PRAGATI ENGINEERING COLLEGE

(AUTONOMOUS)

DEPARTMENT OF INFORMATION TECHNOLOGY

Report:

- On May 11, 2022, SparkWIT club of Department of IT, Pragati Engineering college commemorated National Science Day by hosting essay writing competition on "**Integrated Approach in Science and Technology for Sustainable future**" 35 students participated in it.
- Mrs. T Ganga Bhavani, the faculty coordinator, welcomed everyone to the event
- The theme for National Technology Day 2022 is "**Integrated Approach in Science and technology for sustainable future**". The theme was launched by Union Minister Jitendra Singh.
- The main purpose of the day was to recognize scientific and technological achievements.
- The National Technology Day aims to remind people of the country's scientific achievements. This day is to celebrate all those who have contributed to the advancement of science. Events are held to celebrate the day and recognize technological advances in multiple areas.
- An integrated approach in science and technology for a sustainable future refers to the incorporation of various scientific and technological disciplines to create sustainable solutions for current and future challenges. This approach recognizes the interconnectedness of environmental, economic, and social issues and aims to address them holistically.
- The integrated approach emphasizes the importance of collaboration and interdisciplinary research to achieve sustainable development goals. It involves a combination of natural sciences, social sciences, and engineering to create innovative solutions to environmental and social challenges.
- The application of the integrated approach in science and technology has led to the development of various sustainable technologies and practices. For example, renewable energy technologies such as solar and wind power have become more efficient and cost-effective, making them increasingly popular alternatives to fossil fuels.
- Additionally, advances in materials science and engineering have enabled the development of more sustainable building materials and construction practices. Sustainable agriculture practices, such as regenerative farming and organic farming, have also been developed through interdisciplinary research.
- Overall, the integrated approach in science and technology is essential to achieving sustainable development goals, as it recognizes the interrelatedness of environmental, economic, and social issues and encourages collaboration and innovation to create sustainable solutions for the future
- National Technology Day celebrations are held across India with great enthusiasm and excitement. The day is marked by various events, seminars, conferences, and workshops that showcase India's achievements in science and technology. The government also honors scientists and engineers who have made significant contributions to the development of technology in the country.
- On this day, various educational institutions, research organizations, and industries come together to organize exhibitions, science fairs, and competitions to encourage young minds to pursue careers in science and technology. The aim is to inspire and motivate the youth to contribute to the development of India's technology sector.

PRAGATI ENGINEERING COLLEGE

(AUTONOMOUS)

DEPARTMENT OF INFORMATION TECHNOLOGY

- Apart from the Pokhran nuclear test, India has made significant progress in various fields of science and technology, including space research, biotechnology, information technology, and agriculture. National Technology Day is a reminder of India's scientific capabilities and the need to continue investing in research and development to stay at the forefront of technological advancements.
- In recent years, India has made significant strides in integrating science and technology to promote sustainable development. The country has launched several initiatives to promote clean energy, water conservation, waste management, and sustainable agriculture. For example, the Swachh Bharat Abhiyan, or Clean India Mission, aims to make India open defecation free and achieve 100% scientific waste management.
- India has also launched the National Action Plan on Climate Change, which aims to promote sustainable development and reduce greenhouse gas emissions. The plan includes initiatives to promote renewable energy, energy efficiency, and sustainable transportation.
- National Technology Day provides an opportunity to celebrate India's achievements in science and technology, and to inspire future generations of scientists and engineers to contribute to the country's sustainable development. It is a reminder that science and technology can play a critical role in promoting a more sustainable future for all.

