WEEKLY ACTIVITY REPORT

As part of the continuous skill-development initiatives by the Data Science Student Association, a weekly activity was structured as a formal Debate Competition on July 4, 2026. The focus of the session was a highly relevant contemporary dilemma: "**Online Education vs Traditional Education.**" The activity targeted III-Year B.Tech students, encouraging them to analyze the critical balance between digital learning architectures and conventional classroom methodologies. Through this collaborative session, students were pushed to evaluate pressing academic and technological trends while sharpening their essential professional skills in critical research, structural articulation, and persuasive public speaking.
