
		Semester End Examination	70
		Total Marks	100

COURSE OBJECTIVES

1	To introduce the types and design of irrigation systems.
2	Discuss the relationships between soil, water and plant and their significance in planning an irrigation system.
3	Understand design methods of erodible and non-erodible canals.
4	Know the principles of design of hydraulic structures on permeable foundations.
5	Know the concepts for analysis and design principles of storage, diversion head works and canal structures.
6	Know about the major differences between super passage and Aqueduct.

COURSE OUTCOMES

Upon successful completion of the course, the student will be able to:

CO1	Demonstrate the irrigation types and methods.
CO2	Design principles of Unlined and Lined canals.
CO3	Estimate the life of reservoir and storage capacity.
CO4	Apply the concepts of Bligh's creep theory and Khosla's theory.
CO5	Apply the design principles of cross drainage works. Design of super passage and canal regulator.

Contribution of Course Outcomes towards achievement of program

Outcomes (1 - Low, 2- Medium, 3-High)

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
CO1	3	3	2	2	1	2	1	--	--	--	1	--	1	--	3
CO2	3	2	2	2	1	2	--	--	--	--	1	--	1	--	3

RAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

CO3	3	3	3	2	2	2	--	--	--	--	1	--	1	--	3
CO4	2	2	2	2	1	2	--	--	--	--	1	--	1	--	3
CO5	2	2	2	2	1	2	--	--	--	--	1	--	1	--	3

COURSE CONTENT

UNIT-I	<p>IRRIGATION: Necessity and importance, principal crops and crop seasons, types, methods of application, soil-water-plant relationship, soil moisture constants, consumptive use, estimation of consumptive use, crop water requirement, duty and delta, factors affecting duty, depth and frequency of irrigation, irrigation efficiencies, water logging and drainage, standards of quality for irrigation water, crop rotation.</p>
UNIT-II	<p>CANALS: Classification, design of non-erodible canals - methods of economic section and maximum permissible velocity, economics of canal lining, design of erodible canals – Kennedy’s silt theory and Lacey’s regime theory, balancing depth of cutting, design of lined canal.</p> <p>SPILLWAYS: Types, design principles of Ogee spillways, types of spillways crest gates. Energy dissipation below spillways-stilling basin and its appurtenances.</p>
UNIT-III	<p>RESERVOIR PLANNING: Investigations, site selection, zones of storage, yield and storage capacity of reservoir, reservoir sedimentation.</p> <p>DAMS: Types of dams, selection of type of dam, selection of site for a dam.</p> <p>GRAVITY DAMS: Forces acting on a gravity dam, causes of failure of a gravity dam, elementary profile and practical profile of a gravity dam, limiting height of a dam, stability analysis, drainage galleries, grouting.</p> <p>EARTH DAMS: Types, causes of failure, criteria for safe design, seepage, measures for control of seepage-filters, stability analysis-stability of downstream slope during steady seepage and upstream slope during sudden drawdown conditions.</p>
UNIT-IV	<p>DIVERSION HEAD WORKS: Types of diversion head works, weirs and barrages, layout of diversion head works, components. Causes and failures of weirs on permeable foundations, Bligh’s creep theory, Khosla’s theory, design of impervious floors for subsurface flow, exit gradient.</p>
UNIT-V	<p>CANAL STRUCTURES FALLS: Types and location, design principles of Sarda type fall, trapezoidal notch fall and straight glacis fall.</p> <p>REGULATORS: Head and cross regulators, design principles.</p> <p>CROSS DRAINAGE WORKS: Types, selection, design principles of aqueduct, siphon aqueduct and super passage.</p> <p>OUTLETS: Types, Proportionality, Sensitivity and Flexibility.</p> <p>RIVER TRAINING: Objectives and approaches, interlocking system of rivers</p>

PROFESSIONAL ELECTIVE-I: GROUND IMPROVEMENT TECHNIQUES

Course Category	Professional Elective	Course Code	19CE7T27
Course Type	Theory	L-T-P-C	3-0-0-3
Prerequisites	-----	Internal Assessment	30
		Semester End Examination	70
		Total Marks	100

RAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

COURSE OBJECTIVES	
1	To make the student how to improving the properties of remoulded and in-situ soils by adopting different ground improvement techniques such as compaction, dewatering systems, vibration methods etc.
2	To enable the students to know how reinforced soil can be used to improve the engineering properties of soils.
3	To make the student understand how to stabilize the different types of poor quality soils.

COURSE OUTCOMES	
Upon successful completion of the course, the student will be able to:	
CO1	Identify various problems associated with soil deposits, formulate and methods to evaluate them.
CO2	Ability to design a dewatering system, component or process as per needs and specifications.
CO3	Explain the concept involved for in-situ treatment of cohesive and cohesionless soils and ability required to design an appropriate techniques to implement ground improvement methods.
CO4	Ability to design reinforced earth retaining structure.
CO5	Ability to design retaining walls, its component or process as per the needs and specifications.

Contribution of Course Outcomes towards achievement of program															
Outcomes (1 - Low, 2- Medium, 3-High)															
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
CO1	3	3	2	3	2	2	2	3	1	2	2	3	2	2	1

CO5	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3
COURSE CONTENT															
PROBLEMATIC SOIL AND IMPROVEMENT TECHNIQUES															
Role of ground improvement in foundation engineering – Methods of ground improvement															
Geotechnical problems in alluvial, lateritic and black cotton soils – Selection of suitable ground improvement techniques based on soil conditions.															
UNIT-II															
DEWATERING															
Dewatering Techniques - Well points – Vacuum and electroosmotic methods – Seepage analysis for two dimensional flow for fully and partially penetrated slots in homogeneous deposits – Design for simple cases.															
UNIT-III															
INSITU TREATMENT OF COHESIONLESS AND COHESIVE SOILS															
In-situ densification of cohesionless soils - Dynamic compaction - Vibroflotation, Sand compaction piles and deep compaction. Consolidation of cohesionless soils - Preloading with sand drains, and fabric drains, Stabilization of soft clay ground using stone columns and Lime piles-Installation techniques – Simple design - Relative merits of above methods and their limitations. separation, road works and containment applications															

RAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

UNIT-IV	EARTH REINFORCEMENT Concept of reinforcement – Types of reinforcement material – Reinforced earth wall – Mechanism – Simple design - Applications of reinforced earth; Functions of Geotextiles in filtration, drainage, separation, road works and containment applications.
UNIT-V	GROUTING TECHNIQUES Types of grouts – Grouting equipments and machinery – Injection methods – Grout monitoring Stabilization with cement, lime and chemicals – Stabilization of expansive soil.

PROFESSIONAL ELECTIVE-I: REPAIR & MAINTENANCE OF STRUCTURES

Course Category	Professional Elective	Course Code	19CE7T28
Course Type	Theory	L-T-P-C	3-0-0-3
Prerequisites	-----	Internal Assessment	30
		Semester End Examination	70
		Total Marks	100

COURSE OBJECTIVES	
1	Familiarize Students with deterioration of concrete in structures.
2	Equip student with concepts of NDT and evaluation.
3	Understand failures and causes for failures in structures.
4	Familiarize different materials and techniques for repairs
5	Understand procedure to carryout Physical evaluation of buildings and prepare report.

