# **DEPARTMENT OF INFORMATION TECHNOLOGY**

### **Vision of Institution:**

To emerge as a Premier Institution for Technical Education in the Country through Academic Excellence and to be recognized as a Centre for Excellence in Research & Development, catering to the needs of our Country.

### **Mission of Institution:**

To realize a strong Institution by consistently maintaining State-of-art-infrastructure and building a cohesive, World Class Team and provide need based Technical Education, Research and Development through enhanced Industry Interaction.

### **Vision of the Department:**

To attain academic excellence in the field of Information Technology and research serving to the needs of the society through technological developments.

### **Mission of the Department:**

- To create stimulating learning ambiance by providing state-of-art infrastructure and to induce innovative and problem-solving capabilities to address societal challenges.
- To impart quality technical education with professional team to make the graduates globally competent to IT Enabled Services.
- To strengthen industry-academia relationship for enhancing research capabilities.

### **PSOs:**

**PSO1:** Develop software programs in various programming languages learnt to create the software applications to solve the real life problems of the society.

**PSO2:** Excel in emerging software tools and technologies.

**PSO3:** Effectively transform their ideas and bring consensus for the transformation of the idea into a usable software product / application.

## **PEOs:**

### **PEO1:**

Students will have successful career in IT as researchers, entrepreneurs and IT professionals satisfying the needs of the society.

### **PEO2:**

Students will exhibit inclination towards higher education and continuous learning process.

### **PEO3:**

Students will practice ethical behavior in IT industry with effective soft skills essential to work in teams.

## **POs:**

- 1. Engineering knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
- 2. Problem analysis:** Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
- 3. Design/development of solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
- 4. Conduct investigations of complex problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
- 5. Modern tool usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
- 6. The Engineer and society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
- 7. Environment and sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

8. **Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

9. **Individual and team work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

10. **Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

11. **Project management and finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

12. **Life-long learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

**Faculty list:**

**Department Activity:****Workshop:**

The Power BI workshop provided a comprehensive understanding of how to efficiently work with data, create insightful visualizations, and enhance decision-making through interactive reports. Participants gained hands-on experience in data extraction, transformation, modelling, and visualization, enabling them to develop dynamic dashboards and reports tailored to business needs.

By mastering Power BI, participants are now equipped with the skills to analyse large datasets, generate meaningful insights, and make data-driven decisions. The workshop successfully

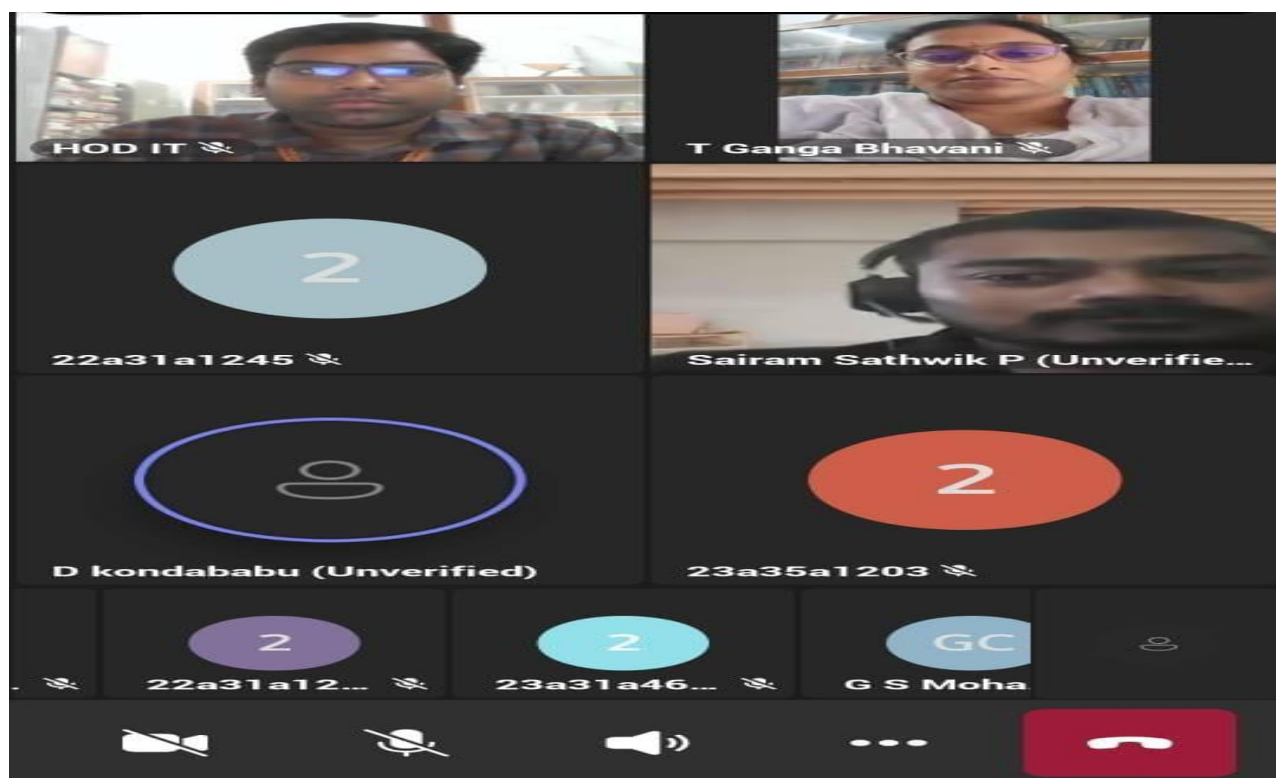

empowered learners with real-world applications of Power BI, enhancing their analytical and reporting capabilities for both academic and professional growth.

### **Department of INFORMATION TECHNOLOGU AND CYBER SECURITY organized a workshop on Power BI**

#### **Alumni Talk:**

The "ALUMNI TALK" organized by the Department of Information Technology and CSE- Cyber security will be held online on 28-06-2025.
