#### Brief write-up of the event:

The Department of CSE (Data Science) at Pragati Engineering College organized a 3-day expert workshop titled “**MERN Stack Technologies for Building Data-Driven Web Apps**” was successfully organized to provide students with practical exposure to one of the most popular frameworks in modern web development. The sessions introduced students to the installation and usage of essential tools, database connectivity using **MongoDB**, and fundamentals of **Node.js** and **Express.js** for backend development. The workshop emphasized hands-on learning, enabling participants to directly apply the concepts during the sessions and understand how different components of the stack work together.

The program also highlighted the importance of **frontend technologies** such as **HTML, CSS, and JavaScript**, through which students developed simple interactive projects by integrating backend and frontend. The interactive teaching approach and live demonstrations helped students gain confidence in creating small-scale applications and set a strong foundation for full-stack development. Overall, the workshop proved to be highly beneficial, enhancing both the technical skills and industry readiness of the participants.

#### DAY-BY-DAY SUMMARY:

##### Day-1: Setting the Foundation – Tools & Database Connectivity

- The workshop began with an introduction to the MERN stack and its growing importance in web development.
