REPORT

Seminar on

IMPACT OF SUSTAINABLE BUILDING MATERIALS ON CLIMATE CHANGE

As a part of the industry 4.0 student club activity of Pragati Engineering GREEN BUILDING CLUB organized a SEMINAR on CONCEPTS OF BUILDING MATERIALS on 05.10.2023 from 10AM in MS-7, PRAGATI ENGINEERING COLLEGE for all the student of civil Engineering and members of the Green Building club and the faculty members.

Student members of INDUSTRY 4.0 of all the other departments have taken part and contributed their knowledge to the participants.

Green buildings are about straddling the structure's entire ecosystem – planning, design, construction, operations, and its end-of-life impact on the environment. This entails looking at options that save energy and water, do not emit harmful GHGs(Green House Gases), and are recyclable or sustainable.

During the session, the following are discussed;

- Natural resources and Extraction of raw materials.
- Processing, manufacturing and recycling of materials.
- Transportation, construction and retro fitting.
- Use and treatment.
- Demolition, disposal and land filling.

The program was attended by Faculty members and students. Participation of 45 students from Pragati Engineering College is so thoughtful and informative.

The picture of the event and glimpses of slides presented were mentioned in the report stated.
