PRAGATI ENGINEERING COLLEGE
AI CHRONICLES

July to December 2023

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING (ARTIFICIAL INTELLIGENCE)

ABOUT THE DEPARTMENT:

Established in the year 2021, the department of AI has been set up with a goal of training students and conducting research in the fields of Artificial Intelligence. The department consists of highly qualified and dedicated faculty from the reputed institutes. The department aims to train the student as leaders in AI with world class infrastructure, curriculum and comprehensive hands-on experience through industry connect programs. The goal of the department is to ensure the academic excellence in students with wide exposure of research and career opportunities. The ultimate goal is to nurture the academic excellence, industry exposure and outstanding career opportunities to our students.

Vision & Mission

Vision

To emerge as a center of technical expertise in the field of computer science and engineering by producing globally competent professionals with technical & research capabilities, ethical values and team spirit.

Mission

DM1: To produce competent software professionals.

DM2: To induce application oriented and research capabilities in students for the betterment of society

DM3: To inculcate ethics and human values in students to adapt to the dynamism in the field of computing technology.

Program Educational Objectives

PEO1:
Graduates are prepared to apply analysis, predictions, optimization, decision making and develop skills in order to formulate and solve complex problems with artificial intelligence.

PEO2:
Graduates are prepared to take up higher studies, research & development and other creative efforts in the area of AI which drives scientific and societal advancement through technological innovation and entrepreneurship.

PEO3:
Graduates are prepared to use their skills and abilities in an ethical & professional manner.

Program Outcomes:

Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

Problem analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

Design/development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

Program Specific Outcome:

Engineering Students will be able to:

PSO1: Apply artificial intelligence techniques, software tools to conduct experiments, interpret data and to solve complex problems.

PSO2: Design and development of intelligent automated systems for the benefit of society by the use of AI.

PSO3: Adapt to a rapidly changing environment by learning and employing emerging software tools and technologies in the area of Artificial Intelligence.

REPORT ON SHIKSHAK PARV (TEACHER'S DAY) CELEBRATIONS (5th to 9th September, 2022):

Dr Sarvepalli Radhakrishnan was a great teacher, philosopher and a Bharat Ratna recipient. He was the first Vice President and second President of independent India. During 1962-67, when he was serving the country as a President of India, his students and friends requested him to celebrate his birthday. To which he replied, "*Instead of celebrating my birthday, it would be my proud privilegeSeptember 5 is observed as Teachers' Day.*" Since then, his birthday has been observed as Teachers' Day.

"Teaching is a very noble profession that shapes the character, caliber, and future of an individual. If the people remember me as a good teacher that will be the biggest honor for me." – A. P. J. Abdul Kalam.

"Technology is just a tool. In terms of getting the kids working together and motivating them, the teacher is the most important." – Bill Gates.

REPORT ON ENGINEER'S DAY CELEBRATIONS(14th to 15th September, 2022):

The 15th of September is recognized in India as Engineers' Day in honour of Mokshagundam Visvesvaraya, known as the 'Father of Modern Mysore.' Sir M Visvesvaraya made major contributions to engineering and education. He is regarded as one of the greatest nation-builders and was instrumental in the development of India's modern dams, reservoirs, and hydropower projects. As chief engineer, Sir MV, as he was often called, oversaw the construction of numerous architectural wonders, such as the flood control system in Hyderabad and the Krishna raja Sagar dam in Karnataka. His excellent social effort earned him the Bharat Ratna award from the Indian government in 1955.
Significance of Engineers' Day:

Engineers' Day is marked to recognize and appreciate the contributions that engineers have made to every branch of science and technology in our nation. Engineers play a very important role in the economic growth and advancement of a country. The day is devoted to honouring upcoming engineering trends as well as past engineering achievements. Engineers' Day illustrates the significance and importance of engineers in every aspect of our everyday life.

- At its heart, engineering is about using science to find creative, practical solutions. It is a noble profession – Queen Elizabeth II
- This job is a great scientific adventure. But it's also a great human adventure – Fabiola Gianotti
- Software is a great combination of artistry and engineering- Bill Gates
Writers Delight- Essay Writing Competition

## Report on National Sport Day Events on 29-12-2022:

National Sports Day is celebrated on honour of Major Dhyan Chand Singh. Sports day event has been started with March Past and after March passed the event has begin which involved events like Running race(100 mts), Cricket, Chess etc.

A student from our department **Ms. T. Bindu Madhavi** participated in the event **4 x 100 mts. relay** and achieved **Bronze medal**.

Metaverse Club Events conducted in December 2022:

Name of the Event : Online quiz on python basics.