PRAGATI ENGINEERING COLLEGE

(AUTONOMOUS)

DEPARTMENT OF INFORMATION TECHNOLOGY

Report:

- On April 21, 2022, SparkWIT club of Department of IT, Pragati Engineering college commemorated World Creativity and Innovation Day by hosting a PPT Presentation on "**Innovation for Transformation and Impact in the Society**." 35 students participated in it.
- Mrs. T Ganga Bhavani, the faculty coordinator, welcomed everyone to the event.
- The concept of creativity is open to interpretation from artistic expression to problem-solving in the context of economic, social, and sustainable development
- The World Creativity and Innovation Day (#WCID) 21 April, was established by the United Nations General Assembly Resolution 71/284 of 27 April 2017, to raise awareness around the importance of creativity and innovation in problem solving with respect to advancing the United Nations sustainable development goals 2030.
- The day was first celebrated in 2002, and since then, it has grown into a global movement, with individuals and organizations from around the world participating in various events and activities to mark the occasion.
- WCID is a day to recognize the importance of creativity and innovation in solving some of the world's most pressing problems. It is also a day to celebrate the power of creativity to bring people together, break down barriers, and inspire positive change.
- There are many ways to celebrate WCID, from hosting creative workshops and brainstorming sessions to organizing exhibitions and cultural events. Some organizations also use the day to launch new initiatives or to showcase their innovative products or services.
- World Creativity and Innovation Day brings together communities, artists, academics, fashion and arts lovers to celebrate the influence of Cultural and Creative industries on social cohesion and to learn about the impact of creativity and innovation on the country economic growth.
- Innovation is often considered the driving force behind progress and economic growth. It involves the creation and implementation of new ideas, products, or processes that bring about positive change. Innovation can come from various sources, including individuals, businesses, governments, and non-profit organizations.
- One of the key benefits of innovation is its potential to transform society. New technologies, for example, can improve healthcare, increase access to education, and enhance communication. Innovation can also help address social and environmental challenges, such as poverty, climate change, and inequality.
- However, innovation also comes with challenges. It can disrupt existing industries and employment patterns, and its benefits may not be evenly distributed. Therefore, it is important to consider the potential impact of innovation on different groups and to ensure that everyone has access to its benefits.

PRAGATI ENGINEERING COLLEGE

(AUTONOMOUS)

DEPARTMENT OF INFORMATION TECHNOLOGY

- Overall, innovation plays a vital role in shaping the future of society. By encouraging and supporting innovation, we can create a more prosperous and sustainable world.
- In summary, World Creativity and Innovation Day is an important day that celebrates the power of creativity and innovation in making the world a better place. It is a day to recognize and celebrate the contributions of individuals and organizations who use their creativity to solve problems and inspire positive change.

PRAGATI ENGINEERING COLLEGE

(AUTONOMOUS)

DEPARTMENT OF INFORMATION TECHNOLOGY

Report:

- On February 28, 2022, Spark WIT club of Department of IT, Pragati Engineering college commemorated National Science Day by hosting a seminar on "Integrated Approach in Science and Technology for Sustainable Future." 40 students participated in it.
- Mrs. T Ganga Bhavani, the faculty coordinator, welcomed everyone to the event.
- Dr. D Sirisha, HoD, Department of IT, spoke at the session. She introduced the integrated approach at the beginning of the session.
- In order to address the pressing economic, social, and environmental issues of the day, we need information and understanding created via science. This knowledge and understanding enables us to work towards sustainable development and greener society.
- The speaker explained how the fusion of science, technology, and society creates a better world.
- In order to create a sustainable product and process for a better way of life, the speaker also discussed the role that technology plays in sustainable design. The lecturer urged the pupils to expand on their concepts and sharpen their ingenuity.
- The year 2022 has been designated by the UN as Basic Sciences Year, with an emphasis on how scientific research may advance sustainable development and raise standards of living globally. It is generally acknowledged that scientific study is the pinnacle of human achievement and is essential to advancing society and our understanding of the natural world, the cosmos, matter, and everything that makes these up.
- The multi-learning environment (MLE), which combines a physical learning environment (PLE) and a virtual learning environment (VLE), falls under the category of an integrated approach and will combine material and skills to prepare future society members. The importance of the learning environment should be emphasized because it might have an impact on students' learning results.
- The multi-learning environment (MLE) calls for close ties between educational institutions and business, and this philosophy will serve as the cornerstone of an integrated approach to science and technology for a sustainable future.
- Every year on February 28th, National Science Day is observed, and to honour Chandra Shekhar Venkata Raman, a great Indian physicist who discovered the "Raman Effect," all Indians pay tribute to him. C.V. Raman developed Raman scattering (also known as the Raman effect) in 1928, and for the first time in the country's history, an Indian scholar who obtained all of his or her education in India was awarded the Nobel Prize in Physics in 1930. He founded the Raman Research Institute in Bangalore in 1949, served as its director, and was still working there when he passed away on December 21, 1970, at the age of 82. The Government of India presented Raman with the Bharat Ratna award in 1954.