COURSE OUTCOMES	
Upon successful completion of the course, the student will be able to:	
CO1	Assess the deterioration of concrete in structures
CO2	Evaluate structures by NDT
CO3	Assess failures and causes of failures in structures.
CO4	Applying repair and rehabilitation techniques. Carryout Physical evaluation and submit report on condition of the structure.
CO5	Application of materials for repair and rehabilitation.

PROFESSIONAL ELECTIVE-I: TRANSPORTATION PLANNING ENGINEERING

Course Category	Professional Elective	Course Code	19CE7T29
Course Type	Theory	L-T-P-C	3-0-0-3
Prerequisites	-----	Internal Assessment	30
		Semester End Examination	70
		Total Marks	100

COURSE OBJECTIVES	
1	To learn various procedures for travel demand estimation.
2	To various data collection techniques for OD data.
3	To know various models and techniques for trip generation, trip distribution, mode choice and traffic assignment.
4	To develop alternative urban transport network plans.

COURSE OUTCOMES	
Upon successful completion of the course, the student will be able to:	
CO1	Evaluate various alternative transportation proposals.
CO2	Identify the corridor and plan for providing good transportation facilities.
CO3	Describe the fundamental parameters and relationships that characterize the operation of a transportation facility.
CO4	Describe methods of monitoring, assessing and improving the performance of transportation facilities.
CO5	Apply queuing models to evaluate the performance of a transportation system.

COURSE CONTENT	
UNIT-I	URBAN TRANSPORTATION PROBLEMS & TRAVEL DEMAND: Urban Issues, Travel Characteristics, Evolution of Planning Process, Supply and Demand – Systems approach; Trends, Overall Planning process, Long term Vs Short term planning, Demand Function, Independent Variables, Travel Attributes, Assumptions in Demand Estimation, Sequential, and Simultaneous Approaches, Aggregate and Disaggregate Techniques.
UNIT-II	DATA COLLECTION AND INVENTORIES: Collection of data – Organization of surveys and Analysis, Study Area, Zoning, Types and Sources of Data, Road Side Interviews, Home Interview Surveys, Commercial Vehicle Surveys, Sampling Techniques, Expansion Factors, Accuracy Checks, Use of Secondary Sources, Economic data – Income – Population – Employment – Vehicle Owner Ship.
UNIT-III	TRIP GENERATION & DISTRIBUTION: UTPS Approach, Trip Generation Analysis: Zonal Models, Category Analysis, Household Models, Trip Attraction models, Commercial Trip Rates; Trip Distribution: Growth Factor Methods, Gravity Models, Opportunity Models, Time Function Iteration Models.
UNIT-IV	MODE CHOICE ANALYSIS: Mode Choice Behavior, Competing Modes, Mode Split Curves, Aggregate and Disaggregate Approaches; Discrete Choice Analysis, Choice sets, Maximum Utility, Probabilistic Models: Binary Logit, Multinomial Logit Model – IIA property; Aggregation
UNIT-V	CORRIDOR IDENTIFICATION, PLAN PREPARATION & EVALUATION: Master plans, Selection of Corridor, Corridor Identification, Corridor deficiency Analysis; Travel Forecasts to Evaluate Alternative Improvements, Impacts of New Development on Transportation Facilities. Pivot Point Analysis, Environmental and Energy Analysis; Case studies

PROFESSIONAL ELECTIVE-I: INDUSTRIAL WASTE MANAGEMENT

Course Category	Professional Elective	Course Code	19CE7T30
Course Type	Theory	L-T-P-C	3-0-0-3
Prerequisites	-----	Internal Assessment	30
		Semester End Examination	70
		Total Marks	100

COURSE OBJECTIVES	
1	To make the students understand about industrial waste, its characteristics and effects
2	To make students to know various sources of industrial waste and how to recycle and reuse them.
3	To understand what are the various treatment technologies for treating industrial waste
4	To create awareness of hazardous waste and their treatment

COURSE OUTCOMES	
Upon successful completion of the course, the student will be able to:	
CO1	Define the characteristics of industrial waste and environmental regulation for prevention and control of industrial and hazardous waste
CO2	Explain waste management approach and interpret the applications of recycle, reuse and byproduct recovery.
CO3	Classify various sources of waste and its characteristics
CO4	Interpreting various treatment technologies and its applications
CO5	Defining hazardous waste and their treatment technologies.

Contribution of Course Outcomes towards achievement of program

Outcomes (1 - Low, 2- Medium, 3-High)

RAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3

CO5	3	3	2	2	3	1	1	3	1	2	2	3	2	2	3

COURSE CONTENT	
UNIT-I	INTRODUCTION Types of industries and industrial pollution – Characteristics of industrial wastes – Population equivalent – Bioassay studies – effects of industrial effluents on streams, sewer, land, sewage treatment plants and human health – Environmental legislations related to prevention and control of industrial effluents and hazardous wastes
UNIT-II	CLEANER PRODUCTION Waste management Approach – Waste Audit – Volume and strength reduction – Material and process modifications – Recycle, reuse and byproduct recovery – Applications.
UNIT-III	POLLUTION FROM MAJOR INDUSTRIES Sources, Characteristics, waste treatment flow sheets for selected industries such as Textiles, Tanneries, Pharmaceuticals, Electroplating industries, Dairy, Sugar, Paper, distilleries, Steel plants, Refineries, fertilizer, thermal power plants – Wastewater reclamation concepts
UNIT-IV	TREATMENT TECHNOLOGIES Equalisation – Neutralisation – Removal of suspended and dissolved organic solids - Chemical oxidation – Adsorption - Removal of dissolved inorganic – Combined treatment of industrial and municipal wastes – Residue management – Dewatering – Disposal
UNIT-V	HAZARDOUS WASTE MANAGEMENT Hazardous wastes - Physico chemical treatment – solidification – incineration – Secure land fills

PROFESSIONAL ELECTIVE-I: URBAN HYDROLOGY

Course Category	Professional Elective	Course Code	19CE7T31
Course Type	Theory	L-T-P-C	3-0-0-3
Prerequisites	-----	Internal Assessment	30
		Semester End Examination	70
		Total Marks	100

COURSE OBJECTIVES

1	Appreciate the impact of urbanization on catchment hydrology and understand the importance of short duration rainfall runoff data for urban hydrology studies.
2	Learn the techniques for peak flow estimation for storm water drainage system design.

RAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

3	Understand the concepts in design of various components of urban drainage systems.
4	Learn some of the best management practices in urban drainage.
5	Understand the concepts of preparation master urban drainage system.

COURSE OUTCOMES

Upon successful completion of the course, the student will be able to:

CO1	Develop intensity duration frequency curves for urban drainage systems.
CO2	Identify the techniques to estimate peak flow of storm water and design of drainage system.
CO3	Develop design storms to size the various components of drainage system.
CO4	Formulate for best management practices in urban drainage system.
CO5	Prepare master plan of drainage system for urbanized area.

