## CYBER SECURITY CLUB REPORT

DATE: 12-01-24

### SEMINAR ON “Future in Cyber Security as a Career Option”

The absence of data security is the main drawback in today's digital world. Our private data became bait to hackers. In order to avoid this situation, one should secure their own data. Cyber security is the protection to defend internet connected devices and services from malicious attacks by hackers, spammers, and cyber criminals. Around today's world you will see that daily life is more dependent on technology than ever before. With so much good coming from technology, it can be hard to believe that potential threats lurk behind every device and platform. Despite the advantages, cyber security threats presented by modern tech are a real danger and it is mandatory to protect our data.

Most people may not have any idea about how to secure their data. So, we took a step today to create awareness about it. We, the club members, initiated this session with Basics of Cyber Security that is entitled as “**Future in Cyber Security as a Career Option**” for the second year Students on **08th January 2024**. This session involved discussing topics on

- Introduction to cybersecurity
- Overview of first cybersecurity concerns
- Key concepts in cybersecurity (CIA Triad)
- Encryption
- Threat
- Malware
- Emerging trends in cybersecurity
- Cloud security
- Blockchain Technology in cybersecurity
- Essential skills and career paths