DEPARTMENT OF INFORMATION TECHNOLOGY

- There are a number of problems with the way science is taught, thus there is an urgent need to take some decisive action to raise the standard of instruction in science. Younger generations should be aware of the reality that our quality of life, the health of our economy, and the very future of our society depend on the innovations and discoveries made by scientists, and that the development of novel techniques is a precondition sine qua non. Therefore, it is time to explore something new, something novel that might be beneficial to humanity. One of the finest methods to enhance our effectiveness in scientific research is to create science curriculum that are research-focused and link it to the business community for successful translation.
- An integrated approach in Science and Technology (S&T) for a sustainable future involves the application of scientific and technological knowledge to address the challenges facing the planet, while also taking into account social, economic, and environmental considerations. This approach recognizes that many of the challenges facing the world today, such as climate change, poverty, and inequality, are complex and interconnected, and require a multidisciplinary approach.
- An integrated approach to S&T for a sustainable future involves collaboration across different scientific disciplines, as well as between scientists, policymakers, and other stakeholders. It also involves the development of new technologies and solutions that are both environmentally and socially sustainable.
- The goal of an integrated approach to S&T for a sustainable future is to create a more resilient and equitable society, where people can thrive without compromising the ability of future generations to meet their own needs. This requires a focus on sustainable development, which involves meeting the needs of the present without compromising the ability of future generations to meet their own needs.
- Examples of an integrated approach to S&T for a sustainable future include the development of renewable energy sources, sustainable agriculture practices, and green technologies. It also involves the integration of social and environmental considerations into policy-making processes, and the development of innovative solutions that address the complex challenges facing the planet.
- Overall, an integrated approach to S&T for a sustainable future is essential for creating a world that is environmentally and socially sustainable, and where people can thrive and prosper in harmony with nature.
- Undergraduate and graduate students need to be encouraged to develop the habit of independent and critical thought. It is crucial to place such an emphasis on analytical thinking and problem solving in a nation like India that faces several socioeconomic and development issues. A nation that struggles to handle its problems will have a shortage of PhD scientists, inadequate lab facilities, and restricted ICT. The significance of science literacy in larger society must also be taken into account. People are less inclined to wash their hands if they are unaware of the fundamental concepts behind the science of germs. People in the community will be less likely to take preventative action if they don't grasp the source and effects of climate change. In this context, comprehending relationships and bonds
- The session ended with a Q&A session, allowing the participants to clarify their doubts and they shared their views on science day. The vote of thanks was delivered by student coordinator Ms Chitturi Jyoshna

Report:

- On January 28, 2022, SparkWIT club of Department of IT, Pragati Engineering college commemorated Data Protection Day by hosting a elocution on "Importance of Data Protection In Privacy Matters" 43 students participated in it.
- Mrs. T Ganga Bhavani, the faculty coordinator, welcomed everyone to the event.
- The 16th Data Protection Day was celebrated worldwide on 28 January 2022.
- The aim of the day is to raise awareness of the challenges of data protection and privacy and to inform people about their rights and how they can exercise them. With this day now celebrated worldwide, the Council of Europe is demonstrating that it plays a major, pioneering and visionary role in encouraging and highlighting the events organized on this occasion.
- The importance of data protection in privacy matters cannot be overstated, especially in a world where we are surrounded by technology that enables us to share personal information with ease. This report will delve into the reasons why data protection is vital in protecting personal privacy, the potential consequences of not protecting data, and how to ensure data protection.