Contribution of Course Outcomes towards achievement of program

Outcomes (1 - Low, 2- Medium, 3-High)

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
CO1	3	3	3	2	2	1	--	--	--	--	1	--	1	--	2
CO2	3	3	3	2	2	1	--	--	--	--	1	--	1	--	2
CO3	3	3	3	2	2	1	--	--	--	--	1	--	1	--	2
CO4	3	3	3	2	2	1	--	--	--	--	1	--	1	--	2
CO5	3	3	3	2	2	1	--	--	--	--	1	--	1	--	2

COURSE CONTENT

UNIT-I	INTRODUCTION: Urbanization and its effect on water cycle – urban hydrologic cycle – trends in urbanization – Effect of urbanization on hydrology. PRECIPITATION ANALYSIS: Importance of short duration of rainfall and runoff data, methods of estimation of time of concentration for design of urban drainage systems, Intensity-Duration - Frequency (IDF) curves, design storms for urban drainage systems.
UNIT-II	APPROACHES TO URBAN DRAINAGE: Time of concentration, peak flow estimation approaches, rational method, NRCS curve number approach, runoff quantity and quality, wastewater and storm water reuse, major and minor systems.
UNIT-III	ELEMENTS OF DRAINAGE SYSTEMS: Open channel, underground drains, appurtenances, pumping, and source control.
UNIT-IV	ANALYSIS AND MANAGEMENT: Storm water drainage structures, design of storm water network- Best Management Practices–detention and retention facilities, swales, constructed wetlands, models available for storm water management.
UNIT-V	MASTER DRAINAGE PLANS: Issues to be concentrated upon – typical urban drainage master plan, interrelation between water resources investigation and urban planning processes, planning objectives, comprehensive planning, and use of models in planning.

PROFESSIONAL ELECTIVE-I: AIR POLLUTION & CONTROL

Course Category	Professional Elective	Course Code	19CE7T32
Course Type	Theory	L-T-P-C	3-0-0-3
Prerequisites	----	Internal Assessment	30
		Semester End Examination	70
		Total Marks	100

COURSE OBJECTIVES	
1	To know the analysis of air pollutants.
2	To know the Threshold Limit Values (TLV) of various air pollutants
3	To acquire the design principles of particulate and gaseous control.
4	To learn plume behavior in different environmental conditions.
5	To learn carbon credits for various day to day activities.

RAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

COURSE OUTCOMES	
Upon successful completion of the course, the student will be able to:	
CO1	Conduct analysis of air pollutants with climatic change and its impact.
CO2	Design principles of particulate and gaseous control measures for an industry
CO3	Examine the plume behavior in a prevailing environmental condition
CO4	Know the design process for gases pollutant
CO5	Categorize industries with respect to site selection, zoning, legislation and emission standards. know the water quality analysis.

Contribution of Course Outcomes towards achievement of program															
Outcomes (1 - Low, 2- Medium, 3-High)															
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3

CO5	-	-	2	2	-	2	-	-	2	-	2	-	2	2	2

COURSE CONTENT	
UNIT-I	AIR POLLUTION: Sampling and analysis of air pollutants, conversion of ppm into $\mu\text{g}/\text{m}^3$. Definition of terms related to air pollution and control, classification of air pollutants - secondary pollutants - Indoor air pollution - Climate Change and its impact - Carbon Trade.
UNIT-II	THERMODYNAMICS AND KINETICS OF AIR-POLLUTION: Applications in the removal of gases like SO_x , NO_x , CO and HC - Air-fuel ratio- Computation and Control of products of combustion, Automobile pollution. Odour pollution control.
UNIT-III	METEOROLOGY AND AIR POLLUTION: Properties of atmosphere: Heat, Pressure, Wind forces, Moisture and relative Humidity, Lapse Rates - Influence of Terrain and Meteorological phenomena on plume behavior and Air Quality - Wind rose diagrams, Plume Rise Models.
UNIT-IV	AMBIENT AIR QUALITY MANAGEMENT: Monitoring of SPM, SO_2 ; NO_x and CO - Stack Monitoring for flue gases - Micro-meteorological monitoring - Weather Station. Emission Standards-Gaussian Model for Plume Dispersion.
UNIT-V	AIR POLLUTION CONTROL & METHODS: Control of particulates – Control at Sources, Process Changes, Design and operation of control Equipments – Settling Chambers, Cyclone separators –Fabric filters– scrubbers, Environmental friendly fuels - In-plant Control Measures, process changes, methods of removal and recycling.

TEXT BOOKS	
1.	Air Pollution by M.N. Rao and H.V.N. Rao – Tata McGraw Hill Company.
2.	Air Pollution and Control by KVSG Murali Krishna, Laxmi Publications, NewDelhi.

PROFESSIONAL ELECTIVE-II: ADVANCED STRUCTURAL ENGINEERING

Course Category	Professional Elective	Course Code	19CE7T34
Course Type	Theory	L-T-P-C	3-0-0-3
Prerequisites	----	Internal Assessment	30
		Semester End Examination	70
		Total Marks	100

COURSE OBJECTIVES

1	Familiarize Students with Raft Foundations and Retaining walls.
2	Equip student with concepts of design of different types of RCC water tanks.
3	Understand Concepts of flat slabs.
4	Understand the concepts and design procedures of Chimney.
5	Understand different types of transmission towers.

COURSE OUTCOMES

Upon successful completion of the course, the student will be able to:

CO1	Design raft foundations and different types of RCC retaining walls.
CO2	Carryout analysis and design of different types of RCC water tanks.

RAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

CO3	Carryout analysis and Design of Flat Slabs.
CO4	Solve the problems design of Chimney.
CO5	Listout various types of transmission towers.

Contribution of Course Outcomes towards achievement of program															
Outcomes (1 - Low, 2- Medium, 3-High)															
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3

CO5	2	2	3	--	1	1	--	--	--	--	2	--	3	1	1

COURSE CONTENT	
UNIT-I	ANALYSIS AND DESIGN OF RAFT FOUNDATIONS: Design of RCC Retaining walls: Cantilever and Counter fort.
UNIT-II	ANALYSIS AND DESIGN OF RCC WATER TANKS: Circular and Rectangular types- Intze tank including staging.
UNIT-III	ANALYSIS AND DESIGN OF FLAT SLABS: Direct Design and Equivalent Frame Methods- Check for Punching shear.
UNIT-IV	CHIMNEY: Analysis and Design of Chimney, Concepts of loading.
UNIT-V	TRANSMISSION TOWERS: Introduction to Steel Transmission Towers - Principles and procedures.

TEXT BOOKS

1.	“Reinforced Concrete Structures” Vol. - 2 by B. C. Punmia, Ashok Kumar Jain and Arun Kumar Jain, Laxmi Publications Pvt. Ltd., NewDelhi.
2.	“Reinforced Concrete Structures” by N. Subrahmanian, Oxford Publishers.

REFERENCE BOOKS

1.	“Essentials of Bridge Engineering” by D. Johnson Victor, Oxford and IBM publication Co., Pvt.Ltd.
2.	“Reinforced concrete design” by S. U. Pillai and D. Menon, Tata Mc.Grawhill Publishing Company.
3.	“Design Drawing of Concrete and Steel Structures” by N. Krishna Raju, University Press 2005.
4.	Codes: Relevant IS: codes.

INTERNAL EXAMINATION PATTERN:

The total internal marks (40) are distributed in two components as follows:

1. Descriptive (subjective type) examination: 30marks
2. Assignment: 10marks

FINAL EXAMINATION PATTERN:

RAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

The end examination paper should consist of Part A and Part B. part A consist of two questions in Design and Drawing out of which one question is to be answered. Part B should consist of five questions and design out of which three are to be answered. Weightage for Part – A is 40% and Part- B is60%.

