DEPARTMENT OF  
COMPUTER SCIENCE AND ENGINEERING  
(ARTIFICIAL INTELLIGENCE)

**ABOUT THE DEPARTMENT:**

Established in the year 2021, the department of AI has been set up with a goal of training students and conducting research in the fields of Artificial Intelligence. The department consists of highly qualified and dedicated faculty from the reputed institutes. The department aims to train the student as leaders in AI with world class infrastructure, curriculum and comprehensive hands-on experience through industry connect programs. The goal of the department is to ensure the academic excellence in students with wide exposure of research and career opportunities. The ultimate goal is to nurture the academic excellence, industry exposure and outstanding career opportunities to our students.

## Vision & Mission

### Department Vision

To emerge as a center of technical expertise in the field of Artificial Intelligence by producing globally competent professionals with technical & research capabilities, ethical values and team spirit.

### Department Mission

**DM1:** To develop skilled and capable software professionals in the field of Artificial Intelligence.

**DM2:** To induce application-oriented skills and research capabilities in students for the betterment of the society.

**DM3:** To instill ethical and human values in students, enabling them to adapt to the evolving field of Artificial Intelligence.

### Program Educational Objectives

#### PEO1:

Graduates are prepared to apply analysis, predictions, optimization, decision making and develop skills in order to formulate and solve complex problems with artificial intelligence.

#### PEO2:

Graduates are prepared to take up higher studies, research & development and other creative efforts in the area of AI which drives scientific and societal advancement through technological innovation and entrepreneurship.

#### PEO3:

Graduates are prepared to use their skills and abilities in an ethical & professional manner.

### Program Outcomes:

**Engineering knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**Problem analysis:** Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**Design/development of solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**Conduct investigations of complex problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**Modern tool usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

**The engineer and society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

**Environment and sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

**Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

**Individual and team work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

**Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

**Project management and finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

**Life-long learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

### Program Specific Outcome:

Engineering Students will be able to:

**PSO1:** Apply artificial intelligence techniques, software tools to conduct experiments, interpret data and to solve complex problems.

**PSO2:** Design and development of intelligent automated systems for the benefit of society by the use of AI.

**PSO3:** Adapt to a rapidly changing environment by learning and employing emerging software tools and technologies in the area of Artificial Intelligence.

### Staff List:

### **Strides:**

The technical events(strides) were conducted on 03-03-2023 & 04-03-2023. The students of our department participated in various events conducted by all the departments.

A student from our department **Mr. K. Dinesh Narayana** won **second prize** in **Data Vishleshana** conducted by the department of CSE-DS.

### **Workshops:**

**Workshop held at JNTUK on 18-03-2023 & 19-03-2023:**