Reasons for Data Protection in Privacy Matters:

1. **Personal Information Protection:** In a world where data is considered as the new oil, protecting personal information has become vital. Personal data includes sensitive information such as name, address, date of birth, social security number, financial information, and medical records. This information can be used by hackers for identity theft, fraud, and other malicious activities.
2. **Regulatory Compliance:** Many countries have data protection laws that require organizations to protect personal information. Failure to comply with these laws can result in hefty fines and other legal consequences.
3. **Brand Reputation:** Data breaches can significantly damage the reputation of an organization. When an organization fails to protect personal information, it can result in a loss of trust among customers, partners, and stakeholders.
4. **Employee Information Protection:** Data protection is also essential in protecting employee information. Employers have access to sensitive information such as Social Security numbers, bank account details, and personal health information. This information can be used to commit identity theft or fraud.

Potential Consequences of Not Protecting Data:

1. **Identity Theft:** Identity theft is the fraudulent use of someone's personal information. It can cause significant financial damage and damage to a person's credit score.
2. **Financial Loss:** Data breaches can result in financial losses for individuals and organizations. In addition to the direct costs of remediation, there can be indirect costs such as loss of revenue and damage to reputation.
3. **Legal Consequences:** Failure to comply with data protection laws can result in legal consequences such as fines, lawsuits, and regulatory actions.

PRAGATI ENGINEERING COLLEGE

(AUTONOMOUS)

DEPARTMENT OF INFORMATION TECHNOLOGY

4. **Damage to Reputation:** Data breaches can significantly damage an organization's reputation. A tarnished reputation can result in the loss of customers, partners, and investors.

Ensuring Data Protection:

1. **Data Encryption:** Encryption is the process of converting sensitive data into an unreadable format that can only be decrypted with a key. This helps protect data in case of a breach.
2. **Access Controls:** Access controls limit access to sensitive data to authorized personnel only.
3. **Data Backup:** Regular data backup helps ensure data is not lost in case of a breach.
4. **Employee Training:** Training employees on data protection best practices helps ensure data is protected.

Conclusion:

- Data protection is essential in protecting personal privacy. Failure to protect data can result in significant financial and reputational damage for individuals and organizations. Ensuring data protection through data encryption, access controls, data backup, and employee training can help mitigate these risks. It is essential to prioritize data protection in privacy matters to safeguard personal information and prevent potential harm.

DEPARTMENT OF INFORMATION TECHNOLOGY

Report:

- On December 2, 2021, SparkWIT club of Department of IT, Pragati Engineering college commemorated World Computer Literacy Day by hosting a quiz competition on "**Literacy for Human-Centered Recovery: Narrowing the Digital Divide**" 30 students participated in it.
- Mrs. T Ganga Bhavani, the faculty coordinator, welcomed everyone to the event.
- World Computer Literacy Day was last celebrated on 2nd December 2021. The theme was 'Literacy for human-centered recovery: Narrowing the digital divide.'
- This event is celebrated to increase global computer literacy. It teaches people from all around the world how to use computers, how computers work, and how to build a developed society.
- Students showed lot of interest in quiz competition held by our club "SparkWIT"