PROFESSIONAL ELECTIVE-II: PAVEMENT ANALYSIS & DESIGN

Course Category	Professional Elective	Course Code	19CE7T35
Course Type	Theory	L-T-P-C	3-0-0-3
Prerequisites	----	Internal Assessment	30
		Semester End Examination	70
		Total Marks	100

RAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

COURSE OBJECTIVES	
1	To know various factors affecting pavement design.
2	To know various concepts for the stresses in pavements and to understand material characterization.
3	To acquire design principles of flexible and rigid pavements
4	To acquire design principles of shoulders, overlays and drainage
5	To know highway capacity and level of service concepts.

COURSE OUTCOMES	
Upon successful completion of the course, the student will be able to:	
CO1	Explain concepts and standards adopted in Planning, Design and construction of Pavements.
CO2	Apply the knowledge of science and engineering fundamentals in designing flexible pavement by adopting various design standards.
CO3	Apply the standards adopted in designing rigid pavement.
CO4	Select appropriate methods for construction and evaluation of Pavements.
CO5	Address the problem statement in construction of pavement and to impart knowledge in stabilization techniques.

Contribution of Course Outcomes towards achievement of program															
Outcomes (1 - Low, 2- Medium, 3-High)															
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
CO1	-	-	-	-	-	2	-	3	-	1	-	-	3	2	-
CO2	-	-	3	-	2	2	-	-	-	1	-	2	3	3	1
CO3	-	3	3	2	3	-	-	-	3	2	2	3	3	3	1
CO4	-	3	2	2	2	-	-	3	3	3	3	3	3	3	2
CO5	-	2	1	1	2	2	3	3	3	3	3	3	2	1	2
COURSE CONTENT															
UNIT-I	PAVEMENT TYPES AND STRESS DISTRIBUTION Introduction – Pavement as layered structure – Pavement types rigid and flexible. Resilient modulus - Stress and deflections in pavements under repeated loading.														
UNIT-II	DESIGN OF FLEXIBLE PAVEMENTS Flexible pavement design Factors influencing design of flexible pavement, Empirical and theoretical methods – Design procedure as per IRC guidelines – Design and specification of rural roads.														
UNIT-III	DESIGN OF RIGID PAVEMENTS Cement concrete pavements Factors influencing CC pavements – Modified Westergaard approach – Design procedure as per IRC guidelines – Concrete roads and their scope in India.														

RAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

UNIT-IV	PAVEMENT CONSTRUCTION, EVALUATION AND MAINTENANCE Construction of pavements – Construction Equipment - Methods of construction. Pavement Evaluation - Causes of distress in rigid and flexible pavements – Evaluation based on Surface Appearance, Cracks, Patches and Pot Holes, Undulations, Raveling, Roughness, Skid Resistance. Structural Evaluation by Deflection Measurements - Pavement Serviceability index - Pavement maintenance (IRC Recommendations only).
UNIT-V	STABILIZATION OF PAVEMENTS Stabilization with special reference to highway pavements – Choice of stabilizers – Testing and field control - Stabilization for rural roads in India – Use of Geo-synthetics in roads.

TEXT BOOKS

1.	Khanna, S.K. and Justo C.E.G. and Veeraragavan, A, “Highway Engineering”, New Chand and Brothers, Revised 10th Edition, 2014.

PROFESSIONAL ELECTIVE-II: MUNICIPAL SOLID WASTE MANAGEMENT

Course Category	Professional Elective	Course Code	19CE7T36
Course Type	Theory	L-T-P-C	3-0-0-3
Prerequisites	----	Internal Assessment	30
		Semester End Examination	70
		Total Marks	100

COURSE OBJECTIVES

1	To make the students conversant with the types, sources, generation, storage, collection, transport, processing and disposal of municipal solid waste.
---	--

COURSE OUTCOMES

Upon successful completion of the course, the student will be able to:	
CO1	Knowledge on characteristics of municipal solid wastes.
CO2	Planning on Reduction, reuse and recycling of waste.
CO3	Ability to plan and design systems for storage, collection, transport, processing and disposal of municipal solid waste.

RAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

CO4	Knowledge on the issues on solid waste management from an integrated and holistic perspective, as well as in the local and international context.
CO5	Design and operation of sanitary landfill.

Contribution of Course Outcomes towards achievement of program															
Outcomes (1 - Low, 2- Medium, 3-High)

PROFESSIONAL ELECTIVE-II: GROUND WATER DEVELOPMENT

Course Category	Professional Elective	Course Code	19CE7T37
Course Type	Theory	L-T-P-C	3-0-0-3
Prerequisites	----	Internal Assessment	30
		Semester End Examination	70
		Total Marks	100

RAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

COURSE OBJECTIVES	
1	Appreciate groundwater as an important natural resource.
2	Understand flow towards wells in confined and unconfined aquifers.
3	Understand the principles involved in design and construction of wells.
4	Create awareness on improving the groundwater potential using various recharge techniques.
5	Know the importance of saline water intrusion in coastal aquifers and its control measures.

COURSE OUTCOMES	
Upon successful completion of the course, the student will be able to:	
CO1	Define the groundwater system basic, types of aquifers, aquifer parameters, movement and its potential for confined and unconfined aquifers
CO2	Apply the knowledge of groundwater flow in steady and unsteady flow characteristics of well hydraulics
CO3	Explain the concept of groundwater model development and data base management for groundwater management
CO4	Describe the importance of artificial recharge and groundwater quality concepts
CO5	Apply the creative and innovative technique on conservation of groundwater

COURSE CONTENT	
UNIT-I	HYDROGEOLOGICAL PARAMETERS Introduction – Water bearing Properties of Rock – Type of aquifers - Aquifer properties permeability, specific yield, transmissivity and storage coefficient – Methods of Estimation – GEC norms - Steady state flow - Darcy’s Law - Groundwater Velocity -- Dupuit Forchheimer assumption – Steady Radial Flow into a Well
UNIT-II	WELL HYDRAULICS Unsteady state flow – The is method - Jacob method – Chow’s method – Law of Times – Theis Recovery – Bailer method – Slug method - tests - Image well theory – Partial penetrations of wells – Well losses – Specific Capacity and Safe yield - Collector well and Infiltration gallery

RAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

UNIT-III	GROUNDWATER MANAGEMENT Need for Management Model – Database for Groundwater Management – Groundwater balance study – Introduction to Mathematical model – Model Conceptualization – Initial and Boundary Condition – Calibration – Validation – Future Prediction – Sensitivity Analysis – Uncertainty Development of a model
UNIT-IV	GROUNDWATER QUALITY Ground water chemistry - Origin, movement and quality - Water quality standards – Drinking water – Industrial water – Irrigation water - Ground water Pollution and legislation - Environmental Regulatory requirements
UNIT-V	GROUNDWATER CONSERVATION Artificial recharge techniques – Reclaimed wastewater recharge – Soil aquifer treatment (SAT) Aquifer Storage and Recovery (ASR) Seawater Intrusion and Remediation – Ground water Basin management and Conjunctive use – Protection zone delineation, Contamination source inventory and remediation schemes

TEXT BOOKS	
1.	Raghunath H.M., "Ground Water Hydrology", New Age International (P) Limited, New Delhi, 2010.
2.	Todd D.K., "Ground Water Hydrology", John Wiley and Sons, New York, 2000.
REFERENCE BOOKS

PROFESSIONAL ELECTIVE-II: REMOTE SENSING & GIS APPLICATIONS

Course Category	Professional Elective	Course Code	19CE7T38
Course Type	Theory	L-T-P-C	3-0-0-3
Prerequisites	-----	Internal Assessment	30
		Semester End Examination	70
		Total Marks	100

COURSE OBJECTIVES	
1	Introduce the basic principles of Remote Sensing and GIS techniques.
2	Learn various types of sensors and platforms.
3	Learn concepts of visual and digital image analyses.
4	Understand the principles of spatial analysis.
5	Appreciate application of RS and GIS to Civil engineering.

