REPORT

Lecture
on
“5 F’s of Sanitation and Hygiene”

As a part of the industry 4.0 student club activity of Pragati Engineering “**SANITATION and HYGIENE CLUB**” cordially organizing **LECTURE** on “**5 F’s of Sanitation and Hygiene**” on **13.02.2025** from **03:00 PM.** onwards at **MS-07 Core Block.**

Student members of **INDUSTRY 4.0** of all the other departments have taken apart and contributed their knowledge to the participants.

The **5 F’s of Sanitation and Hygiene** are a set of principles that help to prevent the spread of infectious diseases by focusing on key factors that contribute to contamination. They are:

Fingers – This refers to proper handwashing. Clean hands are crucial in preventing the spread of harmful germs and bacteria.

Food – Food should be kept clean, properly cooked, and stored in hygienic conditions to prevent contamination.

Feces – Proper disposal and sanitation of human waste (feces) are essential to avoid contamination of food and water sources.

Flies – Flies can carry disease-causing microorganisms. Proper waste disposal and hygiene practices can reduce the presence of flies.

Floods – Floods can spread contaminants into clean water supplies and living areas. Proper drainage and flood management systems are important to avoid waterborne diseases.

These factors highlight the key areas where sanitation and hygiene practices need to be focused to ensure a healthy environment.

The program was attended by Faculty members and student members from Pragati Engineering College.