The objectives behind celebrating this day are-

- Bridging the gap between the technologically backward and technologically developed nations across the globe
- Motivating everyone globally to make full use of communication and information technology.
- Spreading general awareness about computers, especially to teens, children, and women.
- Literacy for Human-Centered Recovery: Narrowing the Digital Divide is a concept that focuses on promoting literacy and digital skills development as a means of reducing the digital divide, which is the gap between those who have access to and can effectively use information and communication technologies (ICTs) and those who do not.
- The concept emphasizes that literacy, including digital literacy, is a basic human right and a critical factor in achieving sustainable development, including economic growth, social inclusion, and political participation. The COVID-19 pandemic has highlighted the urgent need for promoting literacy and digital skills development, as many people have had to rely on online platforms for education, work, and socialization.
- To narrow the digital divide and promote human-centered recovery, efforts must be made to ensure that everyone has access to ICTs and the necessary skills to use them effectively. This requires a multi-stakeholder approach involving governments, civil society organizations, the private sector, and individuals.
- Governments can play a critical role in promoting literacy and digital skills development by investing in infrastructure, such as broadband networks and public computer centers, and by developing policies that promote digital inclusion. Civil society organizations can support these efforts by providing training and resources to underserved communities, including women, persons with disabilities, and marginalized groups.
- The private sector can also contribute to narrowing the digital divide by investing in digital skills training and by developing innovative solutions that address the needs of underserved communities. Individuals can support these efforts by promoting digital literacy within their communities and by advocating for policies that promote digital inclusion.

PRAGATI ENGINEERING COLLEGE

(AUTONOMOUS)

DEPARTMENT OF INFORMATION TECHNOLOGY

- Overall, the concept of Literacy for Human-Centered Recovery: Narrowing the Digital Divide highlights the critical role that literacy and digital skills development play in promoting sustainable development and in ensuring that no one is left behind in the digital age.
- World Computer Literacy Day is an international observance celebrated on December 2nd each year. The day aims to raise awareness about the importance of computer literacy and bridge the digital divide by promoting access to technology and education worldwide.
- The history of World Computer Literacy Day dates back to the year 2001, when the United Nations declared it as an international day of observance. The aim was to promote the importance of computer literacy and empower people with the skills necessary to thrive in a technology-driven world.
- On this day, many organizations and governments around the world organize events, workshops, and training sessions to educate people about the basics of computing and technology. These events often target underprivileged communities and seek to provide them with access to technology and the internet.
- Computer literacy is considered to be an essential skill in today's world, as it enables individuals to access information, communicate with others, and participate in the global economy. Therefore, World Computer Literacy Day is an important opportunity to promote digital inclusion and bridge the digital divide that exists between different communities and countries around the world.

DEPARTMENT OF INFORMATION TECHNOLOGY

Report:

- On November 17, 2021, SparkWIT club of Department of IT, Pragati Engineering college commemorated National Science Day by hosting quiz competition on " **Learning for People, Planet, Prosperity, and Peace** "35 students participated in it.
- Mrs. T Ganga Bhavani, the faculty coordinator, welcomed everyone to the event.
- International Students' Day is a celebration of multiculturalism, diversity and cooperation among students across the globe.
- International Students' Day is the perfect opportunity for us to pay honor to the students of the world. From all corners of the globe, students are working hard to achieve their career goals and make a difference
- While student life is difficult for everyone, there is no denying that international students face several challenges. This includes homesickness, cultural differences, currency differences, financial troubles, and language barriers.
- The day has its roots in a tragic event that took place in 1939 when Nazi troops occupied Czechoslovakia. On November 17th of that year, Czech students organized a demonstration against the Nazi occupation, which was brutally suppressed by the authorities. Many students were arrested, and nine were executed, including the student leader Jan Opletal. The event became a symbol of the resistance against Nazi tyranny, and November 17th was designated as International Students Day in honor of the Czech students who gave their lives for freedom.
- Today, International Students Day is celebrated around the world with events and activities that highlight the importance of international education and cultural exchange. It is a day to recognize the valuable contributions of international students to global education, research, and innovation. It is also a day to promote the rights of international students and advocate for policies that support their access to education, resources, and opportunities.
- Overall, International Students Day is a powerful reminder of the importance of global education and cultural exchange, and the need to work towards a more inclusive and equitable world.
- Learning for People, Planet, Prosperity, and Peace (L4P) is an approach to education and learning that aims to address global challenges related to sustainable development. It emphasizes the interdependence of the four pillars of sustainable development: social, economic, environmental, and governance.
- The L4P approach recognizes that education and learning are crucial for achieving sustainable development goals, as they enable individuals and communities to acquire knowledge, skills, values, and attitudes that can support positive change. It also acknowledges that learning is a lifelong process that occurs in formal, non-formal, and informal settings.
- L4P promotes education and learning that:
 1. Is inclusive and equitable, providing access to all individuals regardless of their background, gender, age, or ability.
 2. Is relevant and responsive to the needs and challenges of local communities and the broader society.