COURSE OUTCOMES	
Upon successful completion of the course, the student will be able to:	
CO1	Interpret the concepts of Photogrammetric and its applications such as determination of heights of objects on terrain.
CO2	Illustrate the Electromagnetic spectrum and utilize the energy interactions of EMR with atmosphere and earth surface features for GIS data generation
CO3	Analyze the methods of map projections and understand coordinate systems on GIS Software packages to produce high resolution thematic maps.
CO4	Apply the concepts of vector and raster data model for representation of topological earth features and its importance.
CO5	Apply the RS & GIS techniques for solving civil engineering applications

Contribution of Course Outcomes towards achievement of program															
Outcomes (1 - Low, 2- Medium, 3-High)															
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
CO1	2	1	1	1	2	2	-	1	-	-	2	-	2	-	1

-----	---	---	---	---	---	---	---	---	---	---	---	---	---	---	---

COURSE CONTENT	
UNIT-I	INTRODUCTION TO REMOTE SENSING: Basic concepts of remote sensing, electromagnetic radiation, electromagnetic spectrum, interaction with atmosphere, energy interaction with the earth surfaces characteristics of remote sensing systems. SENSORS AND PLATFORMS: Introduction, types of sensors, airborne remote sensing, space borne remote sensing, image data characteristics, digital image data formats-band interleaved by pixel, band interleaved by line
UNIT-II	IMAGE ANALYSIS: Introduction, elements of visual interpretations, digital image processing- image pre-processing, image enhancement, image classification, supervised classification, unsupervised classification.
UNIT-III	GEOGRAPHIC INFORMATION SYSTEM (GIS): Introduction, key components, application areas of GIS, map projections. Data entry and preparation: spatial data input, raster data models, vector data models.
UNIT-IV	SPATIAL DATA ANALYSIS: Introduction, overlay function-vector overlay operations, raster overlay operations, arithmetic operators, comparison and logical operators, conditional expressions, overlay using a decision table, network analysis-optimal path finding, network allocation, network tracing.
UNIT-V	RS AND GIS APPLICATIONS GENERAL: Land cover and land use, agriculture, forestry, geology, geomorphology, urban applications APPLICATION TO HYDROLOGY AND WATER RESOURCES: Flood zoning and mapping, groundwater prospects and potential recharge zones, watershed management.

DETAILING AND DRAWING OF CIVIL ENGINEERING STRUCTURES

Course Category	Professional Core	Course Code	19CE7L11
Course Type	Laboratory	L-T-P-C	0-0-3-1.5
Prerequisites	-----	Internal Assessment	30
		Semester End Examination	70
		Total Marks	100

COURSE OBJECTIVES	
1	To enhance the students knowledge and skills in Irrigation drawing.
2	To know all the design of irrigation structures
3	To design the surplus weir, canal regular
4	To detail the reinforced structures
5	To give basic idea about all Irrigation structural components

COURSE OUTCOMES	
Upon successful completion of the course, the student will be able to:	
CO1	Able to know all the design of irrigation structures.
CO2	Design the surplus weir, canal regular, Tank Sluice and Direct Sluice.
CO3	Basically idea about all reinforced structural components.
CO4	Basically idea about all Steel structural components.

GIS & STAAD Pro LABORATORY

Course Category	Professional Core	Course Code	19CE7L12
Course Type	Laboratory	L-T-P-C	0-0-3-1.5
Prerequisites	-----	Internal Assessment	30

RAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

	Semester End Examination	70
	Total Marks	100

COURSE OBJECTIVES	
1	Introduce image processing and GIS software.
2	Familiarize structural analysis software.
3	Understand the process of digitization, creation of thematic map from toposheets and maps
4	Learn to apply GIS software to simple problems in water resources and transportation engineering.
5	Learn to analyze and design retaining wall and simple towers.

COURSE OUTCOMES	
Upon successful completion of the course, the student will be able to:	
CO1	Digitize and create thematic map and extract important features using GIS software.
CO2	Analyze and Interpret the maps created using GIS for specific applications.
CO3	Use structural analysis software to analyze and design 2D and 3D frames

Contribution of Course Outcomes towards achievement of program																
Outcomes (1 - Low, 2- Medium, 3-High)

CONSTRUCTION TECHNOLOGY & MANAGEMENT

Course Category	Professional core	Course Code	19CE8T39
Course Type	Theory	L-T-P-C	3-0-0-3
Prerequisites	-----	Internal Assessment	30
		Semester End Examination	70
		Total Marks	100

COURSE OBJECTIVES	
1	To introduce to the student the concept of project management including network drawing and monitoring.
2	To introduce the various equipment related to construction like earth moving equipment, trucks and handling equipment, aggregate production and construction equipment and machinery.
3	To introduce the importance of safety in construction projects.
4	To introduce the importance of Man power in Construction projects.

COURSE OUTCOMES	
Upon successful completion of the course, the student will be able to:	
CO1	Apply the project management techniques for construction planning
CO2	Apply the project management for Solve and upgrade the PERT Technique by using resources in construction
CO3	Plan the suitable equipments in various tasks of civil engineering projects.
CO4	Apply the safety requirements and quality control aspects in projects
CO5	Planning of Man power and Plan the suitable construction methods for the site execution.

Contribution of Course Outcomes towards achievement of program
Outcomes (1 - Low, 2- Medium, 3-High)

COURSE CONTENT

UNIT-I	CONSTRUCTION PROJECT MANAGEMENT AND ITS RELEVANCE – qualities of a project manager – project planning – coordination –scheduling - monitoring – bar charts – milestone charts – critical path method.
UNIT-II	PROJECT EVALUATION AND REVIEW TECHNIQUE – cost analysis - updating – crashing for optimum cost – crashing for optimum resources – allocation of resources.
UNIT-III	CONSTRUCTION EQUIPMENT – economical considerations – earthwork equipment– Trucks and handling equipment – rear dump trucks – capacities of trucks. Handling equipment – calculation of truck production – compaction equipment – types of compaction rollers. HOISTING AND EARTHWORK EQUIPMENT – hoists – cranes – tractors - bulldozers – graders – scrapers– draglines -clamshell buckets.
UNIT-IV	CONCRETING EQUIPMENT – crushers – jaw crushers – rotary crushers – impact crushers – selection of crushing equipment - screening of aggregate – concrete mixers – mixing and placing of concrete – consolidating and finishing.
UNIT-V	CONSTRUCTION METHODS – earthwork – piling – placing of concrete – form work – fabrication and erection – quality control and safety engineering. Man power planning in construction projects.

