Date: 23-07-2025

A Report on the Student Workshop on "Quantum Computing for Data Intensive Applications"

As part of the technical activities under the **Society for Data Science – Student Chapter** of the Department of CSE (Data Science), this event was conducted.

Title of the Event (Topic): Quantum Computing for Data Intensive Applications

Speaker (Resource Person) of the Event: Speakers from Brainovision Solutions India Pvt.Ltd, Hyderabad

Date of the Event: 17-07-2025 To 19-07-2025

Time of the Event: 9:00 AM To 4:00 PM

Venue of the Event: Data Science Computer Laboratory (EG-6)

Brief write-up of the event:

The Department of CSE (Data Science) at Pragati Engineering College organized a 3-day expert workshop titled "Quantum Computing for Data Intensive Applications" from 17th July to 19th July 2025. This workshop, conducted under the Society for Data Science – Student Chapter and in association with Brainovision Solutions India Pvt. Ltd., Hyderabad, aimed to provide in-depth knowledge and hands-on experience in the use of quantum computing technologies for managing and analysing large-scale data applications.

The event was designed for students and professionals interested in cutting-edge data science and quantum computing, featuring expert sessions, interactive discussions, and practical demonstrations. By bringing together academic and industry collaboration, the workshop helped participants understand foundational concepts, real-world applications, and future trends in quantum-driven data science.

DAY-BY-DAY SUMMARY:

Day-1: Introduction to Quantum Computing

The first day of the workshop was dedicated to introducing the fundamental concepts of quantum computing. Participants were provided with a clear overview of the differences between classical and quantum computing, as well as an explanation of the unique principles that set quantum systems apart, such as superposition and entanglement.

PRAGATI ENGINEERING COLLEGE

(AUTONOMOUS)

DEPARTMENT OF CSE (DATA SCIENCE)

Day-2: Exploring Quantum Gates in Action

The collaborative learning and enabling participants to troubleshoot, optimize, and experiment with actual quantum circuits, deepening their practical understanding of how quantum gates drive computation in emerging quantum technologies.

Day-3: Hands-on experience with real world Quantum Computer (IBM)

On the third day of the IBM Quantum hands-on workshop, participants gain practical experience by designing and implementing quantum circuits using the Qiskit framework, running them on IBM's real quantum hardware, and exploring advanced applications such as quantum algorithms, cryptography, and optimization through interactive sessions and real-world problem-solving with experts.

HIGHLIGHTS AND KEY TAKEAWAYS:

Highlights:

- Expert-led sessions focusing on foundational and advanced quantum computing concepts.
- Real-time hands-on experience with IBM's quantum computers using the Qiskit framework.
- Exposure to cutting-edge applications of quantum computing in data science, optimization, and cryptography.
- Industry-academia collaboration enhancing relevance and practical insight.
- Active participation through discussions, demonstrations, and problem-solving tasks.

Key Takeaways:

- Clear understanding of quantum computing principles.
- Practical skills in building and executing quantum circuits on real quantum hardware.
- Insight into the role of quantum gates and algorithms in solving data-intensive problems.
- Preparedness to explore quantum computing's potential in emerging data science fields.
- Encouragement for future exploration and research in quantum technologies.