DEPARTMENT OF INFORMATION TECHNOLOGY

3. Emphasizes the interconnectedness of social, economic, environmental, and governance issues, and promotes integrated solutions.
 4. Encourages critical thinking, creativity, and innovation, enabling individuals to develop the skills needed to address complex challenges.
 5. Fosters values such as empathy, respect, and responsibility, promoting social cohesion and peaceful coexistence.
 6. Supports the transition to sustainable and resilient societies, promoting prosperity and well-being for all.
- L4P is closely aligned with the United Nations' 2030 Agenda for Sustainable Development, which outlines 17 Sustainable Development Goals (SDGs) aimed at eradicating poverty, protecting the planet, and promoting prosperity for all. L4P recognizes that achieving these goals requires a transformative approach to education and learning that addresses the root causes of unsustainable practices and promotes positive change.
- Students showed lots of interest towards quiz competition

DEPARTMENT OF INFORMATION TECHNOLOGY

Report:

- On October 28, 2021, SparkWIT club of Department of IT, Pragati Engineering college commemorated International Animation Day by hosting PPT Presentation on "Animations" 38 students participated in it.
- Mrs. T Ganga Bhavani, the faculty coordinator, welcomed everyone to the event.
- ASIFA created the International Animation Day (IAD) in 2002, honoring the birth of animation, recognized as the first public performance of projected moving images: Emile Reynaud's Theatre Optique in Paris, on the 28th October 1892.
- Animation includes an impressive range of approaches, techniques and goals. Created by drawing, painting, animating puppets and objects, using clay, sand, paper and computer, working with multiple narratives and non-narratives, reflecting a diversity of themes and performances, presented on a variety of platforms.
- Students presented their ideas and significance of Animations.
- International Animation Day is an annual celebration of animation that takes place on October 28th. The day was first established in 2002 by the International Animated Film Association (ASIFA) to commemorate the first public performance of animation, which took place in Paris in 1892.
- The purpose of International Animation Day is to celebrate the art of animation and its role in film, television, advertising, and other creative industries. It is also an opportunity to bring together animators, filmmakers, and fans from around the world to share their work, exchange ideas, and inspire new collaborations.
- On International Animation Day, events and activities take place in cities and communities around the world, including film screenings, workshops, exhibitions, and seminars. Many of these events are organized by local chapters of ASIFA, which has over 40 chapters worldwide.
- One of the key themes of International Animation Day is the diversity of animation styles and techniques. From traditional hand-drawn animation to computer-generated imagery (CGI), stop-motion, and mixed-media approaches, animation offers a rich and varied canvas for creative expression.
- Another important aspect of International Animation Day is its focus on education and outreach. Many events and activities are aimed at introducing children and young people to the world of animation, inspiring them to explore their own creativity and consider careers in the animation industry.
- In recent years, the growth of online streaming platforms and social media has provided new opportunities for animators to share their work and reach new audiences around the world. This has also helped to broaden the scope and impact of International Animation Day, making it easier than ever for people to participate and engage with this dynamic and exciting art form.
- Overall, International Animation Day is a celebration of animation that brings together people from all walks of life to celebrate the power and potential of this dynamic art form.