TEXT BOOKS

1. Construction Planning, Equipment and Methods by Peurifoy and Schexnayder, Shapira, Tata M c Graw hill.
2. Construction Project Management Theory and Practice by Kumar NeerajJha (2011), Pearson.

PRESTRESSED CONCRETE

Course Category	Professional Core	Course Code	19CE8T40
Course Type	Theory	L-T-P-C	3-0-0-3
Prerequisites	Concrete technology and Designing and detailing of reinforced concrete structures	Internal Assessment Semester End Examination Total Marks	30 70 100

COURSE OBJECTIVES	
1	Familiarize Students with concepts and with different systems used in prestressing concrete.
2	Understand the different losses of pre-stress including short and long term losses.
3	Familiarize students with the analysis and design of prestressed concrete members under flexure.
4	Familiarize students with the analysis and design of prestressed concrete members under shear and torsion.
5	To be able to understand the major difference between R.C.C Design and P.S.C Design.

COURSE OUTCOMES	
Upon successful completion of the course, the student will be able to:	
CO1	Perceive the different methods of prestressing. Analyze and design prestressed concrete beams under flexure and shear Resistance.
CO2	Listout the various losses in prestressed concrete systems.
CO3	Design prestressed concrete beams under flexure.

RAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

CO4	Design prestressed concrete beams under shear and torsion and interpret the relevant IS code provisions for prestressed concrete.
CO5	Design of end zone reinforcement.

Contribution of Course Outcomes towards achievement of program															
Outcomes (1 - Low, 2- Medium, 3-High)															
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
CO1	3	3	3	3	2	2	2	2	1	2	1	--	3	3	3
CO2	3	3	3	3	2	2	2	2	1	2	1	--	3	3	3
CO3	3	3	3	3	2	2	2	2	1	2	1	--	3	3	3
CO4	3	3	3	3	2	2	2	2	1	2	1	--	3	3	3
CO5	3	3	3	3	2	2	2	2	1	2	1	--	3	3	3

COURSE CONTENT	
UNIT-I	INTRODUCTION: Historic development – General principles of prestressing, pretensioning and post tensioning – Advantages and limitations of prestressed concrete – Materials – High strength concrete and high tensile steel their characteristics. I.S.Code provisions, Methods and Systems of Prestressing; Pre-tensioning and post tensioning methods – Analysis of post tensioning - Different systems of prestressing like Hoyer System, Magrel System Freyssinet system and Gifford – Udall System.
UNIT-II	ANALYSIS OF SECTIONS FOR FLEXURE: Elastic analysis of concrete beams prestressed with straight, concentric, eccentric, bent and parabolic tendons. Concept of load balancing method, pressure line (Trust), Cracking moment for mid and end support conditions. LOSSES OF PRESTRESS: Loss of pre-stress in pre-tensioned and post-tensioned members due to various causes like elastic shortage of concrete, shrinkage of concrete, creep of concrete, Relaxation of steel, slip in anchorage bending of member and frictional losses.
UNIT-III	DESIGN FOR FLEXURAL RESISTANCE: Design for Flexural resistance- Types of flexural failure – Code procedures-Design of sections for flexure- Control of deflections- Factors influencing- Prediction of short term and long term deflections.
UNIT-IV	DESIGN FOR SHEAR AND TORSION: Shear and Principal Stresses: Design of Shear reinforcements- Codal Provisions- Design for Torsion, Design for Combined bending, shear and torsion.
UNIT-V	TRANSFER OF PRE-STRESS Transfer of Prestress in pre-tensioned members- Transmission length- Bond stresses- End zone reinforcement- Codal provisions- Anchorage zone stresses in Post tensioned members- Stress distribution in End block- Anchorage Zone reinforcement.

TEXT BOOKS

1. “Prestressed Concrete” by N. Krishna Raju, Mc Grawhill Education: 6th Edition, 2018
2. “Prestressed Concrete” by S. Ramamrutham, Dhanpat Rai publishing company

Prerequisites	-----	Internal Assessment	30
		Semester End Examination	70
		Total Marks	100

RAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

COURSE OBJECTIVES	
1	To understand the basics of dynamics – dynamic behavior of soils – effects of dynamic loads and the various design methods.

COURSE OUTCOMES	
Upon successful completion of the course, the student will be able to:	
CO1	The basic knowledge about the theory of vibration.
CO2	Listout the different types of waves and its behavior.
CO3	Determining various laboratory and field tests to determine
CO4	Assess the contamination in the soil and to select suitable remediation methods
CO5	Assess the influence of vibrations and selection of remediation methods based

Course Category	Professional Elective	Course Code	19CE8T42
Course Type	Theory	L-T-P-C	3-0-0-3
Prerequisites	-----	Internal Assessment	30
		Semester End Examination	70
		Total Marks	100

COURSE OBJECTIVES

1	Familiarize Students with different types of Bridges and IRC standards.
2	Equip student with concepts and design of Slab Bridges, T Beam Bridges, Box Culverts
3	Understand concepts of design of Plate Girder Bridges.
4	Familiarize with different methods of inspection of bridges and maintenance.

COURSE OUTCOMES

Upon successful completion of the course, the student will be able to:	
CO1	Listout the types of Bridges with diagrams and Loading standards.
CO2	Design of Slab bridges and suggest structural detailing.

RAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

CO3	Design of T beam bridge.
CO4	Design of Plate girder bridges, box culverts and suggest structural detailing.
CO5	Organize for attending inspections and maintenance of bridges and prepare reports.

Contribution of Course Outcomes towards achievement of program

COURSE CONTENT

UNIT-I	INTRODUCTION- Bridges- Types- Slab bridges, T Beam, Arch bridges, Cable Stayed bridges, prestressed concrete bridges, Truss Bridges, Culverts, - Nomenclature- Selection of Bridge Site- Economical span- Abutments pier and end connections- types of foundations- Open, Pile, Well Foundations, Bearings – Types- Introduction to Loading standards- Railway and IRC Loading.
UNIT-II	SLAB BRIDGES- Wheel load on slab- effective width method- slabs supported on two edges- cantilever slabs- dispersion length- Design of interior panel of slab- Guyon’s – Massonet Method –Hendry- Jaegar Methods- Courbon’s theory- Pigeaud’s method.
UNIT-III	T-BEAM BRIDGES- Analysis and design of various elements of bridge –Design of deck slab, longitudinal girders, and Secondary beams- Reinforcement detailing.
UNIT-IV	PLATE GIRDER BRIDGES: Elements of plate girder and their design-web- flange- intermediate stiffener- vertical stiffeners- bearing stiffener- Splices, Design problem with detailing. BOX CULVERTS: Loading –Analysis and Design- Reinforcement detailing.
UNIT-V	INSPECTION AND MAINTENANCE OF BRIDGES: Procedures and methods for inspection – Testing of bridges- Maintenance of Sub Structures and Superstructures- Maintenance of bearings- Maintenance Schedules.

RAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

PROFESSIONAL ELECTIVE - III: TRAFFIC ENGINEERING

Course Category	Professional Elective	Course Code	19CE8T43
Course Type	Theory	L-T-P-C	3-0-0-3
Prerequisites	-----	Internal Assessment	30
		Semester End Examination	70
		Total Marks	100

COURSE OBJECTIVES	
1	To know various components and characteristics of traffic.
2	To know various traffic control devices and principles of highway safety.
3	To understand the detrimental effects of traffic on environment.
4	To know highway capacity and level of service concepts.
5	To learn about intelligent vehicle highway systems.

COURSE OUTCOMES	
Upon successful completion of the course, the student will be able to:	
CO1	Discover Parking Problems and manage traffic regulations.
CO2	Determine traffic speed, volume, travel time and Density.
CO3	Design traffic signals.

RAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

CO4	Discover traffic-environment problems.
CO5	Build Knowledge of traffic Capacity and Level of service and developing vehicle highway systems.

Contribution of Course Outcomes towards achievement of program															
Outcomes (1 - Low, 2- Medium, 3-High)															
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3

CO4	-	-	-	3	-	-	-	-	-	-	-	-	-	-	-
CO5	-	-	-	3	-	-	-	-	-	-	-	-	-	-	-

COURSE CONTENT	
UNIT-I	COMPONENTS OF THE TRAFFIC SYSTEM: Human-Vehicle–Environment System; characteristics of Road users, Vehicles, Highways and their classification; Traffic Studies: Inventories; Volume studies; Speed, Travel time and Delay studies; Intersection studies; Pedestrian studies; Parking studies; Accident studies. Types of parking facilities – On street parking and Off-street Parking facilities; Parking studies and analysis- Parking Inventory Study, Parking Usage Study By Patrolling, Questionnaire Survey, Cordon Surveys; Evaluation of parking parameters; Parking accumulation, Parking Load, Parking Turnover, Parking Volume, Parking Index.
UNIT-II	TRAFFIC CHARACTERISTICS: Microscopic and macroscopic flow characteristics: Time headways; Temporal, spatial and model flow patterns; Interrupted and Un interrupted traffic. Microscopic and macroscopic speed characteristics: Vehicular speed Trajectories; Speed characteristics – Mathematical distribution; Speed and travel time variations; Travel time and delay studies. Microscopic and Macroscopic density characteristics: Distance headway characteristics; Car-following theories; Density measurement techniques; Density contour maps.
UNIT-III	TRAFFIC CONTROL DEVICES & HIGHWAY SAFETY: Traffic signs & Markings; Signal Warrants; Signal phasing and Development of phase plans; Fixed and Vehicle activated signals; Webster method; ARRB method; Drew’s Method; IRC method; Signal coordination; Area Traffic control. Accident characteristics – Road – Driver – Vehicle; Accident recording and Analysis; Highway Safety Improvement Program; Safety Audit.
UNIT-IV	ENVIRONMENTAL CONSIDERATIONS: Air pollution: Kinds of pollutants; Air pollution standards; Measures of air quality; modelling and control. Noise pollution: Measurement of sound levels; Acceptable limits, Prediction of noise levels, Traffic noise control. Measures to curtail environmental degradation due to traffic.
UNIT-V	HIGHWAY CAPACITY AND LEVEL OF SERVICE: Capacity and level of service; Factors affecting Capacity and LOS; Capacity of Rural Highways, Capacity of Urban Roads; HCM and IRC standards. INTELLIGENT VEHICLE – HIGHWAY SYSTEMS: Traffic surveillance and monitoring; IVHS programs, Role of IVHS, IVHS categories, Benefits and Costs of IVHS.

RAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

TEXT BOOKS	
1.	“Traffic Engineering: Theory and Practice” by Pignataro L.J., Prentice hall, Inc.
2.	“Traffic and Transport planning” by Kadiyali L.R., Khanna Publishers.
REFERENCE BOOKS	
1.	“Traffic Engineering Hand Book” by Institute of Transportation Engineers, 4 Ed., Prentice Hall.
2.	“Traffic Engineering” by Mc Shane, WR and RP Roess, Prentice Hall.

PROFESSIONAL ELECTIVE - III: EARTHQUAKE ENGINEERING

Course Category	Professional Elective-III	Course Code	19CE8T44
Course Type	Theory	L-T-P-C	3-0-0-3
Prerequisites	-----	Internal Assessment	30
		Semester End Examination	70
		Total Marks	100

COURSE OBJECTIVES

RAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

1	Familiarize Students with Engineering Seismology.
2	Understand Concepts of Seismic Design.
3	Familiarize with Design philosophies for Seismic loading.
4	Familiarize students with various IS codal provisions for ductile design and detailing.

COURSE OUTCOMES	
Upon successful completion of the course, the student will be able to:	
CO1	Explain fundamentals of Engineering Seismology.
CO2	Solve SDOF Systems and suggest ductile design.
CO3	Compute equivalent lateral seismic loads and carryout a seismic design as per IS codal provisions.
CO4	Seismic Analysis and design of simple 2-storied RC Building frame.
CO5	Draw ductile detailing of flexural members as per IS 13920.

Contribution of Course Outcomes towards achievement of program															
Outcomes (1 - Low, 2- Medium, 3-High)															
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3

CO5	3	2	1	--	--	--	2	--	--	3	--	--	3	3	--

COURSE CONTENT	
UNIT-I	ENGINEERING SEISMOLOGY – rebound theory – plate tectonics – seismic waves - Earthquake size and various scales – local site effects – Indian seismicity – seismic zones of India – theory of vibrations – near ground and far ground rotation and their effects.
UNIT-II	SEISMIC DESIGN CONCEPTS – EQ load on simple building – load path – floor and roof diaphragms – seismic resistant building architecture – plan configuration – vertical configuration – pounding effects – mass and stiffness irregularities – torsion in structural system- Provision of seismic code (IS 1893 & 13920) – Building system – frames – shear wall – braced frames – layout design of Moment Resisting Frames (MRF) – ductility of MRF - Infill wall – Non-structural elements.
UNIT-III	CALCULATION OF EQUIVALENT LATERAL FORCE - Design Base Shear- Storey Shear, Estimation of Natural period of Structure, Computation of Response acceleration Coefficient- Zone factor- Seismic weight- Response reduction factors- Seismic Coefficient Method.
UNIT-IV	DESIGN AND DUCTILE DETAILING OF BEAMS AND COLUMNS OF FRAMES - Concept of strong column weak beams, Ductility criteria for earthquake resistant design, Ductile detailing of flexural members as per IS 13920- Longitudinal reinforcement, Shear reinforcement, Anchorage of reinforcement-Development length, Lap Splices.
UNIT-V	SEISMIC ANALYSIS AND DESIGN : simple 2-storied RC Building frame – Equivalent static lateral force method and response spectrum method.

RAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

TEXT BOOKS

1.	“Earthquake Resistant Design of Structures”- Pankaj Agarwal and Manish Shri Khande, Prentice – Hall of India, 2007, NewDelhi.
2.	“Earthquake Resistant Design of Building Structures” by Vinod Hosur,Wiley India Ltd.

REFERENCE BOOKS

1.	“Introduction to the Theory of Seismology” by Bullen K.E.,Great Britain at the University Printing houses, Cambridge University Press1996.
2.	Relevant code of practices.

