REPORT

Essay writing on

Climate Change Impacts on Water Resources

As a part of the Extra Circular student's club activity of Pragati Engineering College (Autonomous), Department of Civil Engineering, **WATER MANAGMNET CLUB** organized aessay writing competition on "Climate Change Impacts on Water Resources" on 04-05-2024 from 2:00PM in MS-7, **PRAGATI ENGINEERING COLLEGE** for all the student of civil Engineering and members of the Green Building club and the faculty members. Student members of **WATER MANAGMENT CLUB** and all the other departments have taken part and contributed their knowledge to the participants.

During the session, the following are discussed;

Climate scientists predict that this shift will lead to more floods since more water will fall than vegetation and soil can absorb. The remaining water, or runoff, drains into nearby waterways, picking up contaminants like fertilizer on the way. Excess runoff eventually travels to larger bodies of water like lakes, estuaries, and the ocean, polluting the water supply and limiting water access for humans and ecosystems.

Keywords:

- Evaporation
- Precipitation
- Surface Runoff and Stream Flow
- Snowpack
- Changes in Water Demand

The program was attended by Faculty members and students. Participation of 45 students from Pragati Engineering College is so thoughtful and informative.