Report:

- On September 15, 2021, SparkWIT club of Department of IT, Pragati Engineering college commemorated International Engineers Day by hosting PPT Presentation on "**Engineering for A Healthy Planet- Celebrating the UNESCO Engineering Report**" 43 students participated in it.
- Mrs. T Ganga Bhavani, the faculty coordinator, welcomed everyone to the event.
- Our country celebrates National Engineer's Day on the 15th of September each year in memory of India's engineering icon M. Visvesvaraya. A highly disciplined engineer, he was known for his sincerity, time management, hard work, and devotion
- On Engineer's Day, the work of professionals engaged in various engineering disciplines of the country and their contribution in nation building is appreciated
- Engineers are seen to be the pillars of our society, working hard day and night to provide us with the best infrastructure.
- The UNESCO Engineering Report, titled "Engineering for a Sustainable Future: Delivering on the Sustainable Development Goals," highlights the critical role that engineering plays in achieving sustainable development and addressing global challenges such as climate change, energy access, and poverty reduction. The report emphasizes the need for engineers to adopt a holistic and multidisciplinary approach to problem-solving, to work collaboratively across sectors and disciplines, and to prioritize sustainability and social responsibility in their work.
- To celebrate the UNESCO Engineering Report and the importance of engineering in building a healthy planet, we can recognize and celebrate the achievements of engineers who are making a positive impact in their communities and around the world. This could include highlighting innovative engineering solutions that are helping to address environmental and social challenges, showcasing the work of engineers who are working on sustainable energy projects, or promoting the development of sustainable infrastructure and transportation systems.
- We can also support initiatives that promote engineering education and encourage young people, particularly those from underrepresented groups, to pursue careers in engineering. This can help to ensure that we have a diverse and talented pool of engineers who can bring a variety of perspectives and approaches to solving complex global challenges.
- We can advocate for policies and regulations that support sustainable engineering practices and promote the adoption of new technologies and innovations that can help to reduce our environmental impact and improve the well-being of communities around the world. By working together to promote sustainable engineering practices and celebrate the achievements of engineers who are making a difference, we can help to build a healthier and more sustainable planet for future generations.

DEPARTMENT OF INFORMATION TECHNOLOGY

The UNESCO Engineering Report identifies several key areas where engineering can contribute to a healthier planet, including:

- **Sustainable Energy:** Engineering can play a crucial role in developing renewable energy technologies and promoting energy efficiency to reduce greenhouse gas emissions and combat climate change.
- **Sustainable Water Management:** Engineering solutions can help ensure access to safe and clean water for all, while also addressing the growing challenge of water scarcity.
- **Sustainable Agriculture:** Engineering can contribute to sustainable agriculture by developing technologies and practices that reduce the environmental impact of food production and support food security.
- **Sustainable Infrastructure:** Engineering can design and implement infrastructure that is resilient, sustainable, and adaptable to climate change, while also promoting social and economic development.
- Overall, the UNESCO Engineering Report highlights the critical role that engineering can play in creating a healthier planet, but also emphasizes the need for a transformative shift in engineering practice and education. By embracing sustainability principles and collaborating with stakeholders, engineers can help address some of the most pressing environmental and social challenges of our time.

DEPARTMENT OF INFORMATION TECHNOLOGY

Report:

- On September 8, 2021, SparkWIT club of Department of IT, Pragati Engineering college commemorated National Science Day by hosting elocution on "**Transforming Literacy Learning Spaces**" 40 students participated in it.
- Mrs. T Ganga Bhavani, the faculty coordinator, welcomed everyone to the event.
- Dr. D Sirisha, HoD, Department of IT, spoke at the session. She introduced the integrated approach at the beginning of the session.
- This year's World Literacy Day will be celebrated worldwide under the theme, Transforming Literacy Learning Spaces and will be an opportunity to rethink the fundamental importance of literacy learning spaces to build resilience and ensure quality, equitable, and inclusive education for all.
- We need to enrich and transform the existing learning spaces through an integrated approach and enable literacy learning in the perspective of lifelong learning.
- The World Literacy Day global celebration lies at the heart of regional, country and local levels.
- Transforming literacy learning spaces refers to the process of redesigning educational environments to better support literacy learning. This can involve a range of changes, from physical modifications to the classroom or library space, to changes in teaching methods and curricula.
- Some common strategies for transforming literacy learning spaces include:
 1. Creating a comfortable and welcoming environment: This can involve adding soft seating, cozy rugs, and other elements that make the space feel inviting and conducive to learning.
 2. Incorporating technology: Digital tools like interactive whiteboards, e-readers, and educational apps can enhance literacy instruction and engage students in new ways.
 3. Fostering collaboration: Literacy learning is often most effective when students work together to discuss and analyze texts. Creating spaces where students can easily collaborate, such as small group tables or designated discussion areas, can promote deeper learning.
 4. Incorporating diverse texts and perspectives: Providing a range of texts that represent different cultures, experiences, and perspectives can help students develop empathy and critical thinking skills.
 5. Engaging students in active learning: Encouraging students to actively participate in their own learning, through activities like reading aloud, dramatization, and creative writing, can help them develop a deeper understanding of literacy concepts.

