ERUDITE- At A Glance

ERUDITE under **STRIDES** has been an opportunity since 2007 created by the Mechanical Engineering Association of our college, since then it made a great progress to provide a technical platform to all the students coming out from all parts of the nation to enhance their skills and improve their knowledge in the field of Mechanical Engineering.

What does **ERUDITE** means?

ERUDITE means “Characterized by Great Knowledge”

This year **ERUDITE** is back with loads of innovative and technical aspects.

Now let us take a quick look at technical events going to be organized in ERUDITE-2K21

DARPAN (Paper Presentation): To reveal the quest of research in the field of Mechanical Engineering and to test the comprehensive skills of young Engineers, ERUDITE-2K21 is providing **DARPAN** as a platform to present their knowledge.

DIKSUCHI (Poster Presentation): To showcase the future innovations or developments in the field of Mechanical Engineering, ERUDITE-2K21 is organizing **DIKSUCHI**.

DARSHAN (Model Expo): To Encourage the Young Creators of the country, by giving them a chance to exhibit their creativity and innovations, we are organizing **DARSHAN** which will provide a common platform for creative engineers.

DISHATI (Technical Quiz): Mechanical engineers require enormous amount of logic and technical knowledge. To test that knowledge inside the students, **DISHATI** will help to sharpen your technical skills and winning this event to be proved as a Technocrat.

DOOHICKEY (Contraptions): To test the limits of the mechanical engineers by challenging their creativity and questioning their will of creation and demanding a new possibility for an old question. **DOOHICKEY** creates a common platform to expand their limits and represent them.

CAD MANIA (2D & 3D Modelling): This event is a platform purely conducted to encourage the modelling skills of the budding engineers. It is a task where students require model parts using a software.

TECH TAPE (TECHNICAL VIDEOGRAPHY): Digitalization is what currently we are living in. This is an event where student's creative and innovative thoughts will be showcased and presented in form of video according to the modern-day requirements.

NAVIKARAN (INNOVATIVE DESIGN IDEAS): This is another event where the students have to sharpen their ideology and come up with creative design thoughts for the future.

DEBUGGING (CODING): In the present-day software world without coding we cannot survive. This is an event to test the coding skills of the student.

CHITRAKARI (ART COMPETITION): This is a unique way of bringing out the talent in the students. Since mechanical engineers deals with a lot of creativity, imagination and art, we encourage students to exhibit their own creativity and art.

WORKING

- The major parts of the blue eyes system are DAU & CSU.
- The task of the mobile DAU is to maintain bluetooth connections to get information from the sensor and sending it over the wireless connection.
- To deliver the alarm message sent from the CSU to the operator & handle personalized ID cards.
- CSU maintain the other side of the bluetooth connection, buffers incoming sensor data performs online data analysis, records the conclusion for further exploration & provide visualization interface

A Digital Ledger
A Blockchain is a digital ledger which keeps records of all transactions taking place on a peer-to-peer network.

The blockchain is decentralized. No one owns it, and it runs on a network of computers.

Decentralization

What is a Blockchain?

Encrypted Information
All information transmitted via blockchain is encrypted and every transaction is verified through other nodes in the chain. It makes it almost impossible to tamper with.

Data Sharing
The blockchain can be used to share data and information in a secure and transparent way. It can be used to share sensitive data and also to share non-sensitive data.

Peer to Peer
Does your internet or landline connection with a peer-to-peer network? Remember the mobile phone?

AERONAUTICAL COMMUNICATION INTRODUCTION

- Communication b/w aircraft cabin to the terrestrial network via satellite segment. Global coverage is essential for providing continuous service.
- Wireless services such as UMTS, Bluetooth and Wi-LAN in aircraft cabins.
- Airlines are increasingly requiring in-flight services to offer similar entertainment or business experience to passengers as their terrestrial counterpart.

SATELLITE CONNECTION

- The composition of Air traffic satellite system.
- Support the air traffic control and for weather observations.
- Higher reliability, integrity, and operational continuity are required.

WIRELESS CABIN ARCHITECTURE

CABIN SEGMENT:

- Wireless LAN for IP services.
- UMTS (The Universal mobile telecommunication system) for personal and data communications.
- Bluetooth for IP access for transport of UMTS service.
