DATA ANALYTICS CLUB

18-07-2024

A Report on the Data Analytics Club Activity

As part of the technical activities under the **Data Analytics Club** of the Department of CSE (Data Science), this event was conducted.

Name of the Event: TECHNICAL EVENT

Title of the Event (Topic): AD-HOC NETWORKS

Speaker (Resource Person) of the Event: A.N.V.S.S.S.L. CHINMAYI (23A35A4402)

Date of the Event: 18-07-2024

Time of the Event: 11:00 AM TO 12:00 AM

Venue of the Event: CSE (Data Science) Department (CF-5)

A total of 52 students attended this event. All the students have actively participated in the event.

Brief write-up of the event:

The event delved into the basics of ad hoc networks, their key characteristics, and the unique challenges they present. Attendees were introduced to various applications and common routing protocols, making the complex topic accessible and engaging.

Interactive discussions allowed participants to explore real-world scenarios where ad hoc networks are invaluable, enhancing their practical understanding.

HIGHLIGHTS AND KEY TAKEAWAYS:

- Attendees gained a solid grasp of ad hoc networks, including their fundamentals, key characteristics, and applications.
- The event sparked enthusiasm for future networking projects and collaborations among participants.
- The session featured lively discussions, enhancing both theoretical and practical understanding through collaborative learning.

POST-EVENT FEEDBACK:

Attendees engaged actively, exploring the fundamentals, key challenges, and applications of ad hoc networks. The session not only deepened our understanding but also sparked enthusiasm for future projects and collaborations within the field of networking.

QUESTIONS POSED BY THE STUDENTS:

1. Can you name some common applications of ad hoc networks?
2. What is a major challenge in maintaining an ad hoc network?
3. How do devices in an ad hoc network communicate with each other?