- Effective literacy learning spaces can take many different forms, from traditional classrooms to virtual learning environments. The key is to create an environment that promotes active and engaged learning, and that supports the development of critical literacy skills.
- By transforming literacy learning spaces, educators can help to prepare students for success in school and in life, by providing them with the tools and skills they need to become confident, effective communicators and critical thinkers.
- Overall, transforming literacy learning spaces involves creating an environment that is conducive to learning and encourages students to engage with literacy in meaningful ways. This can help students develop the literacy skills they need to succeed academically and in life more generally.

Report on “A Four days workshop on Design & Fabrication of Go-Kart”

Date: 12.011.2019

Four day's training workshop from 9th to 12th Nov 2019 on Go-Kart Design and fabrication was organized by Department of Mechanical Engineering of Pragati Engineering College. This event is an intercollegiate design workshop for engineering students. The vehicle must be highly engineered, safe and ergonomically designed. The purpose of the event is to provide an opportunity for engineering students to develop their skills and also their stepping stone in automobile sector in India and come up with some innovative designs. Students have to tackle real world engineering problems, work in multi disciplinary teams, practice design for manufacturability and manage a full product development cycle of life.

The four days workshop includes designing, fabricating and validating a four wheeled, vehicle driven by one driver. The vehicle would be capable to be driven by one driver on gasoline. The vehicle would be evaluated for its design, performance, safety, durability etc., and the teams compete against each other. The cumulative scores of all the events would decide the overall ranking of the teams in the event. Mr.G.Avinash, HOD, Mechanical Engg. Congratulated the students and faculty members for their efforts. Mr.D.J.Johnson, Co-ordinator of the event conducted the proceeding.

The event ended with honorarium to the guests and vote of thanks.

Report on "A Two days workshop on Design & Fabrication of Go-Kart"

Date: 21.10.2017

The guest lecture was preceded by a short talk by Mr. Avinash.G, Assoc. Professor in the department of mechanical Engineering. Workshop was conducted by Mr. Gaurav Hadavale, Founder of Performance Motor Works (PMW). Before starting the Design and manufacturing of Go-kart, he divided the session into three introductory parameters:

1. Introduction of Go-kart and Cost analysis
2. Transmission System
3. Design and analysis using Solid Works, Ansys Software

In the first day of session Mr. Hadavale discussed about static parts of go-kart and how each and every component works, time span and costing.

Then he explained Engine working and fundamentals:

Chassis: Fundamentals of chassis design, Chassis materials, Light metals for chassis, Tolerance in designing, Bending strength calculation, Manufacturing Technique for Chassis Body Works and Custom parts, Safety Equipment and consideration.

Braking System: Brake performance parameters, Braking efficiency, Weigh load transfer.

Steering System: Steering dynamics, Four wheel steering mechanism, Turning radius calculations, Ackerman principle.

The second day of workshop conducted in Solid Works Lab . In this session Mr. Hadavale explained CAD software basic tools, Chassis designing and stress analysis of each component, Extrude feature, basic part modeling, sprocket, Go-kart wheel hub, Disc brake, Steering assembly. After the sir's session, students designed their own innovative chassis in solid work software and analysed in Ansys software.

The event ended with honorarium to the guests and vote of thanks.