PROFESSIONAL ELECTIVE – III: WATER RESOURCE SYSTEM PLANNING

Course Category	Professional Core	Course Code	19CE8T45
Course Type	Theory	L-T-P-C	3-0-0-3
Prerequisites	-----	Internal Assessment	30
		Semester End Examination	70
		Total Marks	100

COURSE OBJECTIVES

1	To introduce the student to the concept of Mathematical approaches for managing the water resources system and apply to operate a water resource system optimally
2	Appreciate mathematical optimization methods and models.
3	Learn and apply basic economic analysis tools to water resources projects
4	Understand linear, nonlinear and dynamic programming techniques and apply them to various water resources systems planning and design problems
5	Appreciate simulation and management techniques in water resources systems.

COURSE OUTCOMES

Upon successful completion of the course, the student will be able to:

CO1	Define the economic aspects and analysis of water resources systems for comprehensive and integrated planning of a water resources project.
CO2	Apply the concept of linear programming for optimisation of water resources problems.
CO3	Explain the concept of dynamic programming and apply in water resource System.
CO4	Develop the simulation model based on deterministic and stochastic simulation for reservoir operating policy.
CO5	Apply advance optimisation techniques like goal programming, heuristic algorithm in the field of water resources planning and management.

Contribution of Course Outcomes towards achievement of program

RAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

Outcomes (1 - Low, 2- Medium, 3-High)

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
C01	3	-	-	-	-	-	2	-	-	-	-	3	2	2	2
C02	3	2	-	-	-	3	-	3	-	-	2	2	2	3	2
C03	3	3	2	-	2	2	-	2	-	-	3	2	1	3	3
C04	3	3	3	-	3	3	-	3	-	2	2	3	3	3	3
C05	3	3	3	3	3	3	-	3	2	-	3	3	3	3	3

COURSE CONTENT

UNIT-I	SYSTEM APPROACH: Definition, classification, and characteristics of systems - Philosophy of modelling – Goals and Objectives – Basics of system analysis concept – steps in systems engineering
UNIT-II	LINEAR PROGRAMMING: Introduction to Operation research - Linear programming Problem Formulation-graphical solution Simplex method –Sensitivity analysis - application to operation of single purpose reservoir
UNIT-III	DYNAMIC PROGRAMMING: Bellman’s optimality criteria, problem formulation and solutions – Water Allocation for three state (user), Forward and Backward Recursion techniques in Dynamic Programming - Shortest pipe line route problem - Application to reservoirs capacity expansion.
UNIT-IV	SIMULATION: Basic principles and concepts – Monte Carlo techniques – Model development – Inputs and outputs – Single and multipurpose reservoir simulation models – Deterministic simulation – Rule Curve development for reservoir
UNIT-V	ADVANCED OPTIMIZATION TECHNIQUES: Integer and parametric linear programming – Goal programming types – Applications to reservoir release optimization – application of evolutionary algorithms like Genetic algorithm, Particle swarm, Simulated Annealing to reservoir release optimization.

TEXT BOOKS

1.	Vedula, S., and Majumdar, P.P. Water Resources Systems – Modeling Techniques and Analysis Tata McGraw Hill, New Delhi, Fifth reprint, 2010
2.	Bhave PR, Water Resources Systems, Narosa Publishers, 2011

REFERENCE BOOKS

1.	Water resource system analysis – Vedula & Mujumdar – Tata Mc. Graw hillcompany Ltd.2005.
2.	Water resources Economics – James & Lee. Oxford publishers2005.

PROFESSIONAL ELECTIVE - III: ENVIRONMENTAL IMPACT ASSESSMENT & MANAGEMENT

Course Category	Professional Elective	Course Code	19CE8T18
Course Type	Theory	L-T-P-C	3-0-0-3
Prerequisites	-----	Internal Assessment	30
		Semester End Examination	70
		Total Marks	100

COURSE OBJECTIVES

1	To impart knowledge on different concepts of Environmental Impact Assessment.
2	To know procedures of risk assessment
3	To learn the EIA methodologies and the criterion for selection of EIA methods.
4	To pre-requisites for ISO 14001 certification
5	To know the procedures for environmental clearances and audit

COURSE OUTCOMES	
Upon successful completion of the course, the student will be able to:	
CO1	Prepare EMP, EIS, and EIA report
CO2	Identify the risks and impacts of a project
CO3	Selection of an appropriate EIA methodology
CO4	Evaluate the EIA report
CO5	Estimate the cost benefit ratio of a project

Contribution of Course Outcomes towards achievement of program

Outcomes (1 - Low, 2- Medium, 3-High)															
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
CO1	2	2	2	1	1	-	2	3	3	2	2	-	3	2	1
CO2	2	-	-	-	-	2	-	-	2	-	1	2	3	2	2
CO3	2	3	3	-	1	-	-	2	1	-	-	-	-	2	2
CO4	2	2	3	-	2	-	-	2	-	-	2	2	2	2	2
CO5	-	-	2	2	-	2	-	-	2	-	2	-	2	2	2

COURSE CONTENT

UNIT-I	BASIC CONCEPT OF EIA: Elements of EIA-factors affecting EIA-Initial environmental Examination-life cycle analysis preparation of Environmental Base map-Classification of environmental parameters – role of stakeholders in the EIA preparation –stages in EIA.
UNIT-II	EIA METHODOLOGIES: introduction, Criteria for the selection of EIA Methodology, EIA methods, Ad-hoc methods, matrix methods, Network method Environmental Media Quality Index method, overlay methods, cost/benefit Analysis - EIS and EMP.
UNIT-III	IMPACT OF DEVELOPMENTAL ACTIVITIES AND LAND USE: Introduction and Methodology for the assessment of soil and ground water, Delineation of study area, Identification of actives- application of remote sensing and GIS for EIA.

RAGATI ENGINEERING COLLEGE: SURAMPALEM
(Autonomous R19)

UNIT-IV	PROCUREMENT OF RELEVANT SOIL QUALITY: Impact prediction, Assessment of Impact significance, Identification and Incorporation of mitigation measures - EIA with reference to surface water, Air and Biological environment: Methodology for the assessment of Impacts on surface water environment.
UNIT-V	ASSESSMENT OF IMPACT OF DEVELOPMENT ACTIVITIES: Vegetation and wildlife, environmental Impact of Deforestation EIA notification by Ministry of Environment and Forest (Govt. of India): Provisions in the EIA notification, procedure for environmental clearance, evaluation of EIA report. Environmental legislation objectives, Evaluation of Audit data and preparation of Audit report.

TEXT BOOKS

1.	Environmental Impact Assessment, Canter Larry W., McGraw-Hill education Edi (1996)
2.	Environmental Impact Assessment Methodologies, by Y.Anjaneyulu, B.S. Publication, Sultan Bazar, Hyderabad.

REFERENCE BOOKS

1.	Environmental Science and Engineering, by J. Glynn and Gary W.HeinKe – Prentice Hall Publishers.
2.	Environmental Science and Engineering, by Suresh K.Dhaneja – S.K.Katania&Sons Publication, NewDelhi.
3.	Environmental Pollution and Control, by Dr H.S. Bhatia – Galgotia Publication (P) Ltd., NewDelhi.
