REPORT

On

“Integrated Water Resources Management”

As a part of the Extra circular student club activity of Pragati Engineering College **“Water Management Club”** cordially organizing **“Integrated Water Resources Management”** on **22.08.2025** from **11:00 AM** onwards at **MS-8 Mechanical Block**.

Student members of Extra circular student club activity of all the other departments have taken apart and contributed their knowledge to the participants.

IWRM is a cross-sectoral approach that is increasingly recognized as the solution to traditional, fragmented sectoral approaches to water resources management that have led to unsustainable use and poor services. IWRM is based on the understanding that water resources are an integral component of the ecosystem, a natural resource, and a social and economic good

Implementing IWRM thereby helps to protect the world's environment, fosters economic growth and sustainable agricultural development, promotes democratic participation in governance, and improves human health.

The program was attended by Faculty members and student members from Pragati Engineering College

Organizing Members:
